Subject: co2018 Musculoskeletal knowledge assessment

Dear Class of 2018,

I need your help to assess your musculoskeletal knowledge! In case you didn't know, musculoskeletal injuries are the second most common reason patients seek medical attention.

There is a multiple-choice exam on COMET (<https://comet.med.uvm.edu>) under "Assessment of Musculoskeletal Knowledge."

It should take about 10-15 minutes to complete.

**Password: msk2018**

This research will help you see where your knowledge lies, and will help us to refine the musculoskeletal curriculum at UVM to benefit future classes.

Thank you!  
Dr. McCarthy
