*Guidance is informed by expert opinion and may apply to individuals who participate in any physical activity, organized or not, including but not limited to organized sports and physical education class. Clinical judgment is strongly encouraged in support of a shared decision making process between health care provider and family. Evaluation may also be considered if COVID19 diagnosis was made within the past 3mos.
 **Symptom-free excludes loss of taste and smell, which may persist.

***ECG <12yrs may be considered in certain circumstances (eg. higher intensity sports) as determined by family/clinician.
