Reminder: Immunization Registry Improvements

- ❑ Vermont IMR (7/27/20): new tool via web service for forecasting.
- ❑ Provides **clinical decision support** for immunization; supports all routinely administered vaccine groups from birth-adulthood.
- ❑ Based on the ACIP (CDC) schedule
- ❑ Provides the clinician with 3 critical pieces of information:
 - ❑ **Assessment** of what has already been given.
 - ❑ **Recommendations** for what vaccines are due today.
 - ❑ **Conditional Recommendations** for which vaccine might be called for if the patient has special health conditions.
- ❑ Corrects shortcomings of previous forecaster (e.g., flu & HPV).
 - ❑ Provides specific reasons why a previously administered dose may be invalid, and adds forecasting for adult patients. When a vaccine for Covid-19 becomes available, we expect to be able to quick avail ourselves of vaccine scheduling guidance through this tool.
- ❑ Includes **Quick Guide**

IMR How To: Using the New Forecaster

July 2020

It is one thing to know which immunizations a person has received, and quite another to know what other immunizations are called for, and when the next dose is due. We are happy to announce the Vermont Immunization Registry (IMR) has implemented a new forecaster that will help us to quickly incorporate new vaccine schedule recommendations issued by the CDC's Advisory Committee on Immunization Practices (ACIP).

Enhanced vaccine clinical decision support via the Immunization Calculation Engine webservice is now available in the Vermont Immunization Registry.

Vermont's new forecaster uses the Immunization Calculation Engine (ICE) webservice – a state-of-the-art open-source software system that provides clinical decision support for immunization. The forecaster supports all routinely administered vaccine groups, including the child, teen, and now even adult immunization schedules. It provides clinicians with guidance for recommended immunizations as well as conditionally recommended doses for people with health conditions that might call for additional protection.

Typical Immunization Records Look Like This

This is the Immunizations Grid in the IMR. It is clear what vaccines have been administered and when. But what vaccines might be due today? And, have the previously administered doses been given in line with the schedule guidance?

Patient: Isaacson, Danane Date of Birth: 1/24/2010 Patient Age: 2 years 5 months and 13 days
Practice Name: Stratfieldboro (Pa) Primary Care

The Vermont Immunization Registry is a tool to assist in tracking and forecasting immunizations normally due and overdue, based on date of birth. It is not intended to replace medical expertise.

Practice Issues

Back to “Back to School” (Vermont K-12 Reopening)

Stories from the Field

VT Principals' Association – Fall Sports

From **Jay Nichols**, VPA Executive Director

- 7/2/20: HS fall sports preseason practice start date ***delayed*** (previously Aug. 10) due to coronavirus health/safety concerns
- VPA Activities Standards Committee/COVID-19 task force recommended fall season to start on the first student day for a school (e.g., end August/early September).
- Group hopes to forward **final recommendations** to Governor, Secretary French & Commissioner Levine shortly – then anticipate announcement (soon!) once final approval obtained.

Re-opening Schools – **Process** to Date

- 5/22/20: AOE Secretary Dan French convenes “Advisory Group to the Secretary on COVID” (education partners)
- 5/29/20: formal collaboration w/VDH: Breena Holmes (MCH Director), Patsy Kelso (VT State Epi); Commissioner Levine
 - ▣ This group continues to meet
- Week of 6/8/20: Safe & Healthy Schools Task Force
 - ▣ Convened by Breena: health & education partners
- 6/17/20: A Strong and Healthy Start guidance released
 - ▣ Always intended to be iterative
 - ▣ Task Force reconvened last week and this week

VT School Re-opening Task Force/Guidance

DRAFT Considerations – NOT FINAL: PLEASE do not disseminate

- **Introductory language:** “The unique and critical role that schools play makes them a priority for opening and remaining open, enabling students to receive both academic instruction and support as well as critical services. Early reports suggest the number of COVID-19 cases among children may vary by age and other factors. Adolescents aged 10-17 may be more likely to become infected with COVID-19 than children younger than age 10, but adolescents do not appear to be at higher risk of developing severe illness. For this reason, the Safe and Healthy Schools Task Force recommends in-person instruction, to the best extent possible, and especially for children PreK through 5th grade.”
- **Physical distancing: consider** 3-6 feet for PreK – grade 5
- **Health screenings** – new CDC guidance does NOT recommend for schools
 - ▣ **Task Force** recommends doing health screenings but considering symptom screening **at home** (with parent sign-off) and temp checks on bus/at school.

Reconvening *Safe and Healthy Schools Task Force*: Current Issues

- Guidance Revisions
 - ▣ Have solicited feedback on guidance to be added/revised/discussed
- More specific guidance needed:
 - ▣ Implementing health screening prior to boarding buses or entering schools, including recommendations on devices for taking temps, uniform protocols, etc.
- Clarification re: when to close
- Challenges with seating on buses
- Physical distancing (implementation “6 ft.”)
- Interns/Learners
- Children with special education needs (subgroup meeting on this topic)
- Social-emotional health of staff and students

Safe and Healthy Schools

Hot topic:

- Return to school after illness: working on an algorithm
 - ▣ Symptom-based return pathways
 - ▣ When to test
 - ▣ Medical clearance
- *We need your help to disseminate/explain guidelines and inform school & district-specific implementation in your communities!*

School Reopening

- Communities are moving forward – where is **yours** in this process?
- What are **your** thoughts/concerns to safely re-open?
- What are you hearing from families and what are communication gaps?
 - ▣ We are addressing topics raised on 7/20/20 call – thank you!
- **Volunteers needed** for PSAs and videos
- Continuing to seek cases for analysis and to inform guidance revisions.

Reminder: Special Pediatric Grand Rounds

- **Wednesday, July 29, 8 – 9 a.m.: Dr. Lee Beers, M.D., FAAP, President-elect, American Academy of Pediatrics**
