Department of Medicine
Annual Report 2012-2013

Chair’s Executive Summary

The Department of Medicine had another outstanding year with significant contributions in all areas of our mission: research, education, clinical care, and service.

The Department continues to be a nationally/internationally recognized leader in research with contributions to new scientific knowledge spanning from the bench to the bedside to the community. In aggregate, members of the department published more than 300 manuscripts, reviews, chapters and books, and were asked to serve on NIH study sections and advisory councils, FDA review panels and editorial boards. They are invited from around the world to present at scientific meetings and to be visiting professors, and they are elected to leadership in national societies.

Despite the challenges facing the NIH budget and other sources of research funding, the faculty continue to find creative ways to lead and succeed in their respective fields, and the rich spirit of collaboration continues to be this department’s greatest asset. Building on that asset, the department expanded two research funding programs and developed a third. The departmental bridge funding program is now more substantial and rigorous with aligned metrics to enhance investigators’ success. The Translational Award program designed to foster innovation and new collaborations was launched and the first grants were awarded to Drs. Anne Dixon and Oliver Dienz and Dr. Michael Toth. SPARK VT was the new research initiative started this year. The goal of this program is to translate novel ideas into therapies, diagnostics, and devices that will improve the health of our patients. With the help of an exceptional panel of community consultants, the first two awards went to Drs. Renee Stapleton and Benjamin Suratt, and to Dr. Markus Meyer. In recognition of their contributions, Dr. Beth Kirkpatrick received the Bailey K. Ashford Medal for distinguished work in Tropical Medicine, and Dr. Virginia Hood was the recipient of the Vermont Medical Society Distinguished Service Award 2012.

Education is a core mission for the department and this year the entire department contributed to the enhancement of medical student and resident education. Preparation for the LCME site visit gave us a unique opportunity to evaluate medical student education and several enhancements were made to our clerkships at FAHC and at our partner sites in Danbury, West Palm Beach and Eastern Maine. In addition, Dr. Jan Carney developed a Certificate in Public Health Program that will benefit not only our medical students but many others in health care. The residency program increased in size to 42 categorical residents, 9 preliminary residents and 3 chief residents; and with this increase successfully transitioned to a new model called 4+1 that separates outpatient and inpatient rotations and allows for novel educational initiatives including a High Value Cost Conscious Care Curriculum. The faculty continued to participate extensively in the VIC curriculum and again received a number of honors and awards for their contributions to education. Dr. William Hopkins received the Foundations Course Director for the seventh consecutive year and was named the Best Clinical Teacher of the Year by the Class of 2015.
The Cardiovascular, Respiratory & Renal Systems course, Directed by Dr. Hopkins and taught by many of our faculty won the award for Outstanding Foundations Course for the seventh time. In recognition of their contributions to resident education, Dr. David Kaminsky received the E.L. Amidon MD Award for Subspecialty Medicine and Dr. Richard Pinckney received the William Osler, MD Award for General Internal Medicine. This year’s recipient of the Department of Medicine Mentor Award was Dr. David Schneider.

This year the Department expanded its clinical practice and focused on providing high value cost conscious care modeled after the national program, Choosing Wisely. New clinical programs this year included the opening of a motility center and esophageal pH laboratory, expansion of the Oncology Rehabilitation program, telemedicine ICU Palliative care consultation, and expansion of ultrasound in Rheumatology. We also celebrated the 25th anniversary of the highly successful HIV Comprehensive Care Clinic Program directed by Dr. Christopher Grace. The PCIM faculty continued to be actively engaged in the transformation of primary care and working with Dr. Joel Schnure and colleagues in Endocrinology enacted the Diabetes Care Pathway to further the integration of PCIM and subspecialty medicine. The initial Choosing Wisely initiatives included a focus on testing in patients with chronic kidney disease, indications for colonoscopy and for rheumatologic testing. Results were presented both regionally and nationally and have already led to improvements in patient care and cost savings. Working with our partner institutions, Dr. David Schneider began to extend the quality assurance programs in cardiovascular disease across our network. These programs have helped the department lead the way for enhancing patient care in alignment with ongoing health care reform.

Administrative Team:

Physician Leader and Chair: Polly E. Parsons, MD
Vice Chairs:
  Medical Education: Mark Levine, MD
  Research: Charles Irvin, PhD
Director:
  Allen Mead
Assistant Director:
  Tammy Stockton, RN
Assistant Director:
  Susan Webber
Physician Executive Assistant:
  Laurie St.Gelais
Financial Administrator:
  Fiona Daigle
Grants Manager:
  Eric Gagnon
Financial Associate:
  Marlene Frank
Department Assistant:
  Katelyn Bolgioni

Department of Medicine, University of Vermont Divison Chiefs
R. Budd, MD, Immunobiology
E. Leib, MD, Rheumatology
N. Fukagawa, MD, Geriatrics (acting)
R. Galbraith, MD, Clinical Pharmacology (acting)
C. Grace, MD, Infectious Diseases
G. Goldman, MD, Dermatology
J. Leahy, MD and Joel Schnure, MD, Endocrinology, Metabolism, & Diabetes
B. Littenberg, MD, General Internal Medicine
A. Repp, MD, Primary Care Internal Medicine
C. Verschraegen, MD, Hematology/Oncology
A. Dixon, MD, Pulmonary and Critical Care Medicine
C. Schneider, MD, Cardiology Unit and Vascular Biology Unit
R. Solomon, MD, Nephrology
J. Vecchio, MD, Gastroenterology

- Total faculty: 175
  - By rank – Assistant Professors: 84
    Associate Professors: 43
    Professors: 44
    Research Associates: 4
  - By gender – 68 female; 107 male
  - By track – Tenured: 38
    Research Scholar Pathway: 14
    Tenure Pathway: 8
    Clinical Scholar Pathway: 112
    Education Scholar Pathway: 3

Faculty Actions:

FALL 2012 – 15 green sheet reappointments; 1 pink sheet reappointments;
10 promotions; 1 tenure

SPRING 2013 – 24 green sheet reappointments; 10 pink sheet
reappointments, (11) volunteer faculty reappointments

Promotions:

Anne Dixon, M.A., B.M., B.Ch. – Professor (tenured)
Eric Ganguly, MD – Associate Professor
David Kaminsky, MD - Professor (tenured)
Patricia King, MD - Associate Professor
Beth Kirkpatrick, MD – Professor (tenured)
Joel Schnure, MD – Professor
Doris Strader, MD – Professor
Jose Teixeira, PhD – Research Assistant Professor
Neil Zakai, MD – Associate Professor, with Tenure
AKA Tarikuz Zaman, PhD – Research Assistant Professor
Richard Zubarik, MD – Professor
Standing Committees:

**Operational Efficiency Committee**
- K. Schwarzenberger, MD, Chair
- S. Grunberg, MD
- F. Keating, MD

Medical Service
Patient Days: 48,230 (inpatients)
Ambulatory Care Visits: 221,351 (149,496 specialty and 71,855 primary care)

FAHC Practice Sites:
Ambulatory Care Center – Medicine has a presence in four Modules:
-Medicine: Infectious Disease (including Travel Medicine), Osteoporosis Center,
Rheumatology and Clinical Immunology, and Pulmonary (including PFTs), Lung Cancer
Multidisciplinary Clinic
-Dermatology including Mohs Surgery and Melanoma Multidisciplinary Clinic
-Cancer Center: Hematology/Oncology, Breast Care Center and Multidisciplinary Clinic,
and Head and Neck Cancer Multidisciplinary Clinic
-Surgery: Gastroenterology, Thrombosis Center [part of Hem/Onc and Vascular
Surgery], and Gastrointestinal Multidisciplinary Center

University Health Center
- Nephrology

Tilley Drive, South Burlington
- Cardiology and Cardiac Rehabilitation, Oncology Rehabilitation, Pulmonary Rehabilitation
- Endocrinology and Endocrine Clinical Research

FAHC Outreach Sites:
Bennington – Hematology/Oncology (Familial Cancer Program)
Brattleboro (BMH) – Infectious Disease
Morrisville (Copley Hospital) – Hem/Onc, Rheumatology
St. Albans (Northwestern Medical Center) –Nephrology and Cardiology
St. Johnsbury (Northeastern Medical Center) - Infectious Disease
Barre (Central Vermont) – Rheumatology, Nephrology
Rutland (Rutland Regional) – Nephrology, Cardiology, Infectious Disease
Middlebury (Porter) - Cardiology
Newport (Newport Memorial) – Nephrology
Malone (Alice Hyde) – Cardiology
Ticonderoga (Moses Luddington Hospital) – Dermatology, Cardiology
Saranac Lake (Adirondack Medical Center) – Cardiology, Hematology/Oncology
Canton- Potsdam – Cardiology
Massena (MMH) – Cardiology

Primary Care Sites:
Aesculapious (Timberlane, South Burlington)
Given Essex (Essex Junction)
Given Burlington (University Health Center)
Given Williston (Blair Park, Williston)

Medical Education

1. Leadership

Mark A Levine, M.D., F.A.C.P – Program Director

Mary Ramundo, M.D. – Associate Program Director

Mark Pasanen, M.D., F.A.C.P – Associate Program Director

Dorothy Shelc – Program Administrator

2. Summary of Program Highlights 2012-2013

A) Successful first year implementation of the newly redesigned residency schedule into the “4 +1” template leading to:
1) Separation of inpatient medicine and ambulatory medicine/continuity clinic, and elimination of the traditional tension residents have felt that was created by the need to leave the hospital to see patients in the clinic setting.
   2) Enhanced subspecialty medicine ambulatory learning opportunities.
   3) Dramatic improvement in resident ownership of their continuity clinic, patient continuity, and the educational opportunities that have developed in that setting.

B) Successful revitalization of the primary care track with enhanced educational opportunities during longitudinal and block rotations, improvement in practice management curriculum, development and improvement in delivery of comprehensive ambulatory medicine curriculum, and elective opportunities appropriate to that setting.

C) Increase in program size to 14 categorical residents per year plus 9 preliminary residents in the first year of training.

D) Increase from 2 to 3 Medicine Chief Residents with attendant expansion of clinical, teaching, quality, and research roles and opportunities effective 07-01-13.

E) Development of night float rotation on cardiology as of 07-01-13. This effectively eliminates overnight call in the entire program and will enable elimination of duty hour violations (as can no longer be subject to the 24 + 4 rule) and contribute to totally separate resident cardiology and MICU rotations.

F) Development of a redesigned inpatient ward medicine structure to improve allocation of admissions and keep weekend cross coverage responsibilities within teams – this eliminates the need for teams to cross cover patients they have no prior knowledge of and reduces the opportunity for transitions of care errors.

G) Transition to a developmental milestone based approach to evaluation.

H) Major resident-driven initiatives in the area of transition of care/sign-out.

I) Early involvement of residents in the Choosing Wisely initiative.

3. List of All Residents

   PGY-3
   Bartsch, Jason     George Washington University
   Borofsky, Jennifer  University of Vermont
   Burke, Michele     University of Vermont

Prabhu, William     SUNY - Upstate

4. Resident Awards

- The Harriet P. Dustan, M.D. Award
  Justin Stinnett-Donnelly, M.D.

- The Frank L. Babbott, M.D. Memorial Award
Patrick Hohl, D.O., M.P.H.

- E.L. Amidon, M.D. Award
  Outstanding Teacher of the Year
  Subspeciality Medicine
  David Kaminsky, M.D.

- William Osler, M.D. Award
  Outstanding Teacher of the Year
  General Internal Medicine
  Richard Pinckney, M.D.

- Richard E. Bouchard, M.D.
  Excellence in Primary Care Award
  Elizabeth Hill, M.D.

5. Resident presentations at local/national meetings and publications

Samreen Raza MD, Jasmol Jayaprakash Sardana, DO. When biopsy prevails and therapy fails – a fascinating case of Rheumatoid Meningitis (necrotizing granulomatous meningitis) while on TNF blocking therapy Abstract presentation at the ACP Meeting in San Francisco, CA April 2013.

Michele Burke, M.D. ADHD Quality Improvement Project in Resident Continuity Clinic Presented at the Annual Resident Research Day, May 24, 2013.

Aaron Helminski, M.D.  Effective Progress Notes in the Era of EMR--an Educational Project  Clinic  
Presented at the  Annual  Resident Research Day, May 24, 2013

Elizabeth Hill, M.D.  Non-Operative Management of Hip Fractures: Goals of Care and Patient Preference  
Currently in submission for the 2013 American Association of Hospice and Palliative Medicine Meeting.  
Presented at the  Annual  Resident Research Day, May 24, 2013

Patrick Hohl DO, Martin LeWinter MD Echocardiographic Measurements Predictive of LVEF Recovery  
in patients with Heart Failure with Reduced EF.  Presented at the  Annual  Resident Research Day, May 24, 2013

Jasmol Jayaprakash, DO, Annis Marney MD  
Pharmacokinetics and Adipocyte Clearance Receptor Expression of Brain Natriuretic Peptides in Obesity  
Presented at the  Annual  Resident Research Day, May 24, 2013

Sean R. McMahon, MD, Janusz Kikut, MD, Richard Pinckney, MD, MPH, Friederike K. Keating, MD.  
Feasibility of Stress Only Rubidium-82 PET Myocardial Perfusion Imaging  
Resident Research Day, May 24, 2013

David Meyer, M.D.  Survey of Vermont Mental Health Care in the Primary Care Sector  
Presented at the  Annual  Resident Research Day, May 24, 2013

Gabriela Meyer MD, Nicole Hynes MD  
Eosinophilic Granulomatosis with Polyangitis: Recognizing an Easily Overlooked Classic Presentation  
In the Primary Care Setting  Presented at the  Annual  Resident Research Day, May 24, 2013

6.  Graduating Residents – where are they going/ which fellowships

Jason Bartsch, M.D.  Chief Medical Resident / Applying for Hospitalist Position for 2014-2015
Jennifer Borofsky, M.D.  Hospitalist - FAHC
Michele Burke, M.D.  Applying for Hospitalist Job in Vermont
Aaron Helminski, M.D.  Hospitalist, Brattleboro Memorial Hospital, Brattleboro, VT
Elizabeth Hill, M.D.  Geriatric Fellowship, Yale University, New Haven, CT
Patrick Hohl, D.O.  Chief Medical Resident / Apply for Cardiology Fellowship for 2014-2015
Jasmol Jayaprakash-Sardana, D.O.  General Internal Medicine Practice in Baltimore, Maryland
Sean McMahon, M.D.  Chief Medical Resident – Applying for Cardiology Fellowship 2014-2015
David Meyer, M.D.  General Internal Medicine Practice in North Carolina.
Gabriela Meyer, M.D.  Geriatric Fellowship, Wake Forest, North Carolina
Justin Stinnett-Donnelly, M.D.  Hospitalist, Central Vermont Hospital
Preeth Sundaran, M.B.Ch.B.  Cardiology Fellow at FAHC

During 2013 the Cardiovascular Division took a lead role in clinical integration among members of Fletcher Allen Partners and throughout the region. Major initiatives have been to develop a region wide quality assurance program and to enhance data sharing by implementing a common EPACs system. In April we began region wide quality assurance conferences for noninvasive testing. Five institutions (Central Vermont Medical Center, Northwest Medical Center, Champlain Valley Physicians Hospital, Alice Hyde Medical Center, and Canton Potsdam Medical Center) join together monthly to review both echocardiography and stress test results. In the fall of 2013 we will begin combined quality assurance testing for invasive procedures. In early 2014, we are targeting deployment of the Merge EPACs system at Central Vermont Medical Center. This system will allow storage and reporting of stress and echocardiography tests. Images and results performed at either Fletcher Allen or Central Vermont will be available to providers at both locations.

During 2013, we updated our electrophysiology laboratory which allows for radiofrequency ablation of arrhythmias as well as one of our catheterization laboratories. These updates were necessary to continue to provide the best care to our patients. We continue a robust clinical and translational research program. A major research grant awarded to Dr. Spector has enabled him to develop software that is being used across the country for education of both nurses and physicians. In addition, he has developed a new approach to the mapping of atrial fibrillation. Several patent applications have been filed and new mapping technology is being developed based on his models. Our research continues to benefit patients. We are actively involved in a trial of new stents that are bioabsorbable. In total, the Cardiovascular Division published 82 manuscripts and chapters during the past year. On the education front, Dr. Hopkins continues a key role in the medical student curriculum. He was selected for the seventh consecutive year by the medical students of the College of Medicine as the recipient of the Course Director of the year. The course he directs, Cardiovascular, Respiratory, and Renal, has been selected again as best course. Dr. Hopkins was also once again the recipient of the best clinical teacher of the year. Dr. LeWinter was selected by the fellows in the Cardiovascular Training Program as the teacher of the year. Dr. Dauerman is the Chair of the Clinical Cardiology Council Programming of the American Heart Association National Scientific Meeting. Dr. Schneider was awarded the distinguished research mentor award by the Department of Medicine. On a sad note, Fletcher Allen and the University of Vermont lost a giant in cardiology in May of 2013 with the death of Burton E. Sobel.
Faculty

David Schneider, MD
Professor of Medicine
Director, Cardiovascular Division
Research and Clinical Interests
  • thrombosis
  • platelet biology
  • atherosclerosis/ischemic heart disease
  • preventive cardiology

Philip Ades, MD
Professor of Medicine
Director, Cardiac Rehabilitation
Research and Clinical Interests
  • cardiac Rehabilitation
  • preventive cardiology
  • ischemic heart disease

Mark Capeless, MD
Professor of Medicine
Director, Cardiovascular Disease Training Program
Director, Clinic Electrophysiology Training Program

Kevin Carey, MD
Assistant Professor of Medicine
Research and Clinical Interests
  • coronary intervention
  • cardiac catheterization
  • ischemic heart disease

Harold Dauerman, MD
Professor of Medicine
  • coronary intervention
  • cardiac catheterization
  • peripheral vascular intervention
  • ischemic heart disease
  • vascular biology

John Fitzgerald, MD
Assistant Professor of Medicine
Research and Clinical Interests
  • preventive cardiology
  • ischemic heart disease
  • valvular heart disease
Prospero Gogo, MD  
Associate Professor of Medicine  
Director, Cardiovascular Catheterization Laboratory  
Associate Director Interventional Cardiology Training Program  
Research and Clinical Interests  
- cardiac catheterization  
- percutaneous coronary intervention  
- percutaneous treatment of structural heart disease

William Hopkins, MD  
Associate Professor of Medicine  
Director, Pulmonary Hypertension and Adult Congenital Heart Disease Program  
Research and Clinical Interests  
- pulmonary hypertension  
- adult congenital heart disease  
- genetic heart disease  
- valvular heart disease  
- echocardiography

Friederike Keating, MD  
Associate Professor of Medicine  
Director, Nuclear Cardiology  
Director, Cardiac Care Unit  
Research and Clinical Interests  
- cardiovascular disease in women  
- cardiovascular imaging  
- thrombosis  
- platelet biology

Robert J. Kelm, Jr., PhD  
Associate Professor of Medicine  
Associate Professor of Biochemistry  
Research and Clinical Interests  
- Molecular biology of smooth muscle cell differentiation  
- Assembly and function of protein-nucleic acid complexes  
- Biochemistry of purine-rich element binding proteins  
- Mechanisms of dysfunctional cardiovascular remodeling

Martin M. LeWinter, MD  
Professor of Medicine  
Director, Heart Failure and Cardiomyopathy Program  
Research and Clinical Interests  
- cardiomyopathy  
- coronary heart disease  
- valvular heart disease
- heart failure
- pericardial disease

Robert Lobel, MD
Assistant Professor of Medicine
Research and Clinical Interests
- clinical cardiac electrophysiology
- catheter ablation
- pacemaker and ICD implantation

Daniel Lustgarten, MD
Professor of Medicine
- clinical cardiac electrophysiology
- catheter ablation
- pacemaker and ICD implantation

Markus Meyer, MD
Assistant Professor of Medicine
Research and Clinical Interests
- cardiac imaging and stress testing
- general cardiology
- heart failure and cardiomyopathy

Peter Spector, MD
Professor of Medicine
Director, Cardiac Electrophysiology
Research and Clinical Interests
- catheter ablation
- atrial fibrillation

Jeffrey Spees, PhD
Associate Professor of Medicine
Director, Stem Cell Core Facility
Research and Clinical Interests
- adult stem cell biology
- regenerative medicine

Edward Terrien, MD
Associate Professor of Medicine
Director, Ambulatory Cardiovascular Clinic
Research and Clinical Interests
- coronary intervention
- cardiac catheterization
- peripheral vascular intervention
- ischemic heart disease
Marc Tischler, MD
Associate Professor of Medicine
Director, Echocardiography Laboratory
- magnetic resonance imaging and echocardiography
- valvular heart disease
- ischemic heart disease
- congestive heart failure

Michael Toth, PhD
Associate Professor of Medicine
Research and Clinical Interests
- skeletal muscle physiology
- heart failure
- aging
- physical disability
- muscle disuse

Anthony Tramontano, MD
Assistant Professor of Medicine
Research and Clinical Interests
- ischemic heart disease
- heart failure and cardiomyopathy
- echocardiography
- cardiac magnetic resonance imaging

Peter Van Buren, MD
Associate Professor of Medicine
Associate Professor of Molecular Physiology and Biophysics
Associate Director Cardiovascular Training Program
Research and Clinical Interests
- specialist in heart failure
- echocardiography
- nuclear cardiology

Matthew Watkins, MD
Professor of Medicine
Director of Interventional Cardiology
Director of Interventional Cardiology Fellowship Training Program
Research and Clinical Interests
- interventional cardiology
- ischemic heart disease

Joseph Winget, MD
Associate Professor of Medicine
- clinical cardiac electrophysiology
- catheter ablation
- pacemaker and ICD implantation

Major Faculty Awards:

Friederike Keating, MD
• Associate Director Cardiovascular Training Program
• Selected as 2012 UVM COM faculty member to participate in the AAMC Mid-Career Women Faculty Professional Development Seminar

William Hopkins, MD
University of Vermont College of Medicine
• The Above and Beyond Award, 2013
• Foundations Course Director Award, 2013
• Outstanding Foundations Course Award, 2013

Martin LeWinter, MD
Cardiology Teaching Award, 2013

David J. Schneider, MD
Department of Medicine, Distinguished Research Mentor Award, 2013

Grants:

Philip Ades, MD
R01 AG 033547 (M Toth)  Muscle disuse and contractile dysfunction in the elderly NIA Co-Investigator 5%  $358,263  2010-2014
Major goal is to define the effects of chronic disuse on skeletal muscle contractile function in elderly individuals at the single muscle fiber level.
Period: 6/1/10 - 5/31/11  PI: 10% time
The goal of this award is to provide biometry support and salary support to finalize obesity-related manuscript preparation and to provide support for the preparation of a multi-center RO-1 application to the NHLBI.

Vermont Center for Behavior and Health. Principal Investigator Steven Higgins PhD. PI (P. Ades MD, Assoc. Director, Co P.I.: 20% time) P20GM103644-01A1
Agency: NIH: The National Institute of General Medical Sciences  2013-2018

The goal of this award is to establish a Center for Biomedical Research Excellence (COBRE) in Behavior and Health at the University of Vermont (UVM). The proposed center will investigate relationships between personal behaviors and risk for chronic disease and premature death.

Harold L. Dauerman, MD
COREVALVE---Transcatheter Aortic Valve Implantation versus Conventional Care for Critical Aortic Stenosis. Competitive grant—300 applicants and 40 U.S investigators chosen to participate. 2011-2013. Estimated Grant: Medtronic, 200,000 dollars.
SIMPLICITY HTN-3: A randomized trial of renal denervation versus maximal medical therapy for severe hypertension. 2012-2014. Estimated Grant: Medtronic, 100,000 dollars

Prospero B. Gogo, MD
Restricted Educational Grants (for fellow salaries/expenses only) from
Medtronic Vascular, 20,000 dollars
Boston Scientific, 20,000 dollars
St. Jude Medical, 20,000 dollars

Friederike Keating, MD
Local PI, Odyssey Outcome Trial (Sanofi EFC11570), with DCRI

Robert J. Kelm, Jr. PhD
Fearons Cancer Research Fund Award
Vermont Cancer Center
09/01/2012 – 08/31/2013
$30,000 total direct costs
Exploring the Role of Novel ssDNA-Interacting Targets, Purα and Purβ, in Hematologic Malignancies

Martin LeWinter, MD
PI, Vermont, New York and Quebec Regional Clinical Center of the NHLBI Heart Failure Research Network (NIH U10 HL110342)
PI, Advanced Glycated End-Products in Human Myocardium (NIH RO1 HL089944)
PI, Postdoctoral Cardiovascular Research Training Program (NIH T32 HL07647)

Markus Meyer, MD
SparkVT Competition Winner, 50,000 dollars

Medtronics, 60,000 dollars
07/01/13
Pacing-Mediated LV Remodeling for the Treatment of Heart Failure with Preserved Ejection Fraction

David J. Schneider, MD
The Medicines Company $251,436
01/01/13
A study of the transition from IV cangrelor to oral ticagrelor, and ticagrelor to cangrelor, in patients with coronary artery disease

AstraZeneca $154,880 05/01/13
Ticagrelor and Clopidogrel in CABG Patients

The Medicines Company $198,181 06/01/13
A study of the transition from IV cangrelor to oral prasugrel, and prasugrel to cangrelor, in patients with coronary artery disease

Jeffrey L. Spees, Ph.D.

R01 NS073815 NIH/NINDS/NIGMS (Spees) 1/1/2013-12/31/2016
Control of reactive astrocytes by Notch1 and Amyloid Precursor Protein.
$219,000 direct funding per year

R01 HL085210-02 NIH/NHLBI (Spees) 4.80 calendar 1/1/2008–12/31/2013
“Factors Responsible for Cardiac Preservation Conferred by Adult Marrow Stem Cells”
$225,000 direct funding per year (currently no-cost extension)

Neuroscience COBRE pilot grant (UVM) 7/1/2012- 6/30/2013

Patent: Cell-Kro (C-terminal domain 4 of CTGF and Insulin); provisional application submitted.

Michael J. Toth, Ph.D.
NIH R01 AR-033547 Muscle disuse and contractile dysfunction in the elderly
Dept of Medicine Translational Science Award - Skeletal muscle dysfunction in the elderly with acute muscle disuse
Peter Van Buren, MD

P01 HL059408-11 (Warshaw) February 1, 2010- January 31, 2015
NIH/NHLBI
Cardiac Myosin Binding Protein-C: Structure, Function and Regulation.
Project 2 Warshaw (PI) cMyBP-C: Molecular Mechanisms of Actomyosin Modulation.
This project focuses on the molecular mechanics of cMyBP-C as it modulates power generation by the cardiac actomyosin motor.
Role: Co-Investigator

UO1 HL 084899 LeWinter (PI) July 1,2007-June 30, 2013
NIH/NHLBI
New England, New York and Quebec Regional Clinical Center of the National Heart Failure Research Network.

The major goals of this grant is to nationally coordinate clinical heart failure trials through the NIH Heart Failure Network.

Role: Co-Investigator

Matthew W. Watkins, MD

“Ad5.AC6 Gene Transfer for CHF” NIH protocol 13761, FAHC PI Matthew Watkins

Use of intracoronary AC6 gene therapy to improve symptomatic heart failure

Division of Clinical Pharmacology
Richard Galbraith, MD, PhD, Acting Director
http://www.med.uvm.edu/medicine/pharmacology

The Clinical Pharmacology Division comprises faculty members who are primarily interested in various research agendas within the general field of Clinical Pharmacology. Areas of interest include muscle atrophy, oxidative stress, appetite regulation, nutrition, and amino acid metabolism.

Dr. Galbraith’s long-term interests concern the clinical management and research issues relevant to the porphyrias. He also has worked extensively in the clinical pharmacology of metal-substituted porphyrins in the treatment of jaundice, porphyria and obesity.

Dr. Dwight Matthews leads a group of researchers who have used stable isotopically labeled tracers and kinetic models to answer questions of human physiology and biochemistry. The research program of his group in chemistry focuses on developing new methods and techniques of mass spectrometry to measure stable isotopes in biological molecules and mathematical and computer models to interpret the stable isotope tracer kinetic data obtained from biological samples.

**Galbraith:**

**Matthews:**

Dermatology at Fletcher Allen Health Care is a division of Medicine with four general medical dermatologists, four surgical dermatologists, and four experienced physician assistants. We provide general dermatology care to the community as well as highly-specialized consultation with particular strengths in the treatment of psoriasis, cutaneous lupus, dermatomyositis, cutaneous lymphoma, and all forms of skin cancer including melanoma. We also provide cosmetic services for lasers and fillers in an ever growing area of dermatology.

Our new wing on EP-3 is up and running smoothly. For 2013-2014 we have hired Col. Joseph Pierson, an experienced academic military dermatologist who will begin as an Assistant Professor and will practice general dermatology. In addition, our current Chief Resident has signed on to be an Assistant Professor seeing general dermatology patients with a focus on women’s dermatology. This year we will have approximately 25,712 patient visits producing about 58,085 wRVU.

This year Dr. Kathryn Schwarzenberger left mid-year to take a position as the Chief of Dermatology at the University of Tennessee, Memphis. This was a setback for the division and resulted in a greatly-increased workload for a number of our faculty. Despite her leaving, we have managed to see the same volume of patients, and the residency has moved forward without a hitch. Dr. Goldman reassumed the position of residency director on an interim basis. Dr. Joseph Pierson, our new hire, has agreed to take over as residency director, and he will be an excellent successor in this position.

In 2013 enlarged the scope of our Community Health Center Free Clinic. Each month an attending physician supervises the residents and Physician Assistants in the provision of free care to patients at the Community Health Center in Burlington. This provides a service to the community and is also a superior experience for our residents and fellow, who are able to participate in the care of an underserved population.

We held two UVM / FAHC continuing medical education conferences this year. First we held Advanced Dermatology for the Primary Care Provider. This conference was attended by over 80 primary care providers from around the country. Later in the season we held the 24th annual Winter Dermatology Conference in Stowe, VT. This coming year will be the 25th Anniversary of this Conference.

Dr. Glenn Goldman continues to hold numerous national leadership positions. He just completed a 5 year rotation on the Fellowship Training Committee of the American College of Mohs Surgery. He is also the ACMS advisor to the American Medical Association Resource Based Relative Value Utilization Committee. His book, Facial Flap Surgery, has sold over 1000 copies and was the leading sales book at the Annual Meeting of the American College of Mohs Surgery. He has been tasked with the writing of another book on Dermatologic Surgery to be
published in 2015. Dr. Holmes is writing the chapter or random pattern flaps for the most widely-read text of dermatologic surgery.

Dr. Holmes and Dr. Goldman have become involved in volunteer international work for dermatologic surgery through the American Society for Dermatologic Surgery. Working with a mentor from the ASDS, they have developed and are formalizing an international listserv for reconstructive advice in dermatologic surgery. In addition, Dr. Goldman participated in a volunteer surgery trip to Romania with the Blade and Light Surgery group, performing Mohs surgery and reconstruction on extensive tumors.

Several of our attending physicians are regular participants in Fletcher Allen administrative processes. Dr. Goldman and Dr. Holmes serve on a number of FAHC committees. Dr. Julie Lin continues her involvement in PRISM, where she is the PRISM representative from the Department of Medicine. She is also developing a teledermatology pilot program for store and forward dermatology consultation. If this goes well, we will institute a full-scale permanent teledermatology consultation service for patients and providers who live at a substantial distance from the medical center.

Our residency and procedural dermatology fellowship continue to be successful and rewarding. We received a four-year accreditation for the Procedural Dermatology Fellowship. Starting this year we will have a total of six residents, or two per PGY year. Our residents and fellows have an excellent employment track record. Six of our graduates are in private practice in general dermatology. Three have gone on to complete fellowships in procedural dermatology. Two of our residents have chosen academic medicine for their careers. Dr. Todd Holmes remains on faculty at Fletcher Allen Health Care, and Dr. Melissa Pugliano-Mauro has started a new Mohs surgery unit in conjunction with the University of Pittsburgh. We frequently host residents from other institutions for rotations in subspecialty areas of dermatology, especially in surgery, in which Dr. Goldman is a preceptor for the American Society of Dermatologic Surgery.

This year the dermatologic surgery fellow is once again engaged in an exciting study of rotation flap and transposition flap design variations. These porcine experiments will provide valuable data for the clinical practice of dermatologic surgery, and will confirm or contradict accepted flap design dogmas which have been espoused, but never proven in clinical practice. This work is being supported by a private donation to the residents and medical students.

On average we receive over 250 applications for our residency spots annually, and approximately 40 applications are received for our single procedural dermatology fellowship slot. Residents and fellows present regularly at our local and regional meetings, and the senior residents and fellows are currently involved in a number of publications.

Each month we host several third or fourth year students for rotations in dermatology. On average one or two University of Vermont medical students per year choose to enter the field of dermatology. Due to the tremendously-competitive nature of dermatology as a specialty, each student requires careful guidance and assistance in procuring a residency. As usual, this year, our students got the dermatology residencies of their choices. Naira Barbosa, MD was graduated and
will matriculate in dermatology residency at the Mayo Clinic. Bill Damsky, MD, was graduated and will matriculate in dermatology at Yale, where he will be able to pursue his excellence in basic science research.

Physician Assistants:

Deb Roseman, PA
Deb has been with us for over ten years. She has decades of experience as a dermatology physician assistant and has a following of thousands of patients for whom she provides care.

Anne Klein, PA

Anne is a surgical PA, and works with the dermatologic surgeons daily. She trained for years with a plastic surgeon and has exceptional procedural skills. A testament to her skill is that physicians refer patients to her regularly for surgical excisions.

Rich Callahan, PA

A newer member to our staff, Rich is experienced in dermatology and provides both medical and minor surgical dermatology care. He brings with him many patients from his former practice.

Christine Sowle, PA

Christine trained with us and stayed on as a dermatology PA. She has been working with us for almost ten years and has a large following of thousands of patients who see her on a regular basis.

Study Sections and Federal Advisory Boards:

American Medical Association  
Dr. Goldman – RUC representative for the American College of Mohs Surgery

Dermatology Foundation  
Dr. Goldman – Leader’s Society State / Regional Chair

American College of Mohs Surgery  
Dr. Goldman – Fellowship Training Committee

Publications – Books, Peer reviewed, chapters.

Lichon VC, Goldman GD. Surgical treatment of larger skin cancers. Fac Plast Surg 2013; IN PRINT
The Division of Endocrinology, Diabetes and Metabolism has 5 physicians, 3 nurse practitioners, 3 certified diabetes educators (CDEs).

The Division performs consultative and ongoing endocrine care for Vermonters and upstate New Yorkers. The largest portion of our clinical enterprise is delivering diabetes care to both in-patients and out-patients. Our mission is to combine cutting edge research in basic metabolism and cell biology and physiology while establishing an exemplary center for clinically excellent patient care. Our goal is to strive to deliver seamless system-wide diabetes care.

In this regard, we have recently developed a clinical pathway, in conjunction with PCIM and Family Medicine, for use in the nine Medical Home sites at FAHC. These pathways are incorporated into a model for the integration of specialty and primary care for chronic diseases, diabetes being the initial focus. These roadmaps will allow for state of the art diabetes management to reach more patients with diabetes at FAHC and eventually in the State of Vermont and in our general catchment area. The hallmarks of this effort are to facilitate seamless care between specialty and primary care and to allow all the patients to have complete diabetes education. In addition we have developed algorithms for intensive in-patient diabetes management. We also provide more intensified regimens for the growing cohort of individuals on insulin infusion pumps. Our diabetes care team offers classes to individuals, families and groups to assist in achieving targeted glycemic control for all patients with diabetes. In cooperation with, and imbedded in the Community Health Teams, our Certified Diabetes Educators are able to reach many more individuals who are cared for within the FAHC system.

The Vermont Regional Diabetes Center is an American Diabetes Association accredited diabetes education program.

Four of our attending participate in thyroid ultrasonography and have developed a thyroid fine needle aspiration (FNA) biopsy clinic. Together with the cytopathology faculty and trainees, this service has had overwhelming success in the early diagnosis and treatment of thyroid cancer.

Other areas of clinical interest include metabolic bone disease and osteoporosis, hypogonadism, as well as pituitary and adrenal disease. Overall, the clinic is flourishing in our new Tilley Drive setting with 14,000 visits per year – fourth in the Department of Medicine. We are currently recruiting a new faculty member to augment our clinical and research capabilities.
The Division’s research efforts have focused on beta cell function, intracellular metabolism and life cycle. Dr Leahy’s work in this area is world renown. We are also involved in clinical research and clinical trials involving incretin biology, new product development, hypertension, obesity, insulin resistance and cardiovascular outcomes.

Our education mission continues to expand. There are two Fellows in Endocrinology. We have had approximately 30 students rotating through the service and the number of residents electing endocrinology is on the increase.

**Faculty**

**John (Jack) Leahy, MD**  
Professor of Medicine  
Co-Director, Endocrinology, Diabetes and Metabolism Division  
- Diabetes mellitus  
- Islet beta-cell physiology and dysfunction

**Joel Schnure, MD**  
Professor of Medicine  
Co-Director, Endocrinology, Diabetes and Metabolism Division  
Member, DOM Operations and Efficiency Committee  
Lead, Diabetes Chronic Care Initiative  
Lead, Task Force on In-Patient Diabetes Education  
Member, In-Patient Diabetes Initiative  
- Diabetes care, type 1 & 2  
- Diabetes in pregnancy  
- Thyroid disease  
- Pituitary disease

**Matthew P Gilbert, DO, MPH**  
Assistant Professor of Medicine  
- Diabetes mellitus  
- Thyroid disorders  
- Thyroid cancer  
- Male hypogonadism

**Dhananjay (Jay) Gupta, PhD**  
Research Assistant Professor  
- Pathogenesis of type 2 diabetes and islet biology  
- Epigenetic regulation of adaptive islet beta cell response with changing metabolic milieu

**Thomas Jetton, PhD**  
Associate Professor of Medicine  
- Regulation of glucose homeostasis  
- β-cell biology
Nutrient and neural regulation of β-cell growth

**Annis Marney, MD, MSCI**  
Assistant Professor of Medicine  
Director, Endocrinology Fellowship Program  
Director, Medical Student and Residency Endocrine Elective  
Chair, Resident Research and Scholarly Activity Committee  
Patient Care and Operations Committee  
Clinical Research Center Scientific Advisory Committee  
  - General endocrinology

**Muriel Nathan, MD, PhD**  
Professor of Medicine  
  - Diabetes, including use of insulin pumps  
  - Thyroid cancer, nodules and disorders  
  - Pituitary tumors and dysfunction  
  - Adrenal disorders  
  - Inpatient improvement projects funded by the James M. Jeffords Institute for Quality ~ SQ and IV insulin forms, insulin pump, DKA

**Fellows**

Yew-Xin Teh, MD (F5; completed her fellowship 6/30/2013)  
Madiha Alvi, MD (F4; started July 1, 2012)

**Nurse Practitioners and Certified Diabetes Educators**

Margaret Costello, FNP, MS  
Maureen Dwyer, ANP, ACNP, GNP  
Ann Gotham, ANP, MSN, ScM  
Kristen Bolton, MS, RD, CDE  
Rhonda Lapidow, RN, CDE  
Linda Tilton, MS, RD, CDE

**Graduate Students, Post-doctoral Fellows, MD PhD Students**

William Tharp (MD, PhD Student)

**Endowed Professorships**

**Leadership in Professional Societies**

Publications

The Gastroenterology and Hepatology Unit at the University of Vermont College of Medicine/FAHC has eight full-time Faculty members, three GI Fellows and two Ph.D.’s. Clinical care, teaching, and both basic science and clinical research are all major elements of the GI Unit.

Cutting edge clinical care and state of the art endoscopy are just two components of the Faculty’s responsibility. A newly constructed modern 8-room Endoscopy Center is equipped with the latest HD endoscopes, to allow the performance of over 12,000 procedures per year. All aspects of diagnostic and therapeutic GI endoscopy are performed. Advanced procedures including EUS (endoscopic ultrasound) with onsite cytopathology, and all modes of ERCP (endoscopic retrograde cholangiopancreatography) with cholangioscopy and laser lithotripsy with portable fluoroscopy are performed. A new motility center and esophageal pH laboratory is now open. A dedicated nursing staff and ancillary personnel of the Endoscopy Center ensure a seamless flow of patients each day.

In the Rowell Building of the University of Vermont there is a Simulation Center. At the Simulation Center, GI Fellows may practice their skills in endoscopy on newly designed and highly sophisticated computerized models of the GI tract.

A daily clinical office setting is shared with General Surgery in the Digestive Disease Center located on the 5th floor of the new Ambulatory Care Center. There is a very close working relationship with the Colorectal Surgery and General Surgery divisions. There are dedicated liver clinics, and each aspect of luminal gastroenterology is represented in the various clinics. All this is accomplished with an integrated out-patient and in-patient electronic medical record.

All members of the GI Unit are actively involved in a variety of aspects of teaching. The members of the GI Faculty have very active roles in lectures in the Vermont Integrated Curriculum of the UVM College of Medicine. UVM medical students are team members on the consult service and in the clinical office setting. The members of the GI Faculty are responsible for the vast majority of the teaching in the GI Fellowship Program. Members of the GI Faculty give lectures to both medical and surgical residents, preside at Residents’ Morning Report and are part of the integrated Teaching Attending Service at FAHC. A weekly clinical GI Conference is held and led by GI Faculty and guest speakers from other divisions. Two Journal Clubs occur each month where an in-depth analysis and review of recent published articles is accomplished. A monthly Quality Care Review Committee Meeting enables a constant improvement of clinical care and endoscopic practices. And finally, a monthly GI Research Meeting of all the GI Faculty and Fellows meets to review present and future research endeavors.

Each Faculty member and each GI Fellow is actively engaged in an academic research pursuit. Research projects to date span the field of gastroenterology and hepatology from eosinophilic esophagitis, to new therapy for Barrett’s esophagus with radiofrequency ablation (RFA), to all
aspects of chronic liver disease, new therapies for hepatitis C, new medications for inflammatory bowel disease (IBD) and irritable bowel syndrome (IBS), and exploring methods for early detection of pancreatic cancer.

The Gastroenterology and Hepatology Unit at the University of Vermont fosters a close cooperation, collaboration and interaction with other research departments throughout UVM which allows a unique opportunity to explore translational research as it pertains to future aspects of clinical care.

James Vecchio, MD
Professor of Medicine
Director, Gastroenterology and Hepatology Division
- GERD
- Celiac Disease
- Inflammatory Bowel Diseases – Crohn’s and Ulcerative Colitis
- Therapeutic Endoscopy

Nicholas Ferrentino, MD
Associate Professor of Medicine
Director, GI Fellowship Program
- Chronic Viral Hepatitis
- Management of Cirrhosis

GI Fellow

John Randles, MD
GI Fellow

Neeraj Sardana, MD
GI Fellow

Graduate Students, Post-doctoral Fellows, MD PhD Students:
- Benoit St-Pierre, MD (Post Doc)
- Laura Cersosimo (Ph.D Student)
- Sue Ishaq (Ph.D. Student)
- Jane Roberts (MD/Ph.D Student)
- Alejandro Salgado (Ph.D Student)
- Stephanie Sophn (Ph.D Student)

Leadership in Professional Studies:
Steven Lidofsky, MD, Ph.D.
- Co-Chair Joint Research Awards Committee, American Association for the Study of Liver Diseases and American Liver Foundation

Gary Mawe, Ph.D.
- Organizing Committee, International Foundation for Functional Gastrointestinal Disorders Planning Committee - 9th International Symposium to be held in Milwaukee, WI in April, 2013
- Fundamentals of Neurogastroenterology - Basic Science Committee, The Rome Foundation, 2012-2014. The purpose of this committee is to develop a summary of the research and literature to date related to functional gastrointestinal disorders, and then offer guidelines or recommendations to help advance future research.
- Scientific Advisory Board, The International Foundation for Functional Gastrointestinal Disorders, 2008 – present
- Chair, Research Committee, American Neurogastroenterology and Motility Society, 2012-present
- Councilor, American Neurogastroenterology and Motility Society, 2006-present

Peter Moses, MD
- Nominated for Governor of The American College of Gastroenterology
- Elected member of the University of VT Professional Standards Committee, 2012-2013
- Member of the Green Mountain Care Board Technical Advisory Group

**Editorships and Editorial Boards:**

*Steven Lidofsky, MD, Ph.D.*
- Editorial Board, Clinical Therapeutics
- Ad hoc Grants Reviewer for: Burroughs Wellcome Foundation, Medical Research Council of Canada, Natural Sciences and Engineering Research Council of Canada

*Gary Mawe, Ph.D.*
- Reviewing Editor: Journal of Physiology, 2012 - present
- Reviews Editor: Neurogastroenterology and Motility, 2012 - present
- Guest Associate Editor: Gastroenterology, 2012
- Editorial Board: American Journal of Physiology: Gastrointestinal and Liver Physiology, 1999-present
- Editorial Board: Frontiers in Autonomic Neuroscience, 2010-present
- Editorial Board: Frontiers in Gastrointestinal Sciences, 2011-present
- Editorial Board: Journal of Visualized Experiments, (JoVE), 2011-present

*Peter Moses, MD*
- Editorial Board Member, The Journal of Clinical Gastroenterology (Yale)
- Editorial Board Member, The World Journal of Gastroenterology (China)
- Reviewer, The American Journal of Gastroenterology
- Reviewer, Gastroenterology
- Reviewer, Alimentary Pharmacology
- Reviewer, Neurogastroenterology and Motility
- UVM Professional Standards Committee

- Editor, Zootaxa (Protozoa)
- Associate Editor, Current Microbiology
- Editorial Board Member, Microbial Ecology
- Editorial Board Member, Journal of Camelid Science
- Editorial Board Member, Journal of Eukaryotic Microbiology
Study Sections and Federal Advisory Boards:

Gary Mawe, Ph.D.
- Member of the Clinical, Integrative, and Molecular Gastroenterology Study Section, Center for Scientific Review, NIH, 2013 - 2017.
- COBRE III Review Panel, National Institute of General Medical Sciences (NIGMS), NIH, October, 2012.

Peter Moses, MD
- Grant Reviewer, Study Section of the NIH at the National Institute of Biomedical Imaging and Bioengineering (NIBIB)

Doris Strader, MD
- FDA Advisory Committee for Anti-Viral Drugs
- Director of Data Safety Monitoring Board for NIH Hepatitis B Research Network

André-Denis Wright, Ph.D.
- USDA
- NSF

Major Faculty Awards:

Gary Mawe, Ph.D.
Senior Investigator – Basic Science Award, International Foundation for Functional Gastrointestinal Disorders, 2013

André-Denis Wright, Ph.D.
Nominated, Graduate Advisor of the Year, by the Graduate Student Senate, UVM, 2013

Grants – list all active by faculty member, PI

Eric Ganguly, MD
- A Multicenter National Prospective Study of Pregnancy and Neonatal Outcomes in Women with Inflammatory Bowel Disease
- HALO Patient Registry: Ablation of Barrett’s Esophagus

Allen Lee, MD
- A Pilot Study on the Efficacy and Safety of Olanzapine in Improving Symptoms and Gastric Motility in Gastroparesis

Steven Lidofsky, MD, Ph.D.
- Non-interventional, prospective, cohort study of the effectiveness, safety, and utilization of two approved pegylated interferon-based direct acting triple therapies in the management of genotype 1 hepatitis C in routine clinical practice in the USA (PegBase).
- A randomized, double-blind, controlled Study to evaluate the efficacy and safety of the combination of ABT-450/Ritonavir/ABT-267 (ABT-450/r/ABT-267) and ABT-333 with
and without ribavirin (RBV) in treatment-naïve adults with genotype 1b chronic hepatitis C virus (HCV) infection (PEARL-III)

Gary Mawe, Ph.D.
- Neuronal excitability and motility in colitis (G. Mawe, Principal Investigator). NIH RO1 Grant Award (DK 62267); 7/15/02-3/31/2017. 40% effort. The goal of this project is to determine what changes occur in colonic neural circuitry in an animal model of colitis.

Peter Moses, MD
- A Phase II Randomized, Placebo-Controlled, Double-Blind, Dose Ranging Study to Assess the Immunogenicity and Safety of a *Clostridium Difficile* Toxoid Vaccine (ACAM-CDIFF™) in Subjects with *Clostridium Difficile* Infection (CDI)
- Furiex Mu-Delta Agonist for the treatment of IBS with diarrhea

Doris Strader, MD
- Treatment of Eosinophilic Esophagitis with High-Dose Proton Pump Inhibition and Swallowed Fluticasone

James Vecchio, MD
- Prospective, Multicenter, Randomized, Double-Blind, Placebo-Controlled Trial Comparing REMICADE® (infliximab) and Placebo in the Prevention of Recurrence in Crohn’s Disease Patients Undergoing Surgical Resection Who Are at an Increased Risk of Recurrence (PREVENT)
- SECURE / A Non-Interventional Long-term Post-Marketing Registry of Patients Treated with Certolizumab Pegol (Cimzia®) for Crohn’s Disease

André-Denis Wright, Ph.D.
- Vermont Dairy Center of Excellence. Microbial community gene expression in dairy cow waste anaerobic digesters.
- Central Vermont Public Service (CVPS) Cow Power
- Lintilhac Foundation
- USDA Hatch. Examination of the methanogen microbiome in five breeds of lactating dairy cows.

Richard Zubarik, MD
- Can Endoscopic Ultrasound (EUS) Stigmata of Chronic Pancreatitis Predict the Response to Pancreatic Enzymes
- International Registry for Intraductal Papillary Mucinous Neoplasms
- Prospective Study of Bacteremia and the Infection Rates Following Cholangioscopy with the Spyglass Cholangioscope
Publications – peer reviewed, chapters, etc. (not abstracts)

Barkun, Alan N. MD, Adam, Viviane MSc, Martel, Myriam, BSc, Moses, Peter L. MD
Partially covered self-expandable metal stent versus Polyethylene stent for malignant biliary obstructions: A cost-effectiveness analysis. Accepted for publication: Gastrointestinal Endoscopy- July 2013 5-Year Impact Factor: 5.276

The division consists of eight faculty, one staff, seven PhD students and seven Masters students in the Clinical and Translational Science Program. Four physician faculty members practice in the Fletcher Allen Primary Care Internal Medicine Group, and one serves as the Medical Director for BlueCross and BlueShield of Vermont. The division is the home of the education programs of the Center for Clinical and Translational Science and includes the Director, two Associate Directors and many of the core faculty from the PhD, Masters, and graduate certificate programs in CTS. Our faculty also contains the Associate Dean for Primary Care and the Associate Director of Ambulatory Education for the Internal Medicine Residency.

The research activities of the division include: investigations into the role of information systems in improving quality of care, patient safety in the use of pharmaceuticals in the outpatient setting, the role of compassion in the medical encounter, the epidemiology of narcotic abuse and the management of chronic pain, the use of the medical record to develop new insights in pathophysiology and epidemiology, and the role of the built environment in determining health, including obesity and incidents of cancer. The division’s research is funded by grants from NIH, the State of Vermont, AHRQ, and the US Health Resources and Services Administration.

**Benjamin Littenberg, MD**

Grants
A Curriculum for Clinical Research Training in Vermont
2K30 RR022260 (Benjamin Littenberg) 6/1/05 - 5/30/13
Program Director
National Center for Research Resources (NCRR) $873,762 total
This grant supports developing a curriculum in clinical research at the University of Vermont to effectively and efficiently transform clinicians and other young academics into successful independent clinical investigators.

Leveraging the EHR to Collect and Analyze Social, Behavioral & Familial Factors
NIH/NLM R01 LM011364 07/01/2012 – 06/30/2016
Principal Investigator: Elizabeth Chen (25% effort); Co-PI: Genevieve Melton (University of Minnesota)
The overall goal of this project is to develop and evaluate computational methods for generating knowledge regarding the relationships between diseases and social, behavioral, and familial factors from EHR data. Collaborative effort between the University of Vermont and University of Minnesota.

Medication Management Pilot Study
Vermont Department of Health 1/1/12-12/31/13 $489,027
Principal Investigator: Amanda Kennedy
This grant will support the UVM Office of Primary Care to conduct a population-based medication management pilot study in collaboration with selected primary care practices and pharmacists over a two year period. The broad goal of this pilot study is to improve care for Vermonters, specifically around optimizing medication regimens in primary care settings. To support this goal, the pilot will describe and evaluate varying models for pharmacist collaboration with primary care practices. Health information technology, including population-based mediation reports from primary care practices’ electronic health records, will serve as a tool for the pharmacist collaborations, where available. This pilot study will be collaborative between pharmacists and primary care practices and supported by a broad foundation of stakeholders, utilizing the expertise and opinions of the Vermont Blueprint for Health and Vermont Academic Detailing Program Advisors.

Narcotics Quality Improvement Project
Vermont Department of Health 1/1/12-12/31/12 $104,593
Principal Investigator: Charles Maclean Co-Investigator: Amanda Kennedy
This Grant will support the UVM Office of Primary Care to develop an approach for improving the process of narcotic prescribing in Vermont primary care practices. A quality improvement approach will be utilized to implement a prescribing system in the participating primary care offices with the collaboration of the Agency for Drug Abuse Programs of the Vermont Department of Health and the Vermont Prescription Monitoring System. The goal is to provide an office systems framework for best practice narcotic prescribing.

The Vermont Academic Detailing Program
Vermont Department of Health 7/1/12- 6/30/13 $200,000
Principal Investigator: Amanda Kennedy Co-I: Charles Maclean 5%, donated
Co-Investigator: Charles Maclean 5%, donated
This program develops and delivers Academic Detailing to providers and practices in Vermont.

A Compassion Training Program for Clinicians
Frymoyer Scholarship 09/01/09 – 08/31/12
Principal investigator: Richard Pinckney

Narcotic Quality Improvement
Charles Maclean 5%, donated (PI) 1/1/12-12/31/12 $200,000
This program delivers QI support to primary care practices in Vermont.

Automated Alcohol Screening and Brief Intervention in Primary Care using IVR
NIAAA 1R01AA018658-01A1 (Rose) Charles Maclean 10 % (Co-I)
National Institute of Alcohol 7/1/10-6/30/15 $606,918 annual
This grant is a randomized controlled trial of alcohol screening and brief intervention (SBI) administered using a telephone-based Interactive Voice Response (IVR) system.

The Vermont Student/Resident Experiences and Rotations in Community Health Program (Vermont SEARCH).
HHSH 2502009000510 (MacLean) 10% (PI) 10/1/09-8/31/12
Health Resources and Services Administration $730,316
This program develops and promotes primary care experiences in federally qualified health centers.

Model State Supported Area Health Education Centers
U77 HP03624 (MacLean) 10% (PI) 9/1/12-8/31/17
Health Resources and Services Administration $1,435,616 total
The Vermont AHEC Program is a statewide network of community and academic partners working together through three AHEC centers and a Program Office to improve the health of Vermonters. Through community-based initiatives, Vermont AHEC works to promote rural health educational opportunities and address health care workforce challenges unique to specific areas of the state.

Publications
Division of Gerontology
Naomi K. Fukagawa, MD PhD
Acting Director, Gerontology
http://www.med.uvm.edu/medicine/gerontology

Faculty

Naomi K. Fukagawa, MD PhD
Professor of Medicine
Acting Director, Gerontology
- Health Effects of Diesel and Biodiesel Exhaust
- Protein/Amino Acid and Energy Metabolism
- Oxidative Stress in Aging and Disease

Muyao Li, PhD
Research Associate
- Human genetic diseases
- Gene structure, Function and Mutation, Gene Expression Profile
- Basic cell and molecular mechanisms in human diseases associated with advanced age and obesity

Leadership in Professional Societies:
American Society for Clinical Investigation Institutional Representative
American Society for Nutrition Subcommittee on Nutrition Education in Professional Schools

Editorships and Editorial Boards: Associate Editor, The American Journal of Clinical Nutrition; Editor-in-Chief, Nutrition Reviews; Editorial Board, Journal of Nutritional Biochemistry

Study Sections and Federal/International Advisory Boards:
Homing Plus Programme Fundacja na rzecz Nouki Polskiej (Poland Research Foundation)
Member and Chair, External Advisory Committee, Division of Nutritional Sciences, College of Agricultural, Consumer and Environmental Sciences, University of Illinois, Champaign-Urbana, IL

Vice Chair, UVM Transdisciplinary Research Initiative Food Systems Steering Committee

**Major Faculty Awards:**
Vermont Academy of Science and Engineering Fellow, Center for Rural Studies/Food Systems Research Collaborative, University of Vermont

**Grants – list all active by faculty member, PI**

**ACTIVE**

UVM Center on Aging Armin Grams Research Award (Fukagawa and Kolodinksy)
Community-Based Nutrition Intervention in Affordable Housing for Elders
3/1/2013-2/28/2015 $50,000
The goal is to determine whether nutrition education improves fruit/vegetable intake and stabilizes frailty scores.

1 RC1 ES018053-01 (Fukagawa) 12/1/2009 – 7/31/2013
NIH/AARA/NIEHS $330,256
3.6 calendar months
Mechanisms for Cardiovascular Effects of Air Pollutants: Effect of Age and Sex
The goal is to determine the mechanisms responsible for the effects of petrodiesel and biodiesel exhaust emissions on cardiovascular disease.

Ajinomoto Amino Acids Research Program (Fukagawa) 10/01/2009– 12/31/2013
0.6 calendar month
Synergistic Effects of the Branched Chain Amino Acids and Camosine Precursors on Exercise-induced Muscle Damage and Performance in Humans
The goal is to determine the effects of amino acid supplementation on exercise performance.

R01DK082803-01 (Kien) 12/01/2009-11/30/2014
NIH/NIDDK $427,731
1.8 calendar months
Palmitate Metabolism and Insulin Resistance
The goal is to determine the mechanisms through which palmitate metabolism influences insulin resistance in human volunteers.

**UVM Transportation Research Center (USDOT) (Fukagawa, PI)**
TDC $180,323 03/01/2012-12/31/2013
Nutritional Supplementation with the Antioxidant, Glutathione, to Reduce the Health Effects of Petro- and Biodiesel Exhaust Particle Emissions
The goal is to determine whether glutathione plays a role in mitigating the effects of exposure to exhaust on airway hyperresponsiveness.
**Publications – peer reviewed, chapters, etc. (not abstracts)**

Hematology/Oncology Division Annual Report – 2013

A. Executive Summary

The Division combines 2 specialties, Hematology and Oncology. There are 2 full time faculty focusing on benign hematology and thrombosis, four faculty treating benign and malignant hematology, 8 medical oncologists, 1 internist (lymphedema) and 1 cardiologist (thrombosis and cardiology for cancer patients) in the Division with 2 emeritus faculty, 6 fellows, 5 post-doctoral fellows, 6 midlevel providers, about 65 nurses and staff in the outpatient clinic. The Division also supervises the Apheresis Program and the Hemophilia Center and has worked at obtaining accreditation for stem cell transplant, which should be granted later this year. The site visit which happened in May was successful, with minor comments to address. Our group has embodied the mission of the COM and FAHC with cost effective high quality of care, cutting edge research, and dedication to all aspects of teaching and research.

Clinical work
Clinical efforts for 2012/13 (pro-rated) include a heavy clinical load with 28,704 outpatient visits (about 1900 new patients) and about 6,000 inpatient visits for a total of 43,813 RVU’s. This is a 13% growth from last year. These numbers do not include patients treated in our infusion suite. We are also attending for patients of local private practices when they are hospitalized at FAHC. Services offered include multidisciplinary clinics where at a single visit patients may be seen by a number of oncologic or specialty providers. Established MDC clinics exist for breast, upper GI, ENT, lung cancer, GU, melanoma, sarcoma, leukemia’s and lymphomas, brain, and GYN. These multidisciplinary clinics are being integrated within Transdisciplinary Academic Teams (TAT), a group of expert physicians and scientists who focus on all aspect of academic medicine for the specific cancers they treat and research. In 2012/13, more than 600 new patients were seen through the TAT and MDC clinics. Our specialty services also include a federally granted hemophilia center (Dr. Holmes), a thrombosis and hemostasis program (Dr. Cushman), a soon to be accredited stem cell program (Dr. Sprague), an oncology rehabilitation center (Dr. Dittus), a cancer genetics clinic (W. McKinnon), and a high risk breast program (Dr. Wood). FAHC has now integrated the activities of the cancer patient support program to provide nutrition, psychological and social work support to any patient in Vermont in need of these services. We are in the planning stages of a lung cancer screening program for high risk smokers.

We are in the process of extending some of our services to regional oncology practices who have expressed an interest to collaborate for patient care and research.
Research
Research within the Division is done in several ways (clinical trials, basic science research and epidemiology) covering a number of broad themes (new drug development, cancer treatment and prevention, thrombosis, cardiovascular and stroke epidemiology, supportive care of cancer patients, cancer and exercise, and cancer and coagulation). Working within Transdisciplinary Teams, the faculty of the Hematology/Oncology Division are principal investigators for the majority of the over 300 cancer related studies at the University of Vermont, with 25% of these studies being investigator initiated. Approximately 1,000 cancer patients are put on clinical trials annually with about 3/4th being accrued to medical oncology studies. Approximately 15% of patients are enrolled on treatment clinical trials at FAHC which is higher than the 6% national average. Available trials include Phase I-III treatment trials, supportive care and translational studies, with the majority of the later (supportive care and translational studies) being investigator initiated. Investigators within the Division receive funding from clinical trials (cooperative group and pharmaceutical trials), NIH (NCI, NHLBI, NINDS) and ACS, and through the VCC some of the LCCRO funds support Division research activities.

Dr. Grunberg is the president of the Multinational Association of Supportive Care in Cancer. Dr. Greenblatt is the president of the Human Genome Variation Society. Dr. Cushman was appointed to the National Board of Directors of the American Heart Association on May 1, 2013. Dr. Wood was appointed to the American Society of Clinical Oncology (ASCO) CME committee as the liaison to the ASCO Prevention Committee.

B. Faculty

Steve Ades, MD - Associate Professor
Associate Director, Hematology/Oncology Fellowship Program
Leader, Fletcher Allen Health Care GI Multidisciplinary Clinic
Research interests include: GI and GU cancers and thrombosis

Mary Cushman, MD, MSc – Professor, Medicine and Pathology
Director, Thrombosis and Hemostasis Program
Research interests include: Etiology of vascular diseases and other chronic diseases; Racial disparities. Venous thrombosis and post thrombotic syndrome

Kim Dittus, MD, PhD – Assistant Professor
Director, Steps to Wellness
Research interests include: Cancer survivorship, energy balance

Steven Emmons, MD – Assistant Professor
Leader, Fletcher Allen Health Care Melanoma Multidisciplinary Clinic
Research interests include: CNS cancer and Melanoma

Marc Greenblatt, MD – Associate Professor
Research interests include: Molecular genetics of mutation in cancer genes and gastrointestinal cancers

**Steven Grunberg, MD – Professor**
Leader, Fletcher Allen Health Care ENT Tumor Multidisciplinary Clinic
Research interests include: Lung cancer, head and neck tumors, antiemetics

**Chris Holmes, MD, PhD – Associate Professor**
Director, Vermont Hemophilia Treatment Center
Assistant Director, Thrombosis and Hemostasis Program
Research interests include: Venous thrombosis, post-thrombotic syndrome and platelet function

**Farrah Khan, MD – Assistant Professor**
Research interests include: Care of patients with breast cancer and lung cancer

**Susan Lakoski, MD, MS – Assistant Professor**
Director, Cardiovascular Prevention Program for Cancer Patients
Research Interests: the role of fitness and exercise interventions in health. Venous thrombosis in cancer patients.

**Gurpreet Lamba, MD – Assistant Professor**
Research interests include: Lymphoma and Leukemia

**Emiliano Mugnaini, MD, PhD – Assistant Professor**
Research interests include: Lymphoma and Leukemia

**Patricia O’Brien, MD – Assistant Professor Clinical Scholar**
Director, Lymphedema Program

**Julie Olin, MD – Assistant Professor**
Attending Physician

**Julian Sprague, MD, PhD – Assistant Professor**
Director, Hematology/Oncology Fellowship Program
Research interests include: Leukemia and neurotoxicity

**Claire Verschraegen, MD – Professor**
Director, Hematology/Oncology Division
Co-Director, Vermont Cancer Center
Research interests include: Mesothelioma, GYN, Lung, other rare cancers

**Marie Wood, MD – Professor**
Director, Familial Cancer Program
Assistant Director, Hematology/Oncology Division
Research interests include: Molecular markers of breast cancer risk, attitudes of primary care physicians regarding cancer genetics, breast cancer screening and prevention.

**Neil Zakai, MD, MSc – Associate Professor**
Research interests include: Epidemiology and novel risk factors of venous thrombosis and cardiovascular disease. Epidemiology, causes, and consequences of anemia in diverse populations. Venous thrombosis causes and prevention, post thrombotic syndrome.

C. **List all Fellows**
Julia Moukharskaya, MD – 3rd year fellow
John Winters, MD – 3rd year fellow
Joanne Monterroso, MD – 2nd year fellow
Yongli Ji, MD – 2nd year fellow
Samir Ambrale, MD – 1st year fellow
Inder Lal, MD – 1st year fellow

D. List all NP’s and PA’s
Penny Gibson, PA
Janet Ely, NP
Paul Larson, NP
Jamie Kelly, PA
Emily Parenteau, NP

E. List all graduate students, post-doctoral fellows, MD PHD students
Santosh Kumar – Post-Doctoral Associate
Kristine Alexander – Post-Doctoral Associate

F. Endowed Professorships

G. Leadership in Professional Societies
Mary Cushman, MD, MSc – Elected member of the national board of directors of the American Heart Association – May 2013
   - Chair of Council Operations Committee, American Heart Association – 2012-14
   - Chair, Subcommittee on Quality, American Society of Hematology – 2010-13.

Chris Holmes, MD, PhD – named to the Thrombosis Committee of the American Thrombosis and Hemostasis Network in partnership with the Centers of Disease Control (CDC) – April 2012

Marie Wood, MD – ASCO Planning Committee for the 2013 Genetics and Genomics for the Practicing Clinical Seminar – 2013

Marie Wood, MD – serve on the ASCO CME Subcommittee 2013-2016

Steve Grunberg, MD – served as a faculty member at the Chicago Supportive Oncology Conference in Chicago in October 2012 – he was an invited panelist for the European School of Oncology Task Force on Early Recognition of Malnutrition and Cachexia in the Cancer Patient symposium in Geneva, Switzerland in December 2012.

H. Editorships and Editorial Boards
I. **Study Sections and Federal Advisory Boards**

Mary Cushman – Cardiovascular and Sleep Study Section (CASE), NHLBI, 2010-13.

J. **Major faculty awards**

Kim Dittus received the Vision Award – in recognition of her work to help create “Steps to Wellness” – May 2013

Marie Wood received the William Smith College Athletic – Hosking Award for outstanding lifetime achievement in chosen field of work – April 2013

Mary Cushman received the Senior Researcher of the Year Award from FAHC – December 2012.

K. **Grants** – list all active grants by faculty member, PI:

- **NINDS**
  - U01 NS041588
  - Etiology of Geographic and Racial Differences in Stroke Mortality
  - G Howard, PI, University of Alabama at Birmingham
  - M. Cushman, Subcontract PI
  - Funding: 8/1/2011-11/30/2013

- **CALGB**
  - Brigham & Women’s Hospital, Inc.
  - CALGB: Cancer and Leukemia Group B Case Study Service
  - S. Grunberg, PI

- **DiaDexus**
  - Lipoprotein-Associated Phospholipase A2 (Lp-PLA2) Activity and the Risk of Stroke, Coronary Heart Disease and Cognitive decline in REGARDS
  - M. Cushman, PI
  - Funding: 9/1/2012-8/31/2014

- **NHLBI**
  - R01HL59367
  - Epidemiology of Venous Thrombosis and Pulmonary Embolism
  - A. R. Folsom, PI University of Minnesota
  - M. Cushman, Subcontract PI
  - Funding: 1/1/2013-12/31/2017

- **NIH/NIA**
  - R01AG0236290-1
  - Exceptional Aging: 12 Year Trajectories to Function
  - A. Newman, PI: University of Pittsburgh
  - M. Cushman, Subcontract PI
  - Funding: 9/1/2012-8/31/2013
UVM An Exercise Training and Behavior Weight Loss Program after an Acute Blood Clot: TRAIN ABC™ Grant Program
S. Lakoski, PI
Funding: 6/1/2013-6/30/2014

NHLBI Regional and Racial Differences in Hemostasis and Risk of Stroke and Heart Disease
K08HL096841 N. Zakai, PI
Funding: 9/1/2012-8/31/2014

NCI Classifying DNA Mismatch Repair Gene Variants of Unknown Significance
R01 CA164944 M. Greenblatt, Joint PI
Funding: 3/1/2013-11/30/2013

NIH/NIGMS Vermont Center on Behavior and Health 9COBRE)
1P20GM103644-01A1 K. Dittus, PI
Funding: 12/1/2012-11/30/2017

BCRF 9 Effect of Adjuvant Chemotherapy for Early Breast Cancer on Brain Imaging and Cognitive Function
K. Dittus, PI
Funding: 3/09 – Indeterminate – no cost extension

NE Research The Impact of Fatty Acid Acquisition on Diffuse Large B-Cell Lymphoma Signaling and Prognosis
Consortium Program E. Mugnaini, Co-PI
Funding: 12/1/2012-11/30/2013

VCC Predictors of Dyspnea Fatigue Syndrome in Breast Cancer Survivors Before and After an Exercise Intervention
LCCRO Grant K. Dittus/B. Suratt, Co-PIs
Funding: 7/1/2012-10/31/2013

NNECOS DNA Repair Landscape in Individuals with Increased Risk of Breast Cancer
Northern New England Clinical Oncology Society M. Wood, PI
Funding: 2/15/2013-2/15/2014

LCCRO Grant LCCRO Support for the Vermont Cancer Center
C. Verschraegen, PI
Funding 1/1/2013-12/31/2013

L. Publications – peer reviewed, chapters, etc. (no abstracts)

The Immunobiology Program was established in the Department of Medicine in 1995 in recognition of the growing strength in this area of research from various departments. Although established in one department, it was intended from the start that this program should evolve to span several departments to include the various interests in genetic regulation of autoimmune and infectious diseases, basic mechanisms of T cell signaling of cytokine genes and cell death (Medicine), viral immunology (Pathology), transplantation immunology (Surgery), and maternal/fetal immunology (Ob-Gyn). Dr. Ralph Budd has directed this program since its inception. The core of the Immunobiology Program resides with the Department of Medicine and includes 7 faculty whose research interests are detailed below.

In 2006 the Immunobiology faculty partnered with faculty in Infectious Diseases and Microbiology and Molecular Genetics to successfully compete for a Center of Biomedical Research Excellence (COBRE) Award from NIH (NCRR). This allowed the formation of the Vermont Center for Immunology and Infectious Diseases (VCIID), which now numbers 21 faculty in 8 departments in 4 colleges and is in close alliance with the Vermont Vaccine Trial Center, headed by Dr. Beth Kirkpatrick, one of the VCIID faculty. The VCIID has a weekly joint Research-in-Progress meeting, seminar series, and a journal club. This provides a weekly forum for students and postdoctoral fellows to present their research progress as well as for faculty to review hypotheses and specific aims of planned grants. During the first 5 years of Phase I COBRE funding, VCIID faculty published 213 articles and received nearly $48 million in funding, excluding the COBRE funds.

In 2011 the COBRE grant was renewed for a second 5 years. This will provide funds to allow the College of Medicine to build a new BSL3 facility in partnership with the Vermont Department of Health, and to recruit new faculty to the theme of the host response to infection. In addition, we renewed our NIH T32 Training Grant for graduate students.

**Faculty**

**Ralph Budd, MD**
Professor of Medicine and Microbiology & Molecular Genetics
Director, Vermont Center of Immunology & Infectious Diseases
- Key Research Interests: Cell death, Regulation of caspases in the immune system, Gamma/delta T cells, Autoimmune mechanisms
**Jason Botten, PhD**  
Assistant Professor of Medicine, Adjunct in Microbiology and Molecular Genetics  
- Key Research Interests: Virology, Cellular Microbiology, Immunology, Proteomics  

**Sean A. Diehl, PhD** (7/12 – 1/13)  
Assistant Professor of Medicine  
- Key Research Interests: Molecular immunology, human immunology, allergic disease, autoimmune disease, T cells, B cells  

**Oliver Dienz, PhD**  
Assistant Professor of Medicine  
- Key Research Interests: T cell signaling, memory T cell function, influenza, lung inflammation, cytokines and their transcriptional regulation  

**Andreas Koenig, PhD**  
Research Associate, Medicine  
- Key Research Interests: Immunology: mechanisms of innate antiviral immune response  

**Karen Fortner, PhD**  
Assistant Professor of Medicine  
- Key Research Interests: Regulation of T lymphocyte homeostasis through cell death, metabolism, and inhibitory functions; T cell homeostasis and function in obesity; autoimmunity  

**Mercedes Rincon, PhD**  
Professor of Medicine  
Director, Transgenic/Knockout Mice Facility  
- Key Research Interests: T cell activation, allergy/asthma, influenza infection, T cell development, breast cancer, cancer and inflammation.  

**Cory Teuscher, PhD**  
Professor of Medicine and Pathology  
- Key Research Interests: Immunogenetics / Immunology  

**Tina Thornton, PhD**  
Research Associate, Medicine  
- Key Research Interests: The major focus is on understanding the interactions of signaling pathways that control early thymocyte development and survival, and is currently exploring the interaction of the p38 MAPK pathway and GSK3 in cells from the immune system and central nervous system under normal and pathological conditions.  

**Graduate Students, Post-doctoral Fellows, MD PhD Students:**  
Laure Case, PhD
Rajiv Jumani (graduate student)
Benjamin King (graduate student)
Joseph Klaus (graduate student)
Dimitry Krementsov, PhD
Naresha Saligrama (graduate student)
Michael Secinaro (graduate student)
Phan Thai (MD/PhD student)
Emma Wall, PhD
Rui Yang (graduate student)
Christopher Ziegler (graduate student)

**Editorships and Editorial Boards:**
(Budd) Editor for “Textbook of Rheumatology”, Elsevier
(Rincon) J. Immunology; International Journal of Biological Sciences

**Study Sections and Federal Advisory Boards:**
(Botten) Ad hoc reviewer, Project Grants in Basic and Clinical Sciences, The Welcome Trust
(Botten) Ad hoc reviewer, Special Emphasis Panel ZRG1 IDM-B (02), NIH
(Budd) Member, NIH NIAID T32 grant study section
(Budd) Member, NIH Special Emphasis Panel
(Rincon) Charter member, Cellular and Molecular Immunology NIH study section
(Teuscher) Charter member, Hypersensitivity, Autoimmune, and Immune-mediated diseases NIH study section.
(Teuscher) Permanent member, grant review panel for the National Multiple Sclerosis Society.

**Major Faculty Awards:**
(Botten) Young Investigator Travel Award, Fourth Biennial National IDeA Symposium of Biomedical Research Excellence (NISBRE), Washington, DC, 2012.
(Budd) Membership to Association of American Physicians
(Koenig) VCIID COBRE Pilot Award (2012) – CVB3-induced oxidative stress regulates innate immune response to infection
(Rincon) University Scholar designation by UVM Graduate College for 2012-2013
**Grants – list all active by faculty member, PI**

Grant Awards 07/01/12 – 06/30/13

NIH funding:
4 - R01
2 – R21
1 - R56
1 – P01 through ARRA Funding
3 – ARRA Supplements
1 – T32
1 – COBRE
1 – Sub award through University of Utah

Foundation funding:
1 – Postdoctoral Fellowship
1 – Foundation Pilot

**Budd:**

Title: Gamma Delta Cells in Lyme Arthritis  
Dates of Award: 09/30/2004 – 08/31/2013  
Role: PI  
Current Yr funding: $0 (no cost extension)  
Source: NIH/NIAMS

Title: Gamma Delta Cells in Lyme Arthritis (ARRA Supplement)  
Dates of Award: 09/23/09-09/22/13  
Role: PI  
Current Yr funding: $0 (no cost extension)  
Source: NIH/NIAMS

Title: Vermont Immunology / Infectious Diseases Center  
Dates of Award: 08/01/2006 – 06/30/2016  
Role: PI  
Current Yr funding: $2,258,504  
Source: NIH/NCRR

Title: Vermont Immunology / Infectious Diseases Center (Pilot ARRA Supplement)  
Dates of Award: 09/17/09-09/16/13  
Role: PI  
Current Yr funding: $0 (no cost extension)  
Source: NIH/NCRR
Title: Vermont Immunology / Infectious Diseases Center (BSL3 ARRA Supplement)
Dates of Award: 08/26/09-08/25/12
Role: PI
Current Yr funding: $0 (no cost extension)
Source: NIH/NCRR

Title: Regulation of Effector CD4 T Cells During Infection
Dates of Award: 08/01/09-07/31/12
Role: PI
Current Yr funding: $0 (no cost extension)
Source: NIH/NCRR

Title: Vermont Immunology / Infectious Diseases Training Grant
Dates of Award: 09/01/05 – 08/31/16
Role: PI
Current Yr funding: $184,363
Source: NIH/NIAID

Botten:
Title: Identification of Novel Arenavirus Protein-Host Cellular
Dates of Award: 06/15/10-05/31/13
Role: PI
Current Yr funding: $0 (no cost extension)
Source: NIH/NIAID

Diehl:
Title: H1R Signaling and Immune Deviation in EAE
Dates of Award: 01/19/10-12/31/14
Role: Co-PI (PI, Teuscher)
Current Yr funding: $328,114
Source: NIH/NINDS

Rincón:
Title: p38 MAP Kinase during Early Thymocyte Development
Dates of Award: 02/15/2009 – 01/31/2014
Role: PI
Current Yr funding: $368,763
Source: NIH/NIAID

Title: IL-6: an innate immune regulator of the plasticity of Tfh cells
Dates of Award: 04/15/2012 – 03/31/2014
Role: PI
Current Yr funding: $441,316 (no cost extension, effective 4/1/13)
Source: NIH/NIAID
Teuscher:

Title: Molecular Genetics of Arthritis in Murine Lyme Disease  
Dates of Award:  08/15/2004 – 05/31/2014  
Role:  Co-PI  
Current Yr funding:  $67,000  
Source:  University of Utah  

Title: Histamine Receptor Signaling in CNS Autoimmune Disease  
Dates of Award:  01/15/2008 – 12/31/2013  
Role:  PI  
Current Yr funding:  $606,264 (no cost extension, effective 1/1/13)  
Source:  NIH/NINDS  

Title: H1R Signaling and Immune Deviation in EAE  
Dates of Award:  01/19/10-12/31/14  
Role:  PI (Diehl, Co-PI)  
Current Yr funding:  $328,114  
Source:  NIH/ NINDS  

Title: p38 MAPK as a Female-Specific Druggable Target in Autoimmune Disease of the CNS  
Dates of Award:  07/01/11 – 06/30/14  
Role:  Mentoring PI  
Current Yr funding:  $48,476  
Source:  National Multiple Sclerosis Society (postdoctoral fellowship)  

Title: p38 MAPK as a female-specific druggable target in CNS autoimmune disease  
Dates of Award:  07/1/11 – 06/30/14  
Role:  PI  
Current Yr funding:  $190,625  
Source:  NIH/ NINDS  

Title: Gestational exposure to bisphenol A in susceptibility to autoimmune inflammatory disease of the CNS  
Dates of Award:  01/01/12 – 12/31/12  
Role:  PI  
Current Yr funding:  $43,779  
Source:  NMSS
Publications – peer reviewed, chapters, etc. (not abstracts)

Publications in Progress:

The Infectious Diseases (ID) Unit is a group of nine attending physicians dedicated to the diagnosis, management, prevention and investigation of infectious diseases. This past year we provided close to 1,628 new inpatient consultations. In September of 2012 began a new collaboration with Rutland Regional Medical Center with Dr. Sarah Mooney coming on staff both at FAHC and RRMC. The outpatient clinics remain vibrant with about 6000 outpatient visits yearly. This effort includes the care of over 440 active patients with HIV in four federally funded Comprehensive Care Clinics in Vermont. The Comprehensive Care Clinics recently celebrated 25 years of caring since their opening in 1987. The ID Unit outpatient care includes the international traveler’s clinic, refugee screening, home IV antibiotics and care for patients with general infectious disease issues. The ID unit works collaboratively with the Vermont Department of Health for diagnosis and treatment of tuberculosis and biological and pandemic influenza preparedness. The ID staff includes the FAHC Hospital Epidemiologist and infection control officer, the Department of Medicine’s Associate Director of Residency Training, UVM’s medical student Clerkship Director for the Department of Medicine and the Director of the Vaccine Testing Center at UVM.

In addition to daily teaching rounds with medical students, residents and fellows, the physicians are actively involved in the Attacks and Defenses, Neural Sciences, Generations, Connections, Convergence and Doctoring in Vermont, medicine clerkships and acting internships sections of the Vermont Integrated Curriculum. The ID Unit is the home of a two year fellowship training program. The graduating fellows have a 100% board certification pass rate over the past 11 years. This program includes a year of research that has resulted in abstract presentations at the national ID meetings, peer reviewed publications and book chapters.

Within our unit we have two active research laboratories which support a number of projects by PhD students, research associates, attending physicians, and the 2nd year ID Fellow. Investigations center on the molecular biology and pathogenesis of Entamoeba histolytica, Salmonella enterica serovar Typhi, Campylobacter jejuni, and Cryptosporidium pharmaceutical agent development. The results of Phase I clinical trials developing live attenuated Dengue virus vaccines were recently published as a major article in the Journal of Infectious Diseases. Efforts to start a Cholera vaccine challenge study are well underway. Continuing clinical research efforts include epidemiologic investigations into Clostridium difficile infection and risks, HIV service delivery models and outcomes, HIV related biomarkers and exploration of the biologic rationale of oral polio and rotavirus vaccine failure in an international field trial setting.

In addition to clinical revenues, financial support is provided by grants from the NIH, NIAID, Health Services Research Administration (HRSA), Bill and Melinda Gates Foundation, contracts with regional hospitals and FAHC directorships.
Faculty

Christopher Grace, MD FACP
Professor of Medicine
- Director, Infectious Diseases
- Director, ID Fellowship Training Program
- Director at FAHC Part C, HRSA grant for HIV care
- Director at FAHC Part B, HRSA grant for HIV care (Vermont Dept. of Health)
- Consultant: Pandemic Influenza and Bioterrorism, Vermont Department of Health

W. Kemper Alston, MD MPH
Professor of Medicine
- Chair, Infection Prevention Committee
- Hospital Epidemiologist
- Consultant: Tuberculosis, State of Vermont
- Consultant for Food and Drug Evaluation and Research
- Hospital Infections, Tuberculosis

Christopher D. Huston, MD
Associate Professor of Medicine
- Research Interests: Intestinal protozoan infections including *E. Histolytica* host-parasite infections, Cryptosporidium drug development
- Institutional Biosafety Committee

Beth D. Kirkpatrick, MD
Associate Professor of Medicine
- Director, Vaccine Testing Center
- Research Interests: Vaccine Development, enteric infections, Dengue Fever
- Institution Review Board

Sarah Mooney, MBBC
Assistant Professor of Medicine
- Clinical Faculty
- Rutland Regional Medical Center attending

Cindy Noyes, MD
Assistant Professor of Medicine
- Clinical Faculty

Kristen K. Pierce, MD
Assistant Professor of Medicine
- Associate Program Director, ID Fellowship Training Program
- Research Interests: Dengue Fever vaccine development study
Louis B. Polish, MD
Associate Professor of Medicine
- Director, Department of Medicine Clerkship Program
- Chair, Infectious Disease Practice Committee
- Director, AIDS Education Training

Mary B. Ramundo, MD
Associate Professor of Medicine
- Associate Program Director, College of Medicine Residency Program
- Department of Medicine, Medical Education Committee
- Chairman, Housestaff Evaluation Committee

Jose Teixeria, PhD
Research Associate
- Interests: Intestinal protozoan infections including *E. Histolytica* host-parasite infections, Cryptosporidium drug development

Fellows

Kensley Nichols, MD
Infectious Disease 2nd Year Fellow
- Infectious Disease Fellowship Training Program July 1, 2011 – June 30, 2013
- Research Year: Epidemiology of *Clostridium difficile* infection

Olha Smolynets, DO
Infectious Disease 1st Year Fellow
- Infectious Disease Fellowship Training Program July 1, 2012–June 30, 2014

Nurse Practitioners and Physician Assistants:

Deborah Kutzko, FNP
Nurse Manager, Comprehensive Care clinic
- Travel health
- AIDS Comprehensive Care Clinic

Hella Douglas, PsychNP
Comprehensive Care clinic, HIV patient
- HIV Patient Care, mental health

Graduate Students, Post-doctoral Fellows, MD PhD Students:
Kelly Fimlaid – PhD Student, (Kirkpatrick Laboratory)
Kovi Bessoff – MD, PhD Student (Huston Laboratory)
Adam Sateriale – PhD Student (Huston Laboratory)
Peter Miller – PhD Student (Huston Laboratory)  
Alan Chu – PhD Student (Huston Laboratory)

Editorships and Editorial Boards:
W. Kemper Alston, MD  
- External reviewer  
  - Annals of Internal Medicine,  
  - Clinical Infectious Diseases  
  - Infection Control and Hospital Epidemiology

Christopher Huston, MD  
- Editorial Board Member – Infection and Immunity  
- External reviewer  
  - Complexity in biology: molecular aspects of infectious Diseases

Division of Nephrology
Richard J. Solomon, MD, Director
http://www.med.uvm.edu/medicine/nephrology

Our division is the primary provider of care for patients with kidney diseases in Vermont and upstate New York. We provide kidney replacement therapies for patients with end-stage kidney disease including in-center hemodialysis and home dialysis, by either peritoneal or short daily hemodialysis and treatment of acute kidney failure using continuous kidney replacement therapies in the intensive care unit. Our experienced staff members are committed to training patients for a variety of home dialysis therapies. In conjunction with the Department of Surgery, we care for patients undergoing kidney or kidney-pancreas transplantation. In addition to patients with primary kidney diseases, we serve as a referral base for patients with complicated hypertension, electrolyte disorders, kidney stones, and genetic kidney diseases. Faculty provide both inpatient and outpatient consultation, and are nationally recognized for our expertise in the management of acid-base and electrolyte disorders, diabetic nephropathy, hypertension, and acute kidney failure.

Our faculty is involved in the training of medical students, fellows and internal medicine housestaff. We support primary care providers throughout the region by providing educational programs on hypertension treatment, clinical kidney disease prevention, and dialysis and transplantation.

We are engaged in clinical and epidemiologic research supported by a variety of grants (Federal, UVM, industry and foundation). Ongoing trials involve novel therapies for control of hypertension, prevention of acute kidney injury, improving care of patients on dialysis, and innovative educational programs for fellows in Nephrology.

Service:

Services Offered

Our doctors offer specialty expertise in a number of problems, including:

- Acute and chronic kidney failure
- Kidney transplantation
- Kidney stones
- Electrolyte disturbances
- Acid-base balance disorders

We also provide specialty care in acute and chronic hemodialysis on-site and a number of home options, including peritoneal dialysis, home hemodialysis including the NxStage System.
Our hemodialysis clinics are located in multiple locations across the state.

**Hypertension**

The Nephrology Clinic provides a program for the comprehensive diagnosis and management services for all forms of difficult to manage hypertension in conjunction with Fletcher Allen Surgery and Radiology.

The Burlington Clinic also provides plasmapheresis services for patients with systemic diseases involving the kidney; and provides support services for kidney and kidney/pancreas transplantation in conjunction with Fletcher Allen Surgery.

**Regional Dialysis Services**

The Clinic has an extensive outreach program with dialysis units in Barre, Rutland, St. Albans, South Burlington, and Newport. We visit these units regularly and are available for both on-site inpatient and outpatient consultation in Barre, Rutland, St. Albans, and Newport.

**Education**

The fellowship training program accepts two trainees each year for a two-year program. The program includes a first year of hospital consultation service, and a second fellowship year including a rotation on the in-hospital transplant service, and elective time in pathology and radiology. During the second year, fellows are also expected to pursue scholarly activities leading to presentations at national meetings and publication of results.

These projects often involve direct participation in multicenter clinical research trials, investigator initiated research, and collaborative inter-department quality improvement projects. During the two years of fellowship training, the fellows have weekly half day continuity clinics in chronic kidney disease, and a second clinic at our satellite dialysis facility following in-center end stage kidney disease patients. They also have a monthly home dialysis clinic to follow patients on peritoneal dialysis and home dialysis. During the second year, fellows participate in the outpatient transplant follow-up clinic.

**Patient Care**

We provide kidney replacement therapies for patients with end-stage kidney disease including in-center hemodialysis and home dialysis, by either peritoneal or short daily hemodialysis and treatment of acute kidney failure using continuous kidney replacement therapies in the intensive care unit. The unit has an experienced staff committed to training patients for a variety of home dialysis therapies. In conjunction with the Department of Surgery, the nephrology Unit cares for patients undergoing kidney or kidney-pancreas transplantation.
Research

Division of Nephrology faculty conduct investigator initiated research and participates in multicenter clinical trials in areas of dialysis care, chronic kidney disease, hypertension, and acute kidney injury.

Clinical Trials

Our team is actively recruiting for a number of clinical trials. Ongoing trials involve novel therapies for control of hypertension, prevention of acute kidney injury, improving care of patients on dialysis, and innovative educational programs for fellows in Nephrology.

Faculty

Richard J. Solomon, MD
Professor of Medicine
Director, Nephrology Division

Academic Interests

• Endothelial dysfunction in diabetes and renal disease
• Mechanisms of renal ischemia
• Acute kidney injury Prevention of contrast induced nephropathy (CIN)

Research Interests

• Regulation of electrolyte homeostasis in marine species
  Educational initiative for patients with early renal insufficiency (PEAK program)
  Pharmacology of antihypertensive drugs
  Prevention and treatment of ischemic acute renal failure, including contrast nephropathy
  Treatment of progressive renal failure, including diabetic nephropathy

Varun Agrawal, M.D.
Assistant Professor of Medicine

Academic Interests

• Obesity mediated kidney disease
• Nephrology educational research
Shirley Chang, M.D.
Assistant Professor of Medicine

Academic Interests
- Kidney/Pancreas Transplantation
- Diabetic Nephropathy
- Pediatric Nephrology

F. John Gennari, M.D.
Emeritus Professor of Medicine

Academic Interests
- Renal physiology
- Acid-base and electrolyte homeostasis
- Fluid and solute transport in the kidney

Virginia Hood, MBBS, MPH, MACP
Professor of Medicine

Academic Interests
- Population approaches to management of hypertension and chronic kidney disease
- Models for delivery of high value cost conscious health care.
- Acid-base disorders

Dana Negoi, M.D.
Associate Professor of Medicine

Academic Interests
- Home Dialysis
- CKD Education
- Clinical Nephrology Teaching

Research Interests
• Peritoneal Dialysis
• Quality improvement in home dialysis
• CKD education
• Nephrology training in home dialysis modalities

Jeffrey Rimmer, M.D.
Professor of Medicine

Academic Interests

• Renal replacement therapies in acute and chronic kidney disease
• Management of vascular access for hemodialysis
• Coordination of care for the in-center hemodialysis patient
• Management of bone and mineral disorders in the hemodialysis patient

Alan Segal, M.D.
Associate Professor of Medicine
Fellowship Program Director

Academic Interests

• Acute Kidney Injury
• Fluid and Electrolyte Disorders
• Home Dialysis
• Efficient and Comprehensive Care in CKD and ESKD

Research Interests

• Cellular and Molecular Physiology of Ion Channels
• Membrane Transport
• Innovations in Medical Education

Wolfgang Weise, M.D.
Associate Professor of Medicine

Academic Interests

• Progression of renal disease
- Glomerular Disease
- Renal Vasculitis
- Systemic Diseases and the Kidney

**Fellows**

M. Adel Abdessamad – Second Year Fellow  
Igor Rojkovskiy – Second Year Fellow  
Adam Horeish – First Year Fellow  
Ziad Arabi – First Year Fellow

**Nurse Practitioners and Physician Assistants:**  
Margaret Butler, ANP

**Graduate Students, Post-doctoral Fellows, MD PhD Students:**  
none

**Endowed Professorships:**

Richard J. Solomon, M.D.  
Patrick Professor of Medicine

**Leadership in Professional Societies:**

F. John Gennari, M.D.  
Section Chairman - Fluid, electrolyte and acid-base disorders, American Society of Nephrology annual meeting, 2012  
Virginia Hood, MBBS, MPH, MACP  
Past President- American College of Physicians

**Editorships and Editorial Boards:**

Varun Agrawal, M.D.  
Ad-hoc reviewer: Clinical Journal of American Society of Nephrology, Annals of Internal Medicine, BioMed Central Nephrology, International Journal of Hypertension

F. John Gennari, M.D.  
Advisory Board: Acid-base and Electrolyte Teaching Cases, American Journal of Kidney
Diseases

Alan Segal, M.D.
Editorial Board: American Journal of Physiology, Renal

Richard Solomon, MD
Editorial Board: US Nephrology
Ad hoc reviewer: Clinical Journal of the American Society of Nephrology; Journal of the American Society of Nephrology; Nephrology Dialysis and Transplantation; Critical Care Medicine; Investigative Radiology; Radiology; Circulation; Journal of the American College of Cardiology

Study Sections and Federal Advisory Boards:

Alan Segal, M.D.
US Advisory Board, Baxter Healthcare

Richard Solomon, M.D.
Special Reviewer: NIDDK, NIH
Advisory Board, Biomarker Consortium, Foundation for NIH

Major Faculty Awards:

Virginia Hood, M.D. – Best Doctor Award, US News – Vermont Medical Society Distinguished Service Award 2012
Richard Solomon, M.D. – Best Doctor Award, US News

Grants – list all active by faculty member, PI

Varun Agrawal, M.D.

- Mini-grant for National Kidney Foundation, Maryland

Dana Negoi, M.D.

- 2011-2012
  Keryx Biopharmaceuticals “A 3 – Period 58 – Week Safety and Efficacy trial of KRX – 0502 (ferric citrate) in Patients with End – Stage Renal Disease (ESRD) on Dialysis” – Principal Investigator

- 2012
  Dialysis Outcomes and Practice Patterns Study DOPPS (Principal Investigator - participant St. Albans Dialysis Clinic)
Richard Solomon, M.D.

- SIMPLICITY HTN-3 Trial: Metronic (renal denervation for refractory hypertension).
- BEACON: REATA Pharm (Bardoxolone for chronic kidney disease and type 2 diabetes).
- ALTITUDE: Novartic Pharm (Aliskiren in Type 2 diabetes with renal insufficiency).
- ALLOCURE: Stem cell therapy for AKI post CABG
- BOSS (Bicarbonate or saline study) in patients undergoing PCI.

Wolfgang Weise, M.D.

Primary Care Internal Medicine  
Allen Repp, MD, MS, Director

http://www.uvm.edu/medicine/medicine/pcim/

Primary Care Internal Medicine (PCIM) specializes in diagnosing, treating, and preventing medical problems in adolescents, adults, and the elderly. We work as a team to provide a medical home for our patients in clinic and around-the-clock care for our patients admitted to the hospital.

Our faculty physicians teach general internal medicine and geriatrics to medical students, resident physicians, professional colleagues, and community members. We hold numerous leadership roles at the College of Medicine and are proud to serve an integral role in our vibrant academic medical center.

Service:

Our clinical service includes approximately 70 faculty and community physicians, nurse practitioners, physician assistants, and mental health specialists. We have four outpatient sites in Chittenden County and an active hospitalist service. We also see patients at numerous skilled nursing facilities and Fanny Allen Acute Rehabilitation.

Over the past year we welcomed exceptional new faculty: Drs. Alison Landrey, Anne Breña, Amy Lynn Teleron, and Shaden Eldakar-Hein. Dr. Jennifer Borofsky will join us this summer.

In the office setting, patients are seen for a variety of acute and chronic medical problems, preventive care, health maintenance and preoperative exams. Our group has been a national leader in developing innovative models for care delivery. All four outpatient sites have been NCQA recognized as level 2 or 3 Patient Centered Medical Homes. Over the past year, we have been laying the foundation for transforming our care processes to enhance the patient experience and deliver optimal care to our population of patients.

Our physicians care for many geriatric patients in Chittenden County, attending to elderly patients living independently, in assisted living, in local nursing homes, and at hospice. We hold the medical directorships for 3 local skilled nursing facilities and for the VNA Hospice.

In the inpatient setting, our hospitalist service provides 24x7 attending and consultative care at Fletcher Allen. Additionally, we provide physician leadership to the rapid response team.
(CATS Team), which responds to inpatients with medical emergencies throughout the hospital. Our hospitalist team has been engaged in numerous institutional quality improvement initiatives. We also offer medical consultation to patients in the inpatient acute rehabilitation program at Fanny Allen Rehabilitation Center.

This year PCIM faculty and providers will conduct approximately 100,000 patient encounters and generate over 150,000 work RVUs.

Our faculty and providers are engaged in service at the state and national levels. Drs. Menzies, Clough and Grant were appointed to the OneCare Vermont Clinical Advisory Board. Dr. Pasanen serves as the Governor for the Vermont Chapter for the American College of Physicians and the UVM Medical Alumni President. Dr. Patricia King chairs the Vermont Board of Medical Practice and sits on Federation of State Medical Boards Advisory Council to USMLE and the National Board of Medical Examiners Standards Setting Committee for USMLE Step 1. Dr. Halle Sobel and Dr. Mark Pasanen participate in the Vermont Medicaid Drug Utilization Board. Dr. Isaura Menzies was appointed to the Green Mountain Care Board Technical Advisory Group. Faculty participation in committees and task forces at the College of Medicine and Fletcher Allen Health Care is extensive.

**Education:**
Division faculty members play a pivotal role in teaching and directing courses for a broad audience of clinical learners in the outpatient and inpatient settings. Our educational programs cover a wide spectrum, from primary care to tertiary care, communication skills to statistics, and from pre-medical students to post-graduate continuing medical education.

At the UVM College of Medicine, our faculty members act as preceptors, instructors, and facilitators for courses at all levels of the Vermont Integrated Curriculum. Additionally, we serve as Course Directors for Doctoring in Vermont (Dr. Beatty), Convergence (Dr. King), Outpatient Medicine Clerkship (Dr. O’Brien), Bridge (Dr. Beatty) and the Medicine Acting Internship (Dr. Levine). Administrative leadership positions at the College of Medicine include Associate Dean for Clinical Education (Dr. Bertsch), Associate Dean for Primary Care at the College of Medicine (Dr. Maclean), and Associate Chair for Education in the Department of Medicine (Dr. Levine). As course directors and administrative leaders, these faculty members were deeply involved in the preparations for the successful LCME review in 2013.

We also play key roles in the clinical education of the Internal Medicine residents. The Given Burlington practice houses the Internal Medicine Resident Clinic – where the Internal Medicine residents practice under the supervision of our preceptors and firm leaders in a busy clinic environment. In the inpatient setting, Hospitalists serve as Teaching Attending for the 4 general medicine teaching teams throughout the year – offering clinical supervision, clinical education, lectures, and evaluation to resident physicians and medical students. Additionally, our inpatient faculty physicians lead the Medicine Consult elective for residents and medical students and a Hospital Medicine Acting Internship.
As Director and Associate Director, respectively, Dr. Levine and Dr. Pasanen provide key leadership to the Internal Medicine Residency Program. Our faculty members have been recognized numerous times by the resident physicians for teaching excellence. In June 2013, Dr. Pinckney received the William Osler, M.D. Award for Outstanding Teacher of the Year in General Internal Medicine.

Drs. King and Sandoval continue their work on Frymoyer Scholars projects – “Teaching Professionalism through Lessons from the Board of Medical Practice” (Dr. King) and “Optimal Patient to Provider Communication in the Outpatient Medical Clinic with Electronic Health Record and the Development of Health Care Curriculum/Faculty Development” (Dr. Marie Sandoval).

Our educational endeavors extend to graduate students in analysis of clinical research, nurse practitioners in palliative care fellowship programs, and nurse practitioner students in clinical compassion. We educate our colleagues locally, regionally and nationally in a variety of venues. Examples include the Vermont Academic Detailing Program which delivers educational outreach to Vermont’s primary care providers and the University of Vermont Continuing Medical Education Course in Hospital Medicine with faculty largely from PCIM and other divisions of the Dept of Medicine.

Research
Many of our clinical faculty conduct research via the General Internal Medicine Research unit and provide mentorship, resources, and a scholarly community that supports faculty from many departments in their investigations. We have a diversity of scholarly interests among our faculty including clinical trials of immunizations, the impact of innovative models for primary care, narcotic-related adverse events in inpatients, narcotic prescribing practices in the outpatient setting, communication practices around inter-hospital transfer, and VTE prevention in acute medically ill patients.

Faculty

Publications – peer reviewed, chapters, etc. (not abstracts)

The Pulmonary Critical Care Division has made major changes in its clinical services over the last 12 months, the faculty has made significant research advances which have garnered national and international recognition, and the division has initiated important new pre- and post-graduate educational programs.

The Division manages critically ill patients in the Medical Intensive Care unit, inpatient pulmonary and critical care consults, and has a number of sub-specialty clinics including those in interstitial lung disease, cystic fibrosis, lung cancer, asthma and cancer survivorship. The Division provides a full range of pulmonary diagnostic services including bronchoscopy, pulmonary function testing and other services; evaluation of sleep disorders; and outpatient pulmonary rehabilitation. The Division continues to expand the range of services provided, and will welcome two new faculty in the next few months: Dr. Menon who has a special interest in critical care outreach and end of life care, and Dr. Kinsey who will start an interventional pulmonary program for our institution.

The Division instituted 24/7 coverage in the medical intensive care unit over the last year. This has significantly increased attending physician coverage for critically ill patients to improve quality of care in the intensive care units, and has been very well received by house-staff, nursing and other specialties. The pulmonary clinic continues to increase the number of patients seen in clinic every year, which likely reflects the increasing burden of lung disease in our community and throughout the United States.

The Division has a national and international reputation in research, especially in the areas of asthma, stem cell research and obesity and lung disease. Members of the Division published over 100 peer reviewed articles during the last year, obtained significant funding from the NIH and foundations. This year the Division will host major conferences welcoming investigators from around the globe for a conference on Stem Cells and Lung disease in July, and a conference on Obesity and Lung Disease in October. The research program continues to expand, and enjoys considerable success and major recognition.

The Division is committed to education and training. Members of the Division have a leadership role in the medical school curriculum, including organizing the respiratory section of the award winning Cardiovascular Respiratory and Renal Foundations Course. Faculty members have a major role in teaching medical students, residents, and the three year Pulmonary and Critical Care Fellowship program continues to produce excellent pulmonary and critical care physicians who have gone on to pursue a variety of career pathways in academic medicine and clinical practice venues. Education of medical students and other trainees is a major mission of the Pulmonary and Critical Care Division.
The last year has been a busy and successful year for the Division as outlined in detail for all members of the Division below.

**Faculty**
(list all faculty, Director first, then alphabetically with academic rank (note any medical administrative position, i.e. MICU Director), ex:

**Anne E. Dixon, MD**

Lily Sender, PA

**Graduate Students, Post-doctoral Fellows, MD PhD Students:**

Jennifer Ather (PhD candidate from Maastricht University)  
Rebecca Martin (PhD candidate from UVM’s CMB Program, MD candidate from UVM)  
Benjamin Schott (MS candidate from UVM’s Experimental Pathology program)  
Niki Ubags, Graduate student, in collaboration with Maastricht University, The Netherlands  
MaryEllen Antkowiak, PCCM Fellow (Fellowship research training)  
Tatsiana Palvinskaya, PCCM Fellow (Fellowship research training)  
Marisa Liu, UVM Medical student (Second year research rotation)  
Alix Lambrecht, Leuven (Belgium) Medical student (Leuven University Research Fellowship)  
Estee Dilli, UVM Undergraduate (summer)  
Maya Sayarah, Mount Holyoke College Undergraduate (Mount Holyoke Summer Research Fellowship Program)  
Clare Martin, UVM Undergraduate (BIOCHEM 381/382)  
Prema Menon, MD, Clinical Instructor (research mentor)  
Ali Al-Alwan, MD, Senior Fellow (research mentor)  
Timothy Leclair, MD, Senior Resident (research mentor)  
Whitney Creed, MS3  
Anees Daud, MS4  
Robert Disantis, MD (PGY2)  
Sanjiva Lutchmedial, MD (PGY5)  
Bradford Smith, PhD: post-doctoral fellow  
Joshua Pothen, BSc: PhD student in bioengineering  
Bryce Benson, BSc: PhD student in bioengineering (co-supervised with Peter Spector, MD)  
Richard Carrick, BSc: PhD student in bioengineering (co-supervised with Peter Spector, MD)  
David Chapman, Ph.D., Post Doc  
Darcy Wagner PhD post-doc  
Melissa Lathrop PhD post-doc  
Charles Parsons post-doc (surgery resident)

**Endowed Professorships:**

Polly E. Parsons MD  
E.L. Amidon Professor of Medicine

**Leadership in Professional Societies:**

Anne Dixon, MD
• American Lung Association Asthma Clinical Research Centers, Executive Steering Committee (member)
• American Thoracic Society Membership Committee (Chair)
• American Thoracic Society Allergy Immunology and Inflammation Program Committee (member)
• American Thoracic Society Minority Trainee Travel Awards Committee (member)

Gilman Allen, MD
• AOA Councilor
• ATS RSF Assembly Web Director
• ATS Website Editorial Board
• ATS RSF Assembly Executive Planning Committee

Jason Bates, PhD
• Member of Nomination Committee, Respiratory Structure & Function Assembly, American Thoracic Society

David Kaminsky, MD
• Continue to serve on the ATS Proficient Standards Committee for Clinical Pulmonary Laboratories
• Continue to serve on the National Board of Respiratory Care

Laurie Whittaker Leclair, MD
• Cystic Fibrosis Foundation Therapeutic Development Network Steering Committee

Lennart Lundblad, PhD
• Member of the Board of Directors in the Pulmonary Research Group

Yolanda Mageto, MD, MPH
• ATS Chair Minority Trainee Travel Award committee 2013-2014
• ATS Chair Membership Committee

Polly E. Parsons MD
ATS: Members in Transition and Training Committee: member 2008-present
  Publications Policy Committee: member 2011-2012
  Finance Committee: member 2011-2012

Association of Professors of Medicine:
  Nominating Committee: 2011-2012

Alliance for Academic Internal Medicine:
  Accreditation Committee: Chair 2011-present
  Board of Directors (ex-officio): 2011-present
Multi-society National Task Force to Develop a Critical Care Research Agenda:
Chair: 2009 – present

Renee Stapleton, MD PhD
• American Thoracic Society
  Committee for Members in Transition and Training
  Member 2006-2013
  Chair-Elect, 2009-2010
  Chair, 2010-2013
Critical Care Assembly Planning Committee
  Member, 2009-2013
  Chair, 2011-2013

Critical Care Assembly Program Committee, 2009-2012

Behavioral Sciences and Health Services Assembly Program Committee, 2012-present

Scientific Advisory Committee (reviews all ATS grants), 2013-present

Education Committee, 2013-present

• Canadian Critical Care Nutrition Clinical Practice Guidelines Committee, External Panel Member, 2008-present

• Data Safety Monitoring Board, “Randomized trial of an interdisciplinary communication intervention to improve patient and family outcomes in the ICU,” PI JR Curtis and RA Engelberg, University of Washington, 2009-present.

Benjamin Suratt, MD
• All Nominations Committee, ATS, 2013-14
• All Planning Committee, ATS, standing

Charlotte Teneback, MD
• Serving on the scientific and research committee, and the Pulmonary Rehab Registry Committee of the American Association of Cardiovascular and Pulmonary Rehabilitation.
Daniel Weiss, MD, PhD
- Chair, Respiratory Tract Committee for International Society for Cell Therapy
- Chair, Stem Cell Working Group for ATS
- Membership in a variety of other committees

**Editorships and Editorial Boards:**

Jason Bates, PhD
- Associate Editor, Journal of Applied Physiology
- Editorial Board Member, Journal of Clinical Monitoring and Computing
- Editorial Board Member, CRC Critical Reviews in Bioengineering

Charles Irvin, PhD
- Editorial Board, American Journal Respiratory Cell and Molecular Biology
- Editorial Board, Journal Allergy Clinical Immunology: In Practice

Lennart Lundblad, PhD
- Proceedings Editor with the Pulmonary Research Group

Polly E. Parsons MD

Up-to-Date: Editor-in-Chief, Critical Care Section 2004-present
Editorial Board Member:
American Journal of Respiratory and Critical Care Medicine 2005-present
CHEST 2005-present

Matthew Poynter, PhD
- Editorial Board member, American Journal of Respiratory Cell and Molecular Biology

Daniel Weiss, MD, PhD
- Editorial Board: Am J Resp Cell Molecular Biology

**Study Sections and Federal Advisory Boards:**

Anne Dixon, MD
- Member NHLBI review panel for Patient-Oriented and Career Enhancement Award for Stem Cell Research (K 23, 24, 25), 2007 – present
- Ad-Hoc Member, VA Merit Review Panel for Pulmonary, 2011 - present
- Ad Hoc Member NIH Dissemination and Implementation Research in Health (DIRH) Study Section Committee, September 2012
• Ad Hoc member “Agence Nationale de la Recherche” (National Research Agency of France), October 2012
• Co-Chair: Special Emphasis Panel, Member Conflicts: Asthma, COPD, Cystic Fibrosis and Lung Host Defense Applications, March 2013

Gilman Allen, MD
• Cystic Fibrosis Canada

Gerald Davis, MD
• Chair, Data and Safety Monitoring Board (DSMB), Idiopathic Pulmonary Fibrosis Clinical Research Network (IPFNet), National Heart, Lung & Blood Institute

Charles Irvin, PhD
• Co-chair working group on mentors NIH NHLBI
• Ad Hoc P01 grants (2), NIAID, National Institutes of Health
• Ad Hoc LRP grants, NIMHD, National Institutes of Health
• Ad Hoc P01 grants, NIAID, National Institutes of Health
• Ad Hoc R01 grants, NIMHD, National Institutes of Health
• Ad Hoc LRP grants, NIMHD, National Institutes of Health (2 panels)
• Ad Hoc R23 grants, NIAID, National Institutes of Health

David Kaminsky, MD
• American Lung Association, Research Grant Review Committee, Study Section C

Lennart Lundblad, PhD
• Guest Editor with the Pulmonary Pharmacology and Therapeutics

Polly E. Parsons MD
NHLBI Next Generation Resuscitation Research Workshop 2013
NHLBI Scientific Advisory Council: member 2011-present

Matthew Poynter, PhD
• NIH LCMI Study Section ad hoc
• NIH Counteract Study Section ad hoc
• NIH NIAID Asthma and Allergic Diseases Corporative Research Centers scientific review panel ad hoc

Renee Stapleton, MD, PhD
• World Health Organization Respiratory Working Group for development of ICD-11, 2010-present
• Asked to serves as a member of the review panel for the NIH NHLBI PETAL (Prevention and Early Treatment of Acute Lung Injury) Network which was to occur in December
2012. Review panel meeting cancelled to administrative change in grant mechanism. New RFA has been posted; intent to participate on review panel in 2013.

- American Thoracic Scientific Advisory Committee (responsible for reviewing all ATS grants), 2013-present

Daniel Weiss, MD, PhD
- NIH SBIR Study Section
- Study section chief, Connecticut Stem Cell Research Committee
- Reviewer for Italian CF Foundation, Canadian CF Foundation

**Major Faculty Awards:**

Charles Irvin, PhD
Assistant Dean for Faculty, College of Medicine

David Kaminsky, MD
Department of Medicine, 2013 Resident EL Amidon Award, Outstanding Teacher of the Year, Subspecialty Medicine

Laurie Whittaker Leclair, MD
Frymoyer Scholar July 2012-June 2014

Polly E. Parsons MD
American Thoracic Society Distinguished Achievement Award 2013

Renee Stapleton, MD, PhD
University of Vermont Medical Group Junior Researcher of the Year, 2012

Benjamin Suratt, MD
SPARK-VT, 2013

Charlotte Teneback, MD
Cystic Fibrosis Foundation award, just renewed for Year 2 of “Adult Care Excellence in Cystic Fibrosis

Daniel Weiss, MD, PhD
Department of Medicine, Distinguished Research Mentor Award

**Grants – list all active by faculty member, PI**

Anne Dixon, MD
U01 HL089464 *(originally funded as an ROI)* 9/30/09-6/30/14
Role (PI)
Study of Asthma and Nasal Steroids (STAN): This is a grant for a multicenter study for a randomized placebo controlled trial to determine the efficacy and mechanisms of action of nasal steroids in the treatment of asthma. The plan is to recruit 380 adults and children with poorly controlled asthma and chronic rhinosinusitis at 20 centers (affiliated with the American Lung Association Asthma Clinical Research Center network).

Jason Bates, PhD
R01 HL103405 “A multi-scale approach to airway hyperresponsiveness: from molecule to organ”, Role: Co-PI

P30 RR 031158 “Translational Research in Lung Biology and Disease”, Role: Co-Investigator and Core Leader (PI: Charles G. Irvin)

RC4 HL106625 “Bioengineering New Lungs from Cadaveric Lung Scaffolds”, Role: Co-Investigator (PI: D. Weiss)

Gerald Davis, MD
“A Randomized Double-Blind Placebo-Controlled, Phase 3 Study of the Safety and Efficacy of Pirfenidone in Patients with Idiopathic Pulmonary Fibrosis (PIPF-006 / CAPACITY) & open label extension. InterMune Inc. 2006 -
Gerald S. Davis, M.D. (Principal Investigator for site)

“A Phase 2, Multicenter, Multinational, Randomized, Double-Blind, Placebo-Controlled, Parallel-group, Dose-ranging Study Evaluating the Efficacy and Safety of CNTO 888 Administered Intravenously in Subjects with Idiopathic Pulmonary Fibrosis” Centocor R&D, Inc. 2009 -
Yolando Mageto, MD (Co-Principal Investigator for site)
Gerald S. Davis, M.D. (Principal Investigator for site)

“A Phase 2, Multicenter, Multinational, Randomized, Double-Blind, Placebo-Controlled, Parallel-group, Study Evaluating the Safety and Efficacy of Treatment with Ustekinumab or Golimumab in Subjects with Chronic Sarcoidosis” Centocor R&D, Inc. 2010 -
Yolando Mageto, MD (Co-Principal Investigator for site)
Gerald S. Davis, M.D. (Principal Investigator for site)

“A Phase 2, Sequential, Ascending Dose Study to Characterize the Safety, Tolerability, Pharmacokinetic and Biological Activity Of CC-930 In Idiopathic Pulmonary Fibrosis (IPF) Celgene Cooperation 2011 -
Yolando Mageto, MD (Principal Investigator for site)
Gerald S. Davis, MD (Co-Investigator for site)
“A Phase 2a, Open-Label, Single-Arm Study to Evaluate the Safety, Tolerability, and Efficacy of FG-3019 in Subjects with Idiopathic Pulmonary Fibrosis
Fibrogen Inc. 2011 -
Yolando Mageto, MD (Principal Investigator for site)
Gerald S. Davis, MD (Co-Investigator for site)

“A Phase 1, Open Label, Multi-Dose Study to Evaluate the Safety, Tolerability, and Biologic Effects of Three Doses of IW001 in Patients with Idiopathic Pulmonary Fibrosis (IPF)
Immuneworks 2011 -
Yolando Mageto, MD (Principal Investigator for site)
Gerald S. Davis, MD (Co-Investigator for site)

“PIPF-016 entitled “A Randomized, Double-Blind, Placebo-Controlled, Phase 3 Study of the Efficacy and Safety of Pirfenidone in Patients with Idiopathic Pulmonary Fibrosis”
InterMune Inc. 2011 -
Gerald S. Davis, MD (Principal Investigator for site)
Yolando Mageto, MD (Co-Investigator for site)

Charles Irvin, PhD
NIH/NHLBI T32 HL076122-01 (PI: C.G. Irvin) 04/01/09-03/31/14
Title: Multidisciplinary Training in Lung Biology
Role: Principle Investigator
The major goal of this training grant is to produce outstanding, independent biomedical scientists who investigate the mechanisms, manifestations, preventions and cures for lung disorders. This grant supports both pre and post-doctoral fellows.

NIH/NHLBI U13 RR022675-01 (PI: C.G. Irvin) 09/25/05-02/31/15
Title: National IDeA Symposium of Biomedical Research Excellence (NISBRE)
Role: Principal Investigator
The goals of this project are to: 1) Plan and organize a biennial scientific symposium to showcase research by IDeA (COBRE and INBRE) Investigators, 2) Develop and organize a series of technical workshops for IDeA scientists and 3) Enhance communications, share common experiences and establish research collaborations between multidisciplinary investigators.

American Lung Association (PI: C.G. Irvin) 07/01/09-06/30/14
Title: Asthma Clinical Research Center (ACRC)
Role: Principal Investigator of the Northern New England Consortium (NNEC)
ALA-ACRC
Major goal are to investigate the pathogenesis of asthma in the format of a multi-center network. I am the Oi of the NNEC study site and we currently are recruiting applicants for 3 NIH sponsored studies and industry sponsored studies.
NIH  P30 RR 03115801-01 (PI: C.G. Irvin) 08/15/10-06/30/15
Title: Translational Research in Lung Biology and Disease
Role: Principal Investigator
These goals are to train and enhance the competitiveness of promising, young faculty members through a PPG-like mechanism the NCRR IDeA sponsor COBRE mechanism. Three cores are also funded including: administrative, transgenic animals, and bioengineering.

NIH/NHLBI  U01’s and industry trials (Glaxo)
Title: Multicenter trials of the ALA: STAN, SOYA and CPAP
Role: NNEC (Northern New England Consortium) Co-investigator
This U01 grant funds the multicenter studies on asthma treatment: CPAP for asthma (CPAP), soy supplements (SOYA, LABA step-down study (LASST) and nasal steroids (STAN). The study of STAN is led by the NNEC (PI: A. Dixon). Our center meets or exceeds all performance and recruiting goals for all studies to date.

NIH U01 HL089464 (PI: Dixon) 09/30/2009-06/30/2014
Title: Study of Asthma and Nasal Steroids (STAN)
Role: Co-investigator
This is a grant for a multicenter study for a randomized placebo controlled trial to determine the efficacy and mechanisms of action of nasal steroids in the treatment of asthma. The plan is to recruit 380 adults and children with poorly controlled asthma and chronic rhinosinusitis at 20 centers (affiliated with the American Lung Association Asthma Clinical Research Center network).

NHLBI R01 HL089495 (PI: P Lehrer/F Wamboldt) 02/01/10 – 01/31/14
Title: “Heart Rate Variability Biofeedback: It’s Role in Asthma Therapeutics”
Role: Co-investigator
To test the effect of heart rate variability biofeedback versus a credible placebo biofeedback on airways hyperreactivity and inflammation as well as other asthma indices and outcomes. My role is to over read all lung function results, contribute to the MOP’s, study design, data interpretation and manuscript development.

David Kaminsky, MD
R34 HL113290-01, NIH/NHLBI
The Efficacy of Pranayama in COPD
PI: David Kaminsky, MD (10%)
05/01/12-04/30/15

American Lung Association - Asthma Clinical Research Center
PI: Charles G. Irvin, Ph.D.
Role on Project: Co-Investigator (5%)
7/1/04-6/30/14
University of Vermont NIH COBRE Translational Research in Lung Biology
PI: Irvin
Pilot Investigational Project: Predictors of Dyspnea/Fatigue Syndrome in Breast Cancer Survivors before and after an Exercise Intervention
PI: Suratt
Role on project: Co-PI (5%)
08/01/12-07/31/13

United Therapeutics, Inc.
Changes in the Diffusing Capacity of the Lung for Carbon Monoxide (DLCO) in Response to Vasodilator Therapy in Patients with Pulmonary Arterial Hypertension
PI: David Kaminsky, MD (< 5%)
5/1/13-4/30/14

University of Vermont NIH COBRE Translational Research in Lung Biology
PI: Irvin
Pilot Investigational Project: Non-invasive detection of airway injury associated with airway closure in asthmatic subjects
PI: Kaminsky (7%)
11/16/11-11/15/13

Laurie Whittaker Leclair, MD
Therapeutic Development Network (TDN) Award, Cystic Fibrosis Foundation
01/01/12-12/31/14
The goal of this award is to maintain clinical research infrastructure to facilitate participation in multicenter clinical trials in CF.
Role on Grant: co-PI

Frymoyer Scholar’s Award, University of Vermont
07/01/12-6/30/14
“Simulation Training for Multidisciplinary Intensive Care Unit Teams: Active Learning to Promote Best Practice”
The goal of this award is to create a novel interdisciplinary curriculum for providers of the medical intensive care unit team.
Role on Grant: PI

Coulter Foundation Research Grant, Griswold (PI), Coulter Foundation
07/01/08-07/31/12
The goal of this award is to determine if genetically engineered lysozyme is effective for the treatment of pulmonary infections
Role on Grant: Collaborator

Lennart Lundblad, PhD
Hoffman La-Roche, Inc.
Title: Bronchoconstriction and the role of mast cells
Role: Principal Investigator

1R01HL107291-A1 PI: Poynter
NIH/NHLBI
Role: Co-investigator
Serum Amyloid A3 in Allergic Asthma: An Endogenous Mediator of Disease Severity

2R01HL085646-05A1. PI: van der Vliet
NIH/NHLBI
Role: Co-investigator
Title: Dual Oxidase in Airway Epithelial Repair and Inflammation

NKT Therapeutics Inc.
Role: PI: L.K.A. Lundblad
To study the effects of selective elimination of iNKT cells on the asthmatic phenotype in experimental asthma.

Yolanda Mageto, MD MPH
Principal Investigator: A phase 2a, Open-Label, Single Arm Study to Evaluate the Safety, Tolerability and Efficacy of FG-3019 in Subjects with Idiopathic Pulmonary Fibrosis.

Principal Investigator: 52 week, double blind, randomized, placebo-controlled trial evaluating the effect of oral BIBF 1120, 150mg twice daily, on annual Forced Vital Capacity decline, in patients with Idiopathic Pulmonary Fibrosis.

Sub PI: A Randomized, Double-Blind, Placebo-controlled, phase 3 study of the efficacy and safety of Pirfenidone in patients with Idiopathic Pulmonary Fibrosis

Polly Parsons MD
IU01HL102547 – M. Boeckh (PI)
NIH:NHLBI
A Randomized Phase II Trial of CMV Prevention in Acute Lung Injury
UVM Site PI: P. Parsons
6/1/10-5/31/13

U01 HL108713-01- M. Matthey (PI)
NIH:NHLBI
"Allogeneic Human Mesenchymal Stem Cells for the Treatment of Acute Lung Injury".
UVM Site PI: P. Parsons
9/11-8/14
Matthew Poynter, PhD.
R01 (Poynter) 04/01/2012 – 03/31/2016
3.00 calendar
1R01HL107291-A1
Serum Amyloid A3 in Allergic Asthma: An Endogenous Mediator of Disease Severity

Clinical Innovator Award (Poynter) 07/01/2012 – 06/30/2015 1.8 calendar
FAMRI
Airway Epithelial Control of Asthma Severity

Renee Stapleton, MD, PhD
Pharmaconutrients as Therapies for Critical Illness: Zinc in Severe Sepsis
1 K23 HL105654, 10/1/11-9/30/15
NIH/NHLBI
Role: PI

Fletcher Allen Health Care/University of Vermont Medical Group Research Award
“Intravenous Zinc as a Therapy for Severe Sepsis: A Pilot Study”
12/1/10-11/30/12 (currently in no-cost extension)
Role: PI

National Palliative Care Research Center
“Changing the paradigm of CPR: Exploring Informed Assent”
7/1/10-6/30/12 (currently in no-cost extension)
Role: PI

“A Randomized double-Blind Placebo-Controlled Trial of Ganciclovir/Valganciclovir for Prevention of Cytomegalovirus Reactivation in Acute Lung Injury”
1U01HL102547-01, 7/01/10-6/30/14
Per-patient reimbursement
Role: Site-Co-PI and Steering Committee Member

Charlotte Teneback, MD
Program for Adult Care Excellence in Cystic Fibrosis, CF Foundation, $81,000 over 3 years

Benjamin Suratt, MD
SPARK-VT, Co-PI's Suratt & Stapleton
VLC COBRE, PI Suratt
LCCRO Pilot Award, Co-PI's Suratt & Dittus
COM BPG, PI Suratt
R01, PI Poynter
DOM Bridge, PI Suratt
The major goals of this project are to determine the optimal conditions of growth factors, oxygen tension, and cyclic mechanical stretch on development of functional lung tissue using de-cellularized mouse lungs as 3-dimensional scaffolds.

NHLBI R21HL108689 (DJ Weiss PI) 9/1/11-8/31/13
Submitted in response to RFA-HL-11-026, “New strategies for growing 3D tissues”
De-Cellularized Human Lungs for Ex Vivo Lung Regeneration
The goals of this project are: 1) To determine key differences between de-cellularized lung scaffolds obtained from different donors. 2) To optimize media and growth factor conditions for growth and differentiation of hMSCs, hESCs, and human iPS cells into functional three dimensional lung tissue when inoculated into de-cellularized human lung slices and apply this technology to whole de-cellularized human lungs.3) NIH/NHLBI

NIGMS COBRE P30 GM103532 (Irvin) 8/1/12- 7/31/13
Pilot Proposal DJ Weiss “Mechanisms of Stretch-Induced SPC Expression”
Role: Pilot Project PI
The major goals of this project are to assess effects of 2 and 3 dimensional stretch on SPC expression in type 2 alveolar epithelial cells and in distal airway progenitor cells.

NASA EPSCOR Research Grant (Hill) 9/1/09-8/31/13 (NCE)
NASA/EPSCOR (DJ Weiss co-investigator)
The impact of microgravity-grown Pseudomonas aeruginosa and Haemophilus influenzae on human lung cells: integration of virulence, lung cell immune responses, and the volatile metabolome
Role: Co-Investigator
The major goals of this project are to determine the effects of simulated microgravity on virulence factors expressed by Pseudomonas aeruginosa and Haemophilus influenzae and of simulated microgravity on the response of airway epithelial cell exposure to Pseudomonas aeruginosa and Haemophilus influenzae.

**Division of Rheumatology**  
Edward Leib, MD, Interim Director  
[http://www.med.uvm.edu/medicine/rheumatology](http://www.med.uvm.edu/medicine/rheumatology)

The members of the Division of Rheumatology and Clinical Immunology provide high quality patient care to residents of Vermont, up-state New York and other contingent areas, contribute to the teaching of residents of Fletcher Allen Health Care and medical students of the UVM College of Medicine, and perform both bench and clinical research. Our faculty consists of eight physicians, all of whom are board certified in Internal Medicine and Rheumatology, as well as a Physician’s Assistant. The combined Rheumatology staff and the Osteoporosis Center, a part of our Unit, welcomed nearly 1100 patients monthly, generating 1600 work RVUs monthly. In addition to bone densitometry, we have an on-site infusion center, and provide point of care musculoskeletal ultrasound. In addition to our Rheumatology services, we also offer a metabolic bone clinic, and in collaboration with our colleagues in the Pulmonary Division, we hold an Interstitial Lung Disease Clinic. We have well-established out-patient satellite clinics at Central Vermont Medical Center and Copley Hospital. We cover in-patient consults at FAHC on a 24-7 basis.

We have an accredited program for Rheumatology Fellowship, and accept one new Fellow annually in a competitive match. The Medical Residency Program has incorporated an out-patient Rheumatology rotation into the schedule of each Resident; they are given the opportunity of working with each of the Attendings. Several medical students have also elected a one-month rotation in our out-patient site. Annually, we participate in the Connections Course for 2nd year medical students, providing didactic teaching on a wide range of Rheumatic and Metabolic Bone Diseases and Musculoskeletal examination.

**Faculty**

**Edward Leib, MD**  
Professor of Medicine  
Division Chief, Rheumatology and Clinical Immunology  
Director, The Osteoporosis Center, FAHC

- Osteoporosis and Metabolic Bone Diseases
- Rheumatoid Arthritis

Dr. Leib has been a leading authority internationally on developing guidelines and positions on the appropriate use of Bone Densitometry. He has also been involved recently in clinical studies utilizing a new technology for ascertaining fracture risk called Trabecular Bone Score (TBS). In the past year, he has co-authored presentations on TBS at the annual meetings of the American College of Rheumatology and the American Society of Bone and Mineral Research as well as at the European Congress of Osteoporosis and Osteoarthritis. He also mentored Dr. YX Teh, a Fellow in Endocrinology, who presented a study on interpretation of bone densitometry of the spine at the annual meeting of the Endocrine Society. He directs the Osteoporosis Center and the
Metabolic Bone Clinic, and is certified to read Bone Densitometry by the International Society for Clinical Densitometry. Dr. Leib is on the Editorial Board of the Journal of Clinical Densitometry.

**Sheldon Cooper, MD, MACR**  
Professor of Medicine  
- Rheumatoid Arthritis  
- Osteoarthritis  
- Regional Rheumatic Syndromes

Dr. Cooper provides care for individuals with arthritis and musculoskeletal problems. He is Principal Investigator for trials that evaluate the effectiveness and mechanism of action of biologic drugs in the treatment of Rheumatoid Arthritis. The focus is on tocilizumab, a monoclonal antibody to the IL-6 receptor. Recent studies have demonstrated that IL-6 blockade reduces the levels of IgG4 antibodies to citrullinated peptides. Current studies are designed to understand how IL-6 blockade alters B-cell function and the role of IgG4 autoantibodies in the pathogenesis of RA.

**Ralph Budd, MD**  
Professor of Medicine, Microbiology & Molecular Genetics  
- Inflammatory Arthritis  
- Systemic Lupus Erythematosus

Dr. Budd and his team have been working on four projects related to the activity of caspases and c-FLIP in the immune system. The first demonstrated that the reason certain viruses took FLIP into their own genome as a short form was that it has the ability to turn off the anti-viral interferon response, whereas the full-length long form of c-FLIP does the opposite. Second, they have now linked the level of caspase activity in T cells to their state of metabolism. This has significant implications for which T cells survive an immune response to confer immune memory. The third area is a gene expression study of what genes significantly change expression levels during homeostatic proliferation of T cells. This has implications for why it is important to eliminate these T cells, lest they precipitate autoimmune sequelae. The final study is on gamma/delta T cells in Lyme arthritis, showing how the levels of c-FLIP in dendritic cells profoundly alter their ability to activate the gamma/delta T cells.

Dr. Budd is also an editor of the *Textbook of Rheumatology* 9th Edition, is the Director of the Vermont Center for Immunology and Infectious Diseases, has been a member of several NIH study sections, is a member of the NIH NIAID T32 grant study section, a member of the NIH Special Emphasis Panel and is a member of the Association of American Physicians.

Active Grants:  
NIH CORBE (Center of Biomedical Research Excellence)  
NIH T32 Training Grant
Bonita Libman, MD  
Professor of Medicine  
- Connective Tissue Disorders  
- Systemic Lupus  
- Rheumatoid Arthritis  

Dr. Libman is the Program Director for the Rheumatology Fellowship Training Program. She received a $25,000 Fellowship Training Award for 2013-2014 from the American College of Rheumatology Research Foundation. This is the fourth year in succession that the Division has received this award through the efforts of Dr. Libman. Dr. Libman is a member of the American College of Physicians MKSAP 17 Rheumatology Committee. She also chairs the University of Vermont College of Medicine Nominating Committee and the Fletcher Allen Health Care Medical Records Committee.

Chi Chi Lau, MD  
Associate Professor of Medicine  
- Systemic Lupus  
- Inflammatory arthritis  
- Connective tissue disorders  

Re-certified in Rheumatology, 2012.  
Obtained re-certification of CME for Rheumatology Rounds.

Dr. Lau has a very busy clinical practice providing excellent care to patients with a variety of complex rheumatic diseases. She is responsible for the units CME reporting and accounting.

Christine Jones, MD  
Assistant Professor of Medicine  
- Scleroderma  
- Interstitial Lung Disease and Rheumatic Disease  
- Myositis  

Last year, following a leave of absence to practice medicine at Thames Hospital in New Zealand, Dr. Jones returned to full time clinical practice at FAHC. She is Co-Founder of the Interstitial Lung Disease Clinic at Fletcher Allen, along with Yolanda Mageto, MD, and continues to participate in the Clinic. Dr. Jones is a member of the Faculty Development Committee at FAHC and is a certified Clinical Densitometrist. She received a teaching grant to work with Internal Medicine Residents, and will be teaching joint examination and injection skills later this year.
Nicole Hynes, MD
Assistant Professor of Medicine
- Inflammatory arthritis
- Connective tissue disorders
- Regional pain syndromes

Dr. Hynes participates in our clinical program on a half-time basis. For a number of years she has provided care in less well served areas at Copley Hospital and Central Vermont Medical Center.

James Trice, MD
Assistant Professor of Medicine
- Osteoporosis
- Inflammatory Arthritis
- Connective Tissue Disease
- Vasculitis
- Clinical Trials

Dr. Trice joined the faculty in 2011. He recently re-certified as a Certified Clinical Densitometrist (CCD) and reads bone densities for the Osteoporosis Center.

Fellows

Narandra Bethina, MD
Completed Fellowship, June, 2013

Tatiana Keck, MD
Completes Fellowship, June, 2014

Nurse Practitioners and Physician Assistants:

Jill Stevenson, PA-C

Publications – peer reviewed, chapters, etc.

Martin RA, Ather JL, Lundblad LK, Suratt BT, Boyson JE, Budd RC, Alcorn JF, Flavell RA, Eisenbarth SC, Poynter ME. Interleuken-1 receptor and caspase-1 are required for the Th17

Tiluckdharry L, Jones CH. Critical Care Secrets in the ICU. Rheumatology, Chapter 54. 2012.
