</table>
The Department of Medicine had another excellent year with significant contributions in all areas of our mission: clinical care, education, research, and service. To support all of those missions we continue to grow. This year we welcomed new faculty in Dermatology, Cardiology, Geriatrics, Hematology-Oncology, Primary Care Internal Medicine, Public Health, Pulmonary and Critical Care Medicine and Transplant Nephrology, new residents in Internal Medicine and Dermatology, fellows in all of our subspecialty areas, and graduate students and post-doctoral trainees in our laboratories. The Department expanded its clinical practice, increased its focus on high value cost conscious care and participated in the creation of service lines that extend across our partner hospitals. New clinical programs this year included multidisciplinary clinics for Kidney Stones, Transplant, Thyroid biopsy and Endocrine-Maternal Fetal Medicine. In addition, an Interventional Pulmonary program was launched and faculty from Pulmonary Medicine and Oncology participated in the creation of a multi-disciplinary Lung Cancer Screening Program. The Diabetes Care Pathway created by the faculty in Endocrinology and Primary Care was extended to all of the Medical Home sites and similar initiatives focused on asthma and COPD are being developed by the faculty in Pulmonary and Primary Care. The Dermatology faculty and residents extended their practice to include volunteering at the Community Health Center Free Clinic. The Choosing Wisely (high value cost conscious care) initiative continues to expand with new projects focused on decreasing x-rays in the ICU, reducing repeat echocardiograms on inpatients, eliminating duplicate Hepatitis A and C testing, and optimizing CT/PET scanning for breast cancer patients. The team also received a grant from the UVM Medical Group to expand Residents and Fellows engagement in quality improvement via a high value-cost conscious curricular experience. To further enhance patient care the department has been a leader in the creation of service lines in cardiovascular medicine and cancer which create a multidisciplinary, patient focused approach to care that extends across not only FAHC but our health care network.

Education is a core mission for the department and this year the department leadership had a retreat to develop goals and objectives focused on the enhancement of medical student, resident and fellow education. Faculty are engaging in new ways of teaching including an innovative, multidisciplinary simulation-based education program for the ICU team lead by Dr. Laurie Leclair and supported by a Frymoyer Scholarship award. This year we celebrated the first graduates of the Certificate in Public Health program and the launch of both the Masters in Public Health and the Certificate in Environmental Health programs under the leadership of Dr. Jan Carney. The faculty continued to participate extensively in the VIC curriculum and again received a number of honors and awards for their contributions to education. Dr. William Hopkins received the Foundations Course Director Award for the eighth consecutive year and the Dean Warshaw Integration Award for 2014. The Cardiovascular, Respiratory & Renal Systems course, directed by Dr. Hopkins and taught by many of our faculty won the award for Outstanding Foundations Course for the eighth time. In recognition of their contributions to
resident education, Dr. Bill Hopkins received the E.L. Amidon MD Award for Subspecialty Medicine and Dr. Shaden Eldakar-Hein received the William Osler, MD Award for General Internal Medicine. This year’s recipients of the Department of Medicine Mentor Awards were Drs. Ben Suratt and Matt Poynter.

The Department continues to be a nationally/internationally recognized leader in research with contributions to new scientific knowledge spanning from the bench to the bedside to the community. In aggregate, members of the department published more than 300 manuscripts, reviews, chapters and books, and were asked to serve on NIH study sections and advisory councils, FDA review panels and editorial boards. They are invited from around the world to present at scientific meetings and to be visiting professors, and they are elected to leadership in national societies. The SPARK VT program to encourage the translation of novel ideas into therapies, diagnostics, and devices that will improve health was expanded to include the Departments of Neurological Sciences and Obstetrics, Gynecology, and Reproductive Sciences. With the continued support of an exceptional panel of community consultants, the program included a series of educational workshops and the second round of applications resulted in four new projects receiving funding. Although research funding continues to be a challenge with the declining of the NIH budget, the faculty continue to be successful in obtaining grants.

Highlights this year include a large Federal subcontract from Johns Hopkins University entitled, “Operation of a Facility for the Study of Infectious Agents, Vaccines and Antimicrobials in Adult and Pediatric Human Subjects” award to Dr. Beth Kirkpatrick, Vaccine Trials Unit; the competitive renewal of a large multi-site study,” entitled “Etiology of Geographic and Racial Differences in Stroke,” awarded to Dr. Mary Cushman; and the competitive renewal of the Pulmonary Division’s and Vermont Lung Center’s NHLBI T32 training grant entitled, “Multidisciplinary Training in Lung Biology,” awarded to Dr. Charles Irvin.

In recognition of significant national contributions Dr. Renee Stapleton was awarded the Jo Rae Wright Award for Outstanding Science from the American Thoracic Society, Dr. Patricia King received the John H. Clark Award, recognizing exemplary leadership, commitment and contributions in advancing the public good at the state medical board level, Dr. Mary Cushman was awarded the American Health Association’s Council on Epidemiology and Prevention Distinguished Achievement Award, Dr. Ralph Budd received the Senior Researcher of the Year award from the University of Vermont Medical Group, and Dr. Phil Ades received the Presidential Recognition Award from the American Association of Cardiovascular and Pulmonary Rehabilitation; and Dr. Phil Ades and Dr. Martin LeWinter were named Distinguished Investigators by the Cardiovascular Research Institute of Vermont.
Administrative Team:

- Physician Leader and Chair: Polly E. Parsons, MD
- Vice Chairs:
  - Medical Education: Mark Levine, MD
  - Research: Charles Irvin, PhD
- Associate Chair for Academic Affairs: Benjamin Suratt, MD
- Director: Allen Mead
- Assistant Director: Tammy Stockton, RN
- Physician Executive Assistant: Laurie St.Gelais
- Financial Administrator: Fiona Daigle
- Grants Manager: Eric Gagnon
- Financial Associate: Marlene Frank

Department of Medicine, University of Vermont Division Chiefs

- R. Budd, MD, Immunobiology
- E. Leib, MD, Rheumatology
- N. Fukagawa, MD, Geriatrics (acting)
- R. Galbraith, MD, Clinical Pharmacology (acting)
- C. Grace, MD, Infectious Diseases
- G. Goldman, MD, Dermatology
- J. Leahy, MD and Joel Schnure, MD, Endocrinology, Metabolism, & Diabetes
- B. Littenberg, MD, General Internal Medicine
- A. Repp, MD, Primary Care Internal Medicine
- C. Verschraegen, MD, Hematology/Oncology
- A. Dixon, MD, Pulmonary and Critical Care Medicine
- C. Schneider, MD, Cardiology Unit and Vascular Biology Unit
- R. Solomon, MD, Nephrology
- J. Vecchio, MD, Gastroenterology

- Total faculty: 180
- By rank –
  - Assistant Professors: 85
  - Associate Professors: 49
  - Professors: 44
  - Research Associates: 2

- By gender – 73 female; 107 male
- By track –
  - Tenured: 39
  - Research Scholar Pathway: 10
  - Tenure Pathway: 6
  - Clinical Scholar Pathway: 121
  - Education Scholar Pathway: 4
Faculty Actions:

   FALL 2013 – 3 green sheet reappointments; 12 pink sheet reappointments; 4 promotions; 2 tenure and promotion.

   SPRING 2014 – 13 green sheet reappointments; 33 pink sheet reappointments, (11) volunteer faculty reappointments

Promotions:

Steven Grant, MD – Associate Professor
Marc Greenblatt, MD – Professor
Todd Holmes, MD – Associate Professor
Markus Meyer – Associate Professor (with tenure)
Kristen Pierce, MD – Associate Professor
Renee Stapleton, MD – Associate Professor (with tenure)

Standing Committees:

Medical Service
Patient Days: 48,298 (inpatients)
Ambulatory Care Visits: 224,767 (155,893 specialty and 68,874 primary care)

FAHC Practice Sites:
Ambulatory Care Center – Medicine has a presence in four Modules:
- Medicine: Infectious Disease (including Travel Medicine), Osteoporosis Center, Rheumatology and Clinical Immunology, and Pulmonary (including PFTs), Lung Cancer Multidisciplinary Clinic
- Dermatology including Mohs Surgery and Melanoma Multidisciplinary Clinic
- Cancer Center: Hematology/Oncology, Breast Care Center and Multidisciplinary Clinic, and Head and Neck Cancer Multidisciplinary Clinic
- Surgery: Gastroenterology, Thrombosis Center [part of Hem/Onc and Vascular Surgery], and Gastrointestinal Multidisciplinary Center

University Health Center
- Nephrology

Tilley Drive, South Burlington
- Cardiology and Cardiac Rehabilitation, Oncology Rehabilitation, Pulmonary Rehabilitation
  - Endocrinology and Endocrine Clinical Research

FAHC Outreach Sites:
Bennington – Hematology/Oncology (Familial Cancer Program)
Brattleboro (BMH) – Infectious Disease
Morrisville (Copley Hospital) – Hem/Onc, Rheumatology
St. Albans (Northwestern Medical Center) – Nephrology and Cardiology
St. Johnsbury (Northeastern Medical Center) - Infectious Disease
Barre (Central Vermont) – Rheumatology, Nephrology, Dermatology (Telederm)
Rutland (Rutland Regional) – Nephrology, Cardiology, Infectious Disease
Middlebury (Porter) – Cardiology, Hem/Onc
Newport (Newport Memorial) – Nephrology
Malone (Alice Hyde) – Cardiology
Ticonderoga (Moses Luddington Hospital) – Dermatology
Saranac Lake (Adirondack Medical Center) – Cardiology, Hematology/Oncology
Canton- Potsdam – Cardiology
Massena (MMH) – Cardiology
Plattsburgh (CVPH) – Cardiology, Endocrinology

**Primary Care Sites:**
Aesculapious (Timberlane, South Burlington)
Given Essex (Essex Junction)
Given Burlington (University Health Center)
Given Williston (Blair Park, Williston)

The Department also participates in many multidisciplinary clinics:

**Department of Medicine Multidisciplinary Clinics** (examples of participants in parentheses)

**Active**
- Maternal Fetal Medicine/Gestational Diabetes (Endocrine, Women’s)
- Upper GI MDC (Gastroenterology, Hematology/Oncology, Rad. Oncology, Surgery)
- Lung MDC (Pulmonary, Surgery, Radiation Oncology, Hematology/Oncology)
- Breast MDC (Hematology/Oncology, Radiology, Surgery)
- Hem Malignancy (Hematology/Oncology, Pathology)
- GYN Tumor Board (Hematology/Oncology, Women’s, Pathology)
- Brain Tumor Board (Hematology/Oncology, Surgery, Pathology)
- Sarcoma MDC (Hematology/Oncology, Orthopaedics)
- ENT MDC (Hematology/Oncology, Surgery)
- GU MDC (Hematology/Oncology, Surgery)
- Melanoma MDC (Dermatology, Surgery, Hematology/Oncology)
- Interstitial Lung Disease (Pulmonary and Rheumatology)
- Cystic Fibrosis (Pulmonary, Endocrinology, Social Work, Nutritional Services)
- Bone Metabolism (Endocrinology and Rheumatology)
- Stone Clinic (Nephrology and Urology)
- Transplant Clinic (Nephrology and Transplant Surgery)
- Oncology Rehabilitation (Hematology/Oncology, Cardiology, Physical Therapy)
- Pulmonary Rehabilitation (Pulmonary, Cardiology, and Physical Therapy)
- Heart Failure (Cardiology and Primary Care)
- TAVR (Cardiology and Surgery)

Under Development
- Dermatology and OB/GYN

Medical Education

1. Leadership

Mark A Levine, M.D., F.A.C.P – Program Director

Mary Ramundo, M.D. – Associate Program Director

Mark Pasanen, M.D., F.A.C.P – Associate Program Director
2. Summary of Program Highlights 2013-2014

Administrative changes:
Dr. Mark Levine, who had served as Program Director for over 20 years, was named the Designated Institutional Official and Associate Dean for Graduate Medical Education. In May 2014, Dr. Mark Pasanen assumed the role of Program Director for the Internal Medicine Residency and in July 2014, Dr. Shaden Eldakar-Hein was appointed to Associate Program Director, joining Dr. Mary Ramundo in that role.

Enhancements to Curriculum:
On July 10, 2014, the Department of Medicine had a leadership retreat, in which the focus was the education of our learners. This jump-started several initiatives to improve the quality of our teaching sessions. The successful separation of inpatient and outpatient duties has allowed for continued educational innovation. Over the year, significant effort went into refining the curriculum with an enhanced emphasis on preparation for the ABIM certification exam, including incorporation of MKSAP questions into morning report and teaching sessions. In addition, the ethics curriculum has been re-designed and sessions offering an opportunity for personal and professional reflection were added.

Continuity Clinic Revitalization: In continuity clinic, small group learning sessions continue to be developed and are extremely well-received by residents. Given the importance of supporting a culture of high value care, residents were introduced to the Choosing Wisely initiative through interactive teaching sessions. In addition, on-line modules introducing patient safety concepts were initiated. Residents were educated on practice management, and have initiated personal practice improvement projects.

Improved Communication:
As the program has expanded over the last few years, the need for an improved communication strategy was identified. This led to the development of a new secure website for the Internal Medicine residency. This website includes numerous resources for residents, including links to recent cases and teaching discussions, schedules and more general resources (such as the “Survival Pack”). In addition, weekly emails are now sent to all the residents, outlining the highlights of the past week, links to relevant clinical information and the schedule for the upcoming week.
Improvements in Evaluation/Assessment:
This past year, led by Dr. Ramundo, we successfully implemented a milestone-based annual resident review. To do this, we required development and increased use of focused assessments and direct observation. Faculty development on the use of these focused assessments has been initiated. There has been substantial work utilizing the New Innovations platform to create a user-friendly educational portfolio for residents.

Scheduling improvements:
Given the complexity and stresses of resident scheduling, increased flexibility was a goal. In the last year, we instituted a policy of floating days off for residents while on General Medicine wards. In addition, we were able to successfully implement night float coverage for cardiology, essentially eliminating overnight call for our residents.

3. List of All Residents

PGY-3
Disantis, Robert     Penn State University
Fashoyin, Adedayo    University of Wisconsin
Fitzgerald, Alison    University of Vermont
Houghton, Damon      University of North Carolina
Keveson, Benjamin    New York University
Leclair, Timothy     University of Vermont

McMahon, Patrick    SUNY - Upstate

4. Resident Awards

- The Harriet P. Dustan, M.D. Award
  Deva Sharma, M.D. and Samuel Merrill, M.D.

- The Frank L. Babbott, M.D. Memorial Award
  Deva Sharma, M.D.

- E.L. Amidon, M.D. Award
  Outstanding Teacher of the Year
  Subspeciality Medicine
  William Hopkins, M.D.

- William Osler, M.D. Award
  Outstanding Teacher of the Year
5. Resident presentations at local/national meetings and publications

Schneider, DJ, Agarwal Z, Seecheran N, Keating FK, Gogo P. Pharmacodynamic Effects during the transition from Cangrelor to Ticagrelor and from Ticagrelor to Cangrelor. JACC Intervention 2014; 7(4):435-442.

Disantis, Robert MD Abdominal Pain and Mass in a Patient with History of Seizures, presented at the Vermont/ New Hampshire ACP chapter meeting, October 25, 2013

Adedayo Fashoyin MD, Benjamin Littenberg MD Vitamin D, Bone Mineral Density and Mortality in Adults presented at the Annual G3 Research Day, May 23, 2014

Alison Fitzgerald, M.D. Improving the Autopsy Rate at Fletcher Allen Health Care. What are the Barriers? What are The Solutions? presented at the Annual G3 Research Day, May 23, 2014

Damon Houghton, M.D. Prediction of Hospital Acquired Venous Thrombosis in Cancer Patients using the MITH Score presented at the American Society of Hematology in New Orleans, LA December of 2013

Damon Houghton MD, Michael DeSarno MS, Peter Callas PhD, Allen Repp MD, Mary Cushman MD MSc, Samuel Merrill MD PhD, John Winters MD, Neil Zakai MD MSc Validation of Medical Inpatient Thrombosis Risk Assessment Model (MITH Study) Presented at the Northern New England Clinical Oncology Society in Stowe, VT November of 2013 and presented at the Annual G3 Research Day, May 23, 2014

Benjamin Keveson MD, Pamela Stevens RN MSN, Justin Stinnett-Donnelly MD MS, Ryan Clouser DO, Gilman Allen MD Choosing Wisely at Fletcher Allen Health Care – Facilitating Change Through Resident Involvement and Education: Reducing Daily Chest X-rays in Adult Intensive Care presented at the Annual G3 Research Day, May 23, 2014

Timothy Leclair MD, Neil Zakai MD, Mike Desarno, Jan Bunn PhD, Renee Stapleton MD, PhD Vitamin D Supplementation and Outcomes in Critically Ill Intubated Patients in the Medical Intensive Care Unit presented at the Annual G3 Research Day, May 23, 2014

Menson, K Clot Busters: A Case of Acquired Hemophilia A Presented at the Vermont/New Hampshire ACP Chapter Meeting, October 25, 2013

David Rand, DO MPH, Julie Lin, MD, Elizabeth Zeeck MD, Deborah Cook MD  Granulomatous Tattoo Reaction as a Manifestation of Sarcoidosis presented at the Society of General Internal Medicine Meeting in San Diego, CA  April of 2014

Samreen Raza, MD  Hearts and Spades: A Rare Case of Apical Hypertrophic Cardiomyopathy (Yamaguchi’s syndrome) presented at the Vermont/New Hampshire ACP Chapter Meeting, October 25, 2013

Samreen Raza, M.D.  Shifting the Goalposts: Updating the Appropriate Use Criteria for Radionuclide Imaging May Increase the Proportion of Appropriately Ordered Tests presented at the Annual G3 Research Day, May 23, 2014

Solomon BL, Rounds T, Wood M  Contribution of Extended Family History in Assessment of Risk for Breast and Colon Cancer  Presented at the American Society Cancer Organization

Kystine Spiess DO, Mary Ramundo MD, Richard Pinckney MD MPH, G Sharp, K Perez, W Yagoda

6. Graduating Residents – where are they going/ which fellowships

Robert Disantis, M.D. Hospitalist at Vanderbilt in Tennessee
Adedayo Fashoyin, M.D. Geriatric Fellowship at Duke University in North Carolina
Alison Fitzgerald, M.D. Hospitalist in Vermont
Damon Houghton, M.D. Hematology/Oncology Fellowship at the University of North Carolina
Benjamin Keveson, M.D. Pulmonary/Critical Care Fellowship at FAHC
Timothy Leclair, m.D. Pulmonary/Critical Care Fellowship at FAHC
Samuel Merrill, M.D. Chief Medical Resident, Applying for Hematology/Oncology Fellowship for 2015-2016
Benjamin Parkhurst, M.D. Hospitalist in North Country Hospital in Newport, Vermont
David Rand, M.D. Hospitalist at Porter Medical Center in Middlebury, Vermont
Samreen Raza, M.D. Chief Medical Resident, applying for Cardiology Fellowship For 2015-2016
Deva Sharma, M.D. Research Fellowship at the University of Pittsburgh
Heather Shenk, M.D. Chief Medical Resident
Kystine Spiess, M.D. Infectious Disease Fellowship at FAHC
Derinda Trobaugh, M.D. Hospitalist Job in Arkansas

During 2014 the Cardiovascular Division continued integration efforts among members of Fletcher Allen Partners. In January 2014 we began a coordinated effort to establish a Cardiovascular Service Line within Fletcher Allen Health Care and across Fletcher Allen Partners. A Cardiovascular Service Line Advisory Group was formed and meets on a monthly basis. Products of that discussion include a charter for the service line as well as position descriptions for the medical director and administrative director. David Schneider has agreed to serve as the medical director for the service line. In April 2014, our cardiology EPACs, Merge, was deployed at Central Vermont Medical Center. In June 2014, the three interventional cardiologist at Champlain Valley Physicians Hospital joined the Cardiovascular Division and UVMMG. Eric Gauthier, William Bradley, and Timothy Garrand will continue their primary clinical activity in Plattsburgh. Regional quality assurance meetings continue on a monthly basis. In May 2014, we received approval from the Green Mountain Care Board to update and replace equipment in 2 cardiovascular catheterization laboratories. These laboratories will support our growing structural heart disease program. In July 2014, we implanted our 100th aortic valve with the use of transcatheter aortic valve techniques. We continue a robust clinical and translational research program. Dr. Spector is in the final stages of negotiation with a company that will use his research findings to guide ablation of atrial fibrillation. Our research continues to benefit patients. We are actively involved in multiple trials of new pharmacologic agents as well as devices. For example, we are testing a novel treatment to lower cholesterol in patients who have had a myocardial infarction. In addition, we performed a series of small studies to determine the optimal transition between a new intravenous antiplatelet agent and longer term oral antiplatelet agents. In total, the Cardiovascular Division published 52 manuscripts and chapters during the past year. On the education front, Dr. Hopkins continues a key role in the medical student curriculum. He was selected for the eighth consecutive year by the medical students of the College of Medicine as the
recipient of the Course Director of the year. The course he directed, Cardiovascular, Respiratory, and Renal, has been selected again as best course. Dr. Hopkins was also once again the recipient of the best clinical teacher of the year. Dr. Gogo was selected by the fellows in the Cardiovascular Training Program as the teacher of the year. Dr. Hopkins was the recipient of the E. L. Amidon, MD Award for Outstanding Teacher of the Year in Subspecialty Medicine. Dr. Dauerman is the Chair of the Clinical Cardiology Council Programming of the American Heart Association National Scientific Meeting.
Faculty

David Schneider, MD
Professor of Medicine
Director, Cardiovascular Division
Research and Clinical Interests
  - thrombosis
  - platelet biology
  - atherosclerosis/ischemic heart disease
  - preventive cardiology

Philip Ades, MD
Professor of Medicine
Director, Cardiac Rehabilitation
Research and Clinical Interests
  - cardiac Rehabilitation
  - preventive cardiology
  - ischemic heart disease

William Bradley, MD
Interventional Cardiology
Clinical Interests
  - ischemic heart disease
  - cardiac catheterization
  - coronary intervention

Mark Capeless, MD
Professor of Medicine
Director, Cardiovascular Disease Training Program
Director, Clinic Electrophysiology Training Program
Research and Clinical Interests
  - clinical cardiac electrophysiology

Kevin Carey, MD
Assistant Professor of Medicine
Research and Clinical Interests
  - coronary intervention
  - cardiac catheterization
  - ischemic heart disease

Harold Dauerman, MD
Professor of Medicine
  - coronary intervention
  - cardiac catheterization
  - peripheral vascular intervention
ischemic heart disease
vascular biology

John Fitzgerald, MD
Assistant Professor of Medicine
Research and Clinical Interests
- preventive cardiology
- ischemic heart disease
- valvular heart disease

Timothy Garrand, MD
Interventional Cardiology
Clinical Interests
- ischemic heart disease
- cardiac catheterization
- coronary intervention

Eric Gauthier, MD
Assistant Professor of Medicine
Clinical Interests
- ischemic heart disease
- cardiac catheterization
- coronary intervention

Prospero Gogo, MD
Associate Professor of Medicine
Director, Cardiovascular Catheterization Laboratory
Associate Director Interventional Cardiology Training Program
Research and Clinical Interests
- cardiac catheterization
- percutaneous coronary intervention
- percutaneous treatment of structural heart disease

William Hopkins, MD
Associate Professor of Medicine
Director, Pulmonary Hypertension and Adult Congenital Heart Disease Program
Research and Clinical Interests
- pulmonary hypertension
- adult congenital heart disease
- genetic heart disease
- valvular heart disease
- echocardiography

Friederike Keating, MD
Associate Professor of Medicine
Director, Nuclear Cardiology
Director, Cardiac Care Unit
Research and Clinical Interests
- cardiovascular disease in women
- cardiovascular imaging
- thrombosis
- platelet biology

Robert J. Kelm, Jr. PhD
Associate Professor of Medicine
Associate Professor of Biochemistry
- Molecular regulation of myofibroblast and smooth muscle cell differentiation
- Mechanisms of dysfunctional cardiovascular remodeling
- Pathobiology of acute myeloid leukemia
- Biochemistry of purine-rich element binding proteins

Martin M. LeWinter, MD
Professor of Medicine and Molecular Physiology and Biophysics
Director, Heart Failure and Cardiomyopathy Program
Research and Clinical Interests
- cardiomyopathy
- coronary heart disease
- valvular heart disease
- heart failure
- pericardial disease

Robert Lobel, MD
Assistant Professor of Medicine
Research and Clinical Interests
- clinical cardiac electrophysiology
- catheter ablation
- pacemaker and ICD implantation

Daniel Lustgarten, MD
Associate Professor of Medicine:
Research Interests
- clinical cardiac electrophysiology
- catheter ablation
- pacemaker and ICD implantation

Markus Meyer, MD
Assistant Professor of Medicine
Research and Clinical Interests
- cardiac imaging and stress testing
- general cardiology
- heart failure and cardiomyopathy

Peter Spector, MD  
Professor of Medicine  
Director, Cardiac Electrophysiology  
Research and Clinical Interests  
  - catheter ablation  
  - atrial fibrillation

Jeffrey Spees, PhD  
Associate Professor of Medicine  
Director, Stem Cell Core Facility  
Research and Clinical Interests  
  - adult stem cell biology  
  - regenerative medicine

Edward Terrien, MD  
Associate Professor of Medicine  
Director, Ambulatory Cardiovascular Clinic  
Research and Clinical Interests  
  - coronary intervention  
  - cardiac catheterization  
  - peripheral vascular intervention  
  - ischemic heart disease

Marc Tischler, MD  
Associate Professor of Medicine  
Director, Echocardiography Laboratory  
  - magnetic resonance imaging and echocardiography  
  - valvular heart disease  
  - ischemic heart disease  
  - congestive heart failure

Michael Toth, PhD  
Associate Professor of Medicine  
Research and Clinical Interests  
  - skeletal muscle physiology  
  - heart failure  
  - aging  
  - physical disability  
  - muscle disuse

Peter Van Buren, MD  
Associate Professor of Medicine
Associate Professor of Molecular Physiology and Biophysics
Associate Director Cardiovascular Training Program
Research and Clinical Interests
- specialist in heart failure
- echocardiography
- nuclear cardiology

Matthew Watkins, MD
Professor of Medicine
Director of Interventional Cardiology
Director of Interventional Cardiology Fellowship Training Program
Research and Clinical Interests
- interventional cardiology
- ischemic heart disease

Joseph Winget, MD
Associate Professor of Medicine
- clinical cardiac electrophysiology
- catheter ablation
- pacemaker and ICD implantation

Division of Dermatology
Glenn Goldman, MD, Director
http://www.med.uvm.edu/medicine/Dermatology

Dermatology at Fletcher Allen Health Care is a division of Medicine with four general medical dermatologists, four surgical dermatologists, and four experienced physician assistants. We provide general dermatology care to the community as well as highly-specialized consultation with particular strengths in the treatment of psoriasis, cutaneous lupus, dermatomyositis, cutaneous lymphoma, and all forms of skin cancer including melanoma. We also provide cosmetic services for lasers and fillers in an ever growing area of dermatology. Our new wing on EP-3 is up and running smoothly. For 2014-2015 we have hired our Chief Resident Dr. Elizabeth Zeeck who will begin as an Assistant Professor and will practice general dermatology. This year we will have approximately 29,300 patient visits producing about 61,000 wRVU.

The additions of Dr. Joseph Pierson and Dr. Laura McGevna have been a tremendous addition to our faculty. Dr. McGevna is developing a women’s health dermatology clinic in conjunction with the Department of Obstetrics and Gynecology. Dr. Pierson hit the ground running and has greatly improved what was already a very strong Residency Program. Dr. Pierson brings a great passion for education, and he has guided our training program through the transitions to the ACGME Milestones. We continue to secure multiple donations to our residency program which allow us to provide a very high level of financial support for our trainees.

On the merits of his excellent teaching and national recognition as a leader in cutaneous surgery, Dr. Todd Holmes was promoted to Associate Professor of Dermatology / Medicine. Dr. Glenn Goldman was given an appointment as a Professor in the Department of Surgery.

Our last Procedural Dermatology fellow Dr. Vanessa Lichon presented a fabulous research project at the Annual Meeting of the American College of Mohs Surgery. This study of rotation flap tension vectors in a Porcine Model was selected for the prestigious Tromovitch Award as the best fellow research project in the United States for 2013-2014. This work continues, and in September Dr. Lichon will return to complete a further set of experiments with Dr. Goldman and with one of the Otolaryngology residents, Dr. Christine Cairns. The incoming surgery fellow, Dr. Nicole Howe has obtained a grant from the American Society for Dermatologic Surgery and she will be collaborating with Dr. Goldman and the ASDS to develop criteria and a curriculum for international fellowships in Dermatologic Surgery.

We continue to volunteer at the Community Health Center Free Clinic. Each month, an attending physician supervises the residents and Physician Assistants in the provision of free care to patients at the Community Health Center in Burlington. This provides a service to the community and is also a superior experience for our residents and fellow, who are able to participate in the care of an underserved population.
In January we held the 25th Annual Winter Dermatology Conference in Stowe. Established by Paul Krusinski, MD, this conference remains popular and relevant despite its long tenure. This coming year we will be fortunate to have several national leaders lecturing at the conference and we are expecting a large turnout for this year’s event.

Dr. Glenn Goldman continues to hold numerous national leadership positions. He continues to be the ACMS advisor to the American Medical Association Resource Based Relative Value Utilization Committee. He is writing a second textbook of cutaneous surgery with Dr. Kavita Miriwalla. Dr. Holmes and Dr. Goldman remain very active in volunteer international work for dermatologic surgery through the American Society for Dermatologic Surgery. This fall Dr. Goldman will travel to South Africa to work with The Dermatologic & Aesthetic Surgery International League to create a joint website portal with the American Society for Dermatologic Surgery. Next fall Dr. Goldman and Dr. Holmes will both visit Cape Town, South Africa as lecturers and surgeons, performing Mohs surgery and reconstruction and assisting in the training of South African Dermatologic Surgeons.

Several of our attending physicians are regular participants in Fletcher Allen administrative processes. Dr. Goldman, Dr. Weinberger, Dr. Holmes, and Dr. Pierson serve on a number of FAHC committees. Dr. Julie Lin continues her involvement in PRISM, where she is the PRISM representative from the Department of Medicine. She is working with Northwest Medical Center to develop a dedicated teledermatology program. Dr. Lin has completed her degree and boards in bioinformatics.

Our residency and procedural dermatology fellowship continue to be successful and rewarding. In the last two years two of our graduating residents have stayed on as faculty in dermatology at Fletcher Allen Health Care / University of Vermont College of Medicine. The residency remains highly sought after by students from around the country. On average we receive over 250 applications for our residency spots annually, and approximately 40 applications are received for our single procedural dermatology fellowship slot. We frequently host residents from other institutions for rotations in subspecialty areas of dermatology, especially in surgery, in which Dr. Goldman is a preceptor for the American Society of Dermatologic Surgery.

Residents and fellows present regularly at our local and regional meetings, and the senior residents and fellows are currently involved in a number of publications.

Each month we host several third or fourth year students for rotations in dermatology. On average one or two University of Vermont medical students per year choose to enter the field of dermatology. Due to the tremendously-competitive nature of dermatology as a specialty, each student requires careful guidance and assistance in procuring a residency. As usual, last year our UVM student interested in dermatology matched at an excellent training program. This year we have several outstanding candidates and expect that they will match at superior programs.
Faculty

**Glenn Goldman, MD**
Professor of Medicine  
Director, Dermatology Division  
Director, Procedural Dermatology Program  
RUC Representative, American College Of Mohs Surgery
- Mohs Surgery and Reconstructive Surgery
- Management of high-risk skin cancers
- Cosmetic Dermatology
- Procedural Dermatology Education
- National Health Care Policy
- Continuing Medical Education
- International Dermatologic Surgery
- Flap tension in vivo research

**Jamie Alpert, MD**
Associate Professor of Medicine  
Chair, Part-Time Faculty Actions Committee
- General Medical Dermatology

**Todd Holmes, MD**
Associate Professor of Medicine
- Surgical Dermatology and Cutaneous Oncology
- Mohs and Reconstructive Surgery
- Resident and Fellow Education
- International Education in dermatologic surgery

**Julie Lin, MD**
Assistant Professor of Medicine  
Department of Medicine PRISM Representative
- Cutaneous Lymphoma
- Electronic Medical Records
- Bioinformatics
- Teledermatology

Nicole Howe, MD
Procedural Dermatology Fellow 2013-2014

Residents

Kendra Lesiak, MD   PGY-4 / Chief
Andrew Tegeder, MD   PGY-4 / Chief
Jeremy Hugh, MD   PGY-3
Elizabeth Lester, MD   PGY-3
Physician Assistants:

Deb Roseman, PA:

Deb has been with us for over ten years. She has decades of experience as a dermatology physician assistant and has a following of thousands of patients for whom she provides care.

Anne Klein, PA

Anne is a surgical PA, and works with the dermatologic surgeons daily. She trained for years with a plastic surgeon and has exceptional procedural skills. A testament to her skill is that physicians refer patients to her regularly for surgical excisions.

Rich Callahan, PA

Rich is experienced in dermatology and provides both medical and minor surgical dermatology care. He brings with him many patients from his former practice.

Christine Sowle, PA

Christine trained with us and stayed on as a dermatology PA. She has been working with us for almost ten years and has a large following of thousands of patients who see her on a regular basis.

Study Sections and Federal Advisory Boards:

American Medical Association
Dr. Goldman – RUC representative for the American College of Mohs Surgery

Dermatology Foundation
Dr. Goldman – Leader’s Society State / Regional Chair
Dr. Pierson – Leader’s Society State / Regional Vice Chair

American College of Mohs Surgery
Dr. Goldman – Fellowship Training Committee

Publications – Books, Peer reviewed, chapters,

The Division of Endocrinology. Diabetes and Metabolism had 5 physicians, 3 nurse practitioners, 3 certified diabetes educators (CDEs) during the 2013-2014 academic year.

The Division performs consultative and ongoing endocrine care for Vermonters and upstate New Yorkers. The largest portion of our clinical enterprise is delivering diabetes care to both in-patients and out-patients. Our mission is to combine cutting edge research in basic metabolism and cell biology and physiology while establishing an exemplary center for clinically excellent patient care. Our goal is to strive to deliver seamless system-wide diabetes care within the Fletcher Allen Partners network. To that end, we have initiated an Endocrine Service at CVPH, in Plattsburgh, NY that is staffed by one of our Endocrinologists.

Our “Diabetes Initiative,” recently developed in conjunction with PCIM and Family Medicine, is in use at the 9 Medical Home sites at FAHC. These pathways are incorporated into a model for the integration of specialty and primary care for chronic diseases, diabetes being the initial focus. These roadmaps will allow for state of the art diabetes management to reach more patients with diabetes at FAHC and eventually in the State of Vermont and in our general catchment area. The hallmarks of this effort are to facilitate seamless care between specialty and primary care and to allow all the patients to have complete diabetes education. In addition, we have developed algorithms for intensive in-patient diabetes management. We also provide more intensified regimens for the growing cohort of individuals on insulin infusion pumps. Our diabetes care team offers classes to individuals, families, and groups to assist in achieving targeted glycemic control for all patients with diabetes. In cooperation with, and imbedded in the Community Health Teams, our Certified Diabetes Educators are able to reach many more individuals cared for within the FAHC system.

The Vermont Regional Diabetes Center is an American Diabetes Association accredited diabetes education program.

Three of our attending participate in thyroid ultrasonography and have developed a thyroid fine needle aspiration (FNA) biopsy clinic. Together with the cytopathology faculty and trainees, this service has had overwhelming success in the early diagnosis and treatment of thyroid cancer.

Other areas of clinical interest include metabolic bone disease and osteoporosis, hypogonadism, and pituitary and adrenal disease. Overall, the clinic is flourishing in our new Tilley Drive setting.
with 14,000 visits per year – fourth in the Department of Medicine. We are currently recruiting two new faculty members to augment our clinical and research capabilities.

The Division’s research efforts have focused on beta cell function, intracellular metabolism and life cycle. Dr. Leahy’s work in this area is world renown. We are also involved in clinical research and clinical trials involving incretin biology, new product development, hypertension, obesity, insulin resistance, and cardiovascular outcomes.

Our educational mission continues to expand. Each year we train two Fellows in Endocrinology and approximately 30 students rotate through the service—and the number of residents electing endocrinology is on the increase.

**Faculty**

**John (Jack) Leahy, MD**  
Professor of Medicine  
Co-Director, Endocrinology, Diabetes and Metabolism Division  
- Diabetes mellitus

Major Faculty Awards

Dhananjay Gupta
- American Diabetes Association – Young Investigator Travel Award for highest score on a research abstract

Grants

Dhananjay Gupta
- Manipulating β-cell Inflammation and Survival via Cholinergic Pathways (Jetton, PI)
09/01/13-8/31/16
Gupta, Co-I
Juvenile Diabetes Research Foundation International

- Studying the Role of Dairy-Derived Bioactive Lipids as a Nutritional Intervention Targeting the Pathogenesis of Diabetes Mellitus (Kraft, PI)
  5/1/14-8/31/15
  Gupta, Co-I
  University of Vermont REACH Award

- Exploring the role of branched-chain fatty acids as a diabetes-preventive nutriceutical (Jetton, PI)
  01/01/14-12/31/14
  Gupta, Co-I
  Diabetes Action Research Foundation

Thomas Jetton

- Manipulating β-cell Inflammation and Survival via Cholinergic Pathways (PI)
  09/01/13-8/31/16
  Juvenile Diabetes Research Foundation International

- Studying the Role of Dairy-Derived Bioactive Lipids as a Nutritional Intervention Targeting the Pathogenesis of Diabetes Mellitus (Kraft, PI)
  5/1/14-8/31/15
  Jetton, Co-I
  University of Vermont REACH Award

- Exploring the role of branched-chain fatty acids as a diabetes-preventive nutriceutical (PI)
  01/01/14-12/31/14
  Diabetes Action Research Foundation

- β-cell Compensation in Partial Pancreatectomy Mice (Leahy, PI)
  2/15/00 – 8/31/14
  Jetton, Co-I
  NIH/NIDDK R01 DK56818

Jack Leahy

- β-cell Compensation in Partial Pancreatectomy Mice (PI)
  2/15/00-8/31/14
  NIH R01 DK56818
Annis Marney

- The Utility of Continuous Glucose Monitoring (CGM) in Detecting Cardiac Autonomic Neuropathy (CAN) and its Impact on Glucose Variability and Cardiac Function in Patients with Type 2 Diabetes Mellitus and Heart Failure (PI)
  3/2013-3/2015
  Medtronic (Investigator Initiated Study)

Muriel Nathan

- A Quality Initiative to Improve Glycemic Control in Diabetic and Non-diabetic Patients after Lower Extremity Bypass (Bertges, PI)
  2012-2015
  Nathan, Co-I
  University of Vermont Medical Group Grant

- Detection and Treatment of Celiac Disease in Patients with Hypothyroidism (Zubarik, PI)
  4/12/12-4/12/14
  Nathan, Co-I
  Department of Medicine

Publications

Alvi MM, Gilbert MP, Marney AM, Schnure JJ. Bactrim induced severe hypoglycemia in a diet-controlled diabetic patient with history of gastric bypass (RYGB) surgery – Use of serum drug & insulin levels for diagnosis. Poster presented at ICE/ENDO 2014, the 96th Annual
The Gastroenterology and Hepatology Unit at the University of Vermont College of Medicine/University of Vermont Medical Center has eight full-time Faculty members, three GI Fellows and two Ph.D.’s. Clinical care, teaching, and both basic science and clinical research are all major elements of the GI Unit.

Cutting edge clinical care and state of the art endoscopy are just two components of the Faculty’s responsibilities. A modern 8-room Endoscopy Center is equipped with the latest HD endoscopes and monitors, to allow the performance of over 12,000 procedures per year. All aspects of diagnostic and therapeutic GI endoscopy are performed. Advanced procedures including EUS (endoscopic ultrasound) with onsite cytopathology, and all modes of ERCP (endoscopic retrograde cholangiopancreatography) with cholangioscopy and laser lithotripsy with portable fluoroscopy are performed. A new motility center and esophageal pH laboratory is now open. A dedicated nursing staff and ancillary personnel of the Endoscopy Center ensure a seamless flow of patients each day.

In the Rowell Building of the University of Vermont there is a Simulation Center. At the Simulation Center, GI Fellows may practice their skills in endoscopy on newly designed and highly sophisticated computerized models of the GI tract.

A daily clinical office setting is shared with General Surgery in the Digestive Disease Center located on the 5th floor of the Ambulatory Care Center. There is a very close working relationship with the Colorectal Surgery and General Surgery divisions. There are dedicated liver clinics, and each aspect of luminal gastroenterology is represented in the various clinics. All this is accomplished with an integrated out-patient and in-patient electronic medical record.

All members of the GI Unit are actively involved in a variety of aspects of teaching. The members of the GI Faculty have very active roles in lectures in the Vermont Integrated Curriculum of the UVM College of Medicine. UVM medical students are team members on the consult service and in the clinical office setting. The members of the GI Faculty are responsible for the vast majority of the teaching in the GI Fellowship Program. Members of the GI Faculty give lectures to both medical and surgical residents, preside at Residents’ Morning Report and are part of the integrated Teaching Attending Service at the University of Vermont Medical Center. A weekly clinical GI Conference is held and led by GI Faculty and guest speakers from other divisions. As well, there is a weekly GI Pathology Conference led by specialty trained GI pathologists. There are in depth discussion and review of recent GI pathology occurs with the intent to improve diagnosis and clinical outcomes. Two GI Journal Clubs occur each month where an in-depth analysis and review of recent published articles is accomplished. A monthly Quality Care Review Committee Meeting enables a constant improvement and review of clinical care and endoscopic practices. And finally, a monthly GI Research Meeting of all the GI Faculty and Fellows meets to review present and future research endeavors.
Each Faculty member and each GI Fellow is actively engaged in an academic research pursuit. Research projects to date span the field of gastroenterology and hepatology from celiac disease, to new therapy for Barrett’s esophagus with radiofrequency ablation (RFA), to all aspects of chronic liver disease, new therapies for hepatitis C, new medications for inflammatory bowel disease (IBD) and irritable bowel syndrome (IBS), exploring methods for early detection of pancreatic cancer and assessing new therapies for motility disorders.

The Gastroenterology and Hepatology Unit at the University of Vermont fosters a close cooperation, collaboration and interaction with other research departments throughout UVM which allows a unique opportunity to explore translational research as it pertains to future aspects of clinical care.

James Vecchio, MD  
Professor of Medicine  
Director, Gastroenterology and Hepatology Division  
- GERD  
- Celiac Disease  
- Inflammatory Bowel Diseases – Crohn’s and Ulcerative Colitis  
- Therapeutic Endoscopy

Nicholas Ferrentino, MD  
Associate Professor of Medicine  
Director, GI Fellowship Program  
- Chronic Viral Hepatitis  
- Management of Cirrhosis  
- General Gastroenterology and General Hepatology  
- Therapeutic Endoscopy

Eric Ganguly, MD  
Associate Professor of Medicine  
- Endoscopic Ultrasound and GI Malignancies  
- Barrett’s Esophagus and Radiofrequency Ablation for Barrett’s Esophagus  
- Therapeutic Endoscopy  
- General Gastroenterology

Allen Lee, MD  
Assistant Professor of Medicine  
- Director of GI Motility Lab  
- Esophageal Manometry and pH Monitoring  
- Motility Disorders  
- GERD  
- Wireless Motility Capsule Monitoring  
- Small Bowel Endoscopy
Steven Lidofsky, MD, Ph.D.
Professor of Medicine and Pharmacology
Director, Hepatology Section
Director, Gastrointestinal Research
Director, MD-Ph.D. Program
  - Liver Cell Biology
  - Portal Hypertension
  - Hepatocellular Carcinoma
  - Viral Hepatitis
  - Metabolic Syndrome and the Liver

Gary Mawe, Ph.D.
Professor of Neurological Sciences; Adjunct Professor of Medicine and of Pharmacology
  - Neural Regulation of the Digestive Tract
    (understanding changes in enteric neural circuits that contribute to altered gut function in inflammatory bowel disease and irritable bowel syndrome)

Peter Moses, MD
Professor of Medicine
  - Inflammatory Bowel Disease
  - Irritable Bowel Syndrome
  - Therapeutic Endoscopy
  - Translational research with Human Microbiota

Doris Strader, MD
Professor of Medicine
  - Hepatitis C
  - Eosinophilic Esophagitis
  - General Hepatology and General Gastroenterology

André-Denis Wright, Ph.D.
Professor
Chair, Department of Animal Science
  - Human Gut Microbiology
    a) Determination of bacterial and methanogen profiles in individuals from five major colonic groups: healthy colon, diverticulosis, inflammatory bowel disease, colon polyps and colorectal cancer.
    b) The dynamics of the methanogen population, and methane production in humans.
    c) Determination of the dietary effects on different microbial populations in the gut.
    d) The link between gut microorganisms and obesity.

Richard Zubarik, MD
Professor of Medicine
Director, Endoscopy
- Pancreatic Disorders
- Endoscopy Quality
- Therapeutic Endoscopy
- Endoscopic Ultrasound

Nick Lim, MD
GI Fellow

John Randles, MD
GI Fellow

Mario Velez, MD
GI Fellow

Graduate Students, Post-doctoral Fellows, MD PhD Students:
- Benoit St-Pierre, MD (Post Doc)
- Laura Cersosimo (Ph.D Student)
- Sue Ishaq (Ph.D. Student)
- Alejandro Salgado (Ph.D Student)
- Stephanie Spohn (PhD Student)
- Estelle Spear (PhD student)
- Conor O’Neill, MD

Leadership in Professional Studies:
Steven Lidofsky, MD, Ph.D.
- Co-Chair Joint Research Awards Committee, American Association for the Study of Liver Diseases and American Liver Foundation

Gary Mawe, Ph.D.
- Councilor, American Gastroenterological Association, Nerve-Gut Interactions Section, 2014-present
- Fundamentals of Neurogastroenterology - Basic Science Committee, The Rome Foundation, 2012-2014. The purpose of this committee is to develop a summary of the research and literature to date related to functional gastrointestinal disorders, and then offer guidelines or recommendations to help advance future research.
- Scientific Advisory Board, The International Foundation for Functional Gastrointestinal Disorders, 2008 – present
- Chair, Research Committee, American Neurogastroenterology and Motility Society, 2012-2014
- Councilor, American Neurogastroenterology and Motility Society, 2006-present

Peter Moses, MD
- Elected member of the University of VT Professional Standards Committee, 2013-2014
**Editorships and Editorial Boards:**

*Steven Lidofsky, MD, Ph.D.*
- Editorial Board, Clinical Therapeutics
- Ad hoc Grants Reviewer for: Burroughs Wellcome Foundation, Medical Research Council of Canada, Natural Sciences and Engineering Research Council of Canada

*Gary Mawe, Ph.D.*
- Reviewing Editor: *Journal of Physiology*, 2012 – present
- Reviews Editor: *Neurogastroenterology and Motility*, 2012 – present
- Guest Associate Editor: *Gastroenterology*, 2012
- Editorial Board: *Frontiers in Autonomic Neuroscience*, 2010-present
- Editorial Board: *Frontiers in Gastrointestinal Sciences*, 2011-present
- Editorial Board: *Journal of Visualized Experiments, (JoVE)*, 2011-present

*Peter Moses, MD*
- Editorial Board Member, The Journal of Clinical Gastroenterology (Yale)
- Editorial Board Member, The World Journal of Gastroenterology (China)
- Reviewer, The American Journal of Gastroenterology
- Reviewer, Gastroenterology
- Reviewer, Alimentary Pharmacology
- Reviewer, Neurogastroenterology and Motility
- UVM Professional Standards Committee

*André-Denis Wright, Ph.D.*
- Editor, Zootaxa (Protozoa)
- Editorial Board Member, Microbial Ecology
- Editorial Board Member, Journal of Camelid Science
- Editorial Board Member, Journal of Eukaryotic Microbiology

*Richard Zubarik, M.D.*
- Editorial Board Member, World Journal of Gastroenterology 2012-present
Reviewer, Gastrointestinal Endoscopy 2004-present
Reviewer, Evidence-Based Gastroenterology 2001-present
Reviewer, Journal of Gastroenterology 2006-present
Reviewer, Archives of Internal Medicine 2010-present
Reviewer, Digestive Diseases and Sciences 2010-present
Reviewer, International Journal of Inflammation 2012-present

Study Sections and Federal Advisory Boards:

Steven Lidofsky, MD, Ph.D
- NIH ZDK1 GRBN Special Emphasis Panel

Gary Mawe, Ph.D.
- Member of the Clinical, Integrative, and Molecular Gastroenterology Study Section, Center for Scientific Review, NIH, 2013 - 2017.

Peter Moses, MD
- Grant Reviewer, Study Section of the NIH at the National Institute of Biomedical Imaging and Bioengineering (NIBIB)

Doris Strader, MD
- Director of Data Safety Monitoring Board for NIH Hepatitis B Research Network

André-Denis Wright, Ph.D.
- USDA
- NSF

Grants – list all active by faculty member, PI

Eric Ganguly, MD
- A Multicenter National Prospective Study of Pregnancy and Neonatal Outcomes in Women with Inflammatory Bowel Disease

Allen Lee, MD
- A Pilot Study on the Efficacy and Safety of Olanzapine in Improving Symptoms and Gastric Motility in Gastroparesis

Steven Lidofsky, MD, Ph.D.
- Non-interventional, prospective, cohort study of the effectiveness, safety, and utilization of two approved pegylated interferon-based direct acting triple therapies in the management of genotype 1 hepatitis C in routine clinical practice in the USA (PegBase).
A randomized, double-blind, controlled Study to evaluate the efficacy and safety of the combination of ABT-450/Ritonavir/ABT-267 (ABT-450/r/ABT-267) and ABT-333 with and without ribavirin (RBV) in treatment-naïve adults with genotype 1b chronic hepatitis C virus (HCV) infection (PEARL-III)

Gary Mawe, Ph.D.

- Neuronal excitability and motility in colitis (G. Mawe, Principal Investigator). NIH RO1 Grant Award (DK 62267); 7/15/02-3/31/2017. 40% effort. The goal of this project is to determine what changes occur in colonic neural circuitry in an animal model of colitis.
- Centers of Biomedical Research Excellence (COBRE) Phase III: Transitional Centers. (Imaging/Physiology Core Director) NIH/NIGMS 7/1/2011-6/30/2016 5% Effort. The primary goal of this grant is to support the continued growth of two sophisticated multi-user research cores: an Imaging/Physiology Core and Cellular/Molecular Core.
- Studies of gastroparesis in monogenic migraine mouse models (R. Shapiro, PI). Migraine Research Foundation. January 1, 2014 – Dec 31, 2014. The primary aim of this pilot exploratory project is to determine whether mice that have been engineered to express genetic mutations causative for human migraine have delayed gastric emptying relative to their wildtype littermate mice.
- “Mechanisms of gastrointestinal dysfunction in multiple sclerosis" (G. Mawe, Principal Investigator). National Multiple Sclerosis Society June 1, 2014 – May 30, 2015. This pilot project aims to explore the possibility that altered GI function can be investigated using well-established mouse models of MS (MS mice). In addition, we will test the hypothesis that the blood of individuals with MS contains antibodies that stick to, and interfere with, nerve cells in the GI tract.

Peter Moses, MD

- A Phase II Randomized, Placebo-Controlled, Double-Blind, Dose Ranging Study to Assess the Immunogenicity and Safety of a Clostridium Difficile Toxoid Vaccine (ACAM-CDIFF™) in Subjects with Clostridium Difficile Infection (CDI)
- Furiex Mu-Delta Agonist for the treatment of IBS with diarrhea

James Vecchio, MD

- Prospective, Multicenter, Randomized, Double-Blind, Placebo-Controlled Trial Comparing REMICADE® (infliximab) and Placebo in the Prevention of Recurrence in Crohn’s Disease Patients Undergoing Surgical Resection Who Are at an Increased Risk of Recurrence (PREVENT)
- SECURE / A Non-Interventional Long-term Post-Marketing Registry of Patients Treated with Certolizumab Pegol (Cimzia®) for Crohn’s Disease

André-Denis Wright, Ph.D.

- Vermont Dairy Center of Excellence. Microbial community gene expression in dairy cow waste anaerobic digesters.
Central Vermont Public Service (CVPS) Cow Power
Lintilhac Foundation
USDA Hatch. Examination of the methanogen microbiome in five breeds of lactating dairy cows.

Richard Zubariik, MD
Can Endoscopic Ultrasound (EUS) Stigmata of Chronic Pancreatitis Predict the Response to Pancreatic Enzymes
International Registry for Intraductal Papillary Mucinous Neoplasms
Prospective Study of Bacteremia and the Infection Rates Following Cholangioscopy with the Spyglass Cholangioscope

Division of General Internal Medicine Research
Benjamin Littenberg, MD, Director
http://www.med.uvm.edu/medicine/gim

The division consists of eight faculty, one staff, one post-doc fellow, eight PhD students and seven Masters’ students in the Clinical and Translational Science Program. Four physician faculty members practice in the Fletcher Allen Primary Care Internal Medicine Group, and one serves as the Medical Director for BlueCross and BlueShield of Vermont. The division is the home of the education programs of the Center for Clinical and Translational Science and includes the Director, two Associate Directors and many of the core faculty from the PhD, Masters, and graduate certificate programs in CTS. Our faculty also contains the Associate Dean for Primary Care and the Associate Director of Ambulatory Education for the Internal Medicine Residency.

The research activities of the division include: investigations into the role of information systems in improving quality of care, patient safety in the use of pharmaceuticals in the outpatient setting, the role of compassion in the medical encounter, the epidemiology of narcotic abuse and the management of chronic pain, the use of the medical record to develop new insights in pathophysiology and epidemiology, and the role of the built environment in determining health, including obesity and incidents of cancer. The division’s research is funded by grants from NIH, the State of Vermont, AHRQ, and the US Health Resources and Services Administration.

Benjamin Littenberg, MD
Henry and Carleen Tufo Professor of Medicine and Professor of Nursing
Director, General Internal Medicine

- Methodologies for Technology Assessment
  Clinical trials; Meta-analysis of diagnostic test assessments; Instruments to assess patients' preferences
- Clinical Technology Assessment
  Common problems in Primary Care; Diagnostic tests; Decision support systems
  Informatics
- Public health surveillance for chronic disease; Value-added laboratory reporting; Patient registries
- Quality Improvement and Patient Safety
- Breast cancer; Diabetes; Cardiovascular Risk; Medical error; Outpatient prescriptions, chronic kidney disease
- Geographic correlates of chronic health problems

Elizabeth S. Chen, PhD
Assistant Professor of Medicine
Assistant Professor, Computer Science

- Electronic health records
- clinical decision support
- clinical data mining and natural language processing
Amanda G. Kennedy, PharmD
Associate Professor of Medicine
- Patient and Medication Safety Research
- Pharmacoepidemiology
- Health Services Research
- Academic Detailing

Grants

**Leveraging the EHR to Collect and Analyze Social, Behavioral & Familial Factors**
NIH/NLM R01 LM011364 07/01/2012 – 06/30/2016
Principal Investigator: Elizabeth Chen Co-PI: Genevieve Melton (University of Minnesota)
*The overall goal of this project is to develop and evaluate computational methods for generating knowledge regarding the relationships between diseases and social, behavioral, and familial factors from EHR data. Collaborative effort between the University of Vermont and University of Minnesota.*

**Medication Management Pilot Study**
Vermont Department of Health 1/1/12-6/30/14
Principal Investigator: Amanda Kennedy
*This grant will support the UVM Office of Primary Care to conduct a population-based medication management pilot study in collaboration with selected primary care practices and pharmacists over a two year period. The broad goal of this pilot study is to improve care for Vermonters, specifically around optimizing medication regimens in primary care settings. To support this goal, the pilot will describe and evaluate varying models for pharmacist collaboration with primary care practices. Health information technology, including population-based mediation reports from primary care practices’ electronic health records, will serve as a tool for the pharmacist collaborations, where available. This pilot study will be collaborative between pharmacists and primary care practices and supported by a broad foundation of stakeholders, utilizing the expertise and opinions of the Vermont Blueprint for Health and Vermont Academic Detailing Program Advisors.*

**The Vermont Academic Detailing Program**
- Narcotic Quality Improvement - Vermont Department of Health 1/1/13 - 12/31/14
  Principal Investigator: Amanda Kennedy Co-I: Charles Maclean
  *This program develops and delivers Academic Detailing to providers and practices in Vermont.*
- The Vermont Academic Detailing Program Pharmacist in the Blueprint-Vermont Department of Health 1/1/12 – 12/31/13
  Principal Investigator: Amanda Kennedy Co-I: Charles Maclean
  *This program tests the integration of pharmacists into the Patient Centered Medical Home.*

**Automated Alcohol Screening and Brief Intervention in Primary Care using IVR**
NIAAA 1R01AA018658-01A1 (Rose) Co-I: Charles Maclean
National Institute of Alcohol 7/1/10-6/30/15
This grant is a randomized controlled trial of alcohol screening and brief intervention (SBI) administered using a telephone-based Interactive Voice Response (IVR) system.

Model State Supported Area Health Education Centers
U77 HP03624 9/1/12-8/31/17
Health Resources and Services Administration
Principal Investigator: Charles Maclean
The Vermont AHEC Program is a statewide network of community and academic partners working together through three AHEC centers and a Program Office to improve the health of Vermonters. Through community-based initiatives, Vermont AHEC works to promote rural health educational opportunities and address health care workforce challenges unique to specific areas of the state.

Data Abstraction Project
Vermont Oxford Network (VON), 07/01/13 - 06/30/14
Principal Investigator: Neil Sarkar Co-I: Elizabeth Chen

Vermont SBIRT Collaborative: Changing Care through Systems Redesign and Team Based Training SAMSHA 9/1/13-8/31/16
Co-Investigator: Richard Pinckney

A compassion training program for Clinicians
Frymoyer Scholarship 9/1/09 -8/31/13
PI: Richard Pinckney

A Toolkit to Implement Behavioral Health in Primary Care
National Institute of Mental Health R-03M 99157 7/1/13 - 6/30/15
PI: Rodger Kessler Co-I: Benjamin Littenberg, Connie van Eeghen
Systematize a quality improvement implementation of behavioral health in primary care.

Division of Gerontology
Naomi K. Fukagawa, MD PhD
Acting Director, Gerontology
http://www.med.uvm.edu/medicine/gerontology

– Gerontology Executive Summary
Service: visits, RVU’s, outreach sites, services offered
Education – fellowship info, medical student teaching
Research – highlight general area of research for the Division
Total grant funding

Faculty

Naomi K. Fukagawa, MD PhD
Professor of Medicine
Acting Director, Gerontology
- Health Effects of Diesel and Biodiesel Exhaust
- Protein/Amino Acid and Energy Metabolism
- Oxidative Stress in Aging and Disease

Muyao Li, PhD (Retired)
Research Associate
- Human genetic diseases
- Gene structure, Function and Mutation, Gene Expression Profile
- Basic cell and molecular mechanisms in human diseases associated with advanced age and obesity

College of Medicine
2014-Member of the COM Admissions Committee
2014-Faculty Mentor, Public Health Course for Second-Year Medical Students
Dr. Fukagawa

**Leadership in Professional Societies:**  
American Society for Clinical Investigation Institutional Representative  
American Society for Nutrition Subcommittee on Nutrition Education in Professional Schools

**Editorships and Editorial Boards:** Associate Editor, *The American Journal of Clinical Nutrition*; Editor-in-Chief, *Nutrition Reviews*; Editorial Board, *Journal of Nutritional Biochemistry*

**Study Sections and Federal/International Advisory Boards:**  
Homing Plus Programme Fundacja na rzecz Nouki Polskiej (Poland Research Foundation)  
UVM Transdisciplinary Research Initiative Food Systems Steering Committee

**Major Faculty Awards:**  
Vermont Academy of Science and Engineering Fellow, Center for Rural Studies/Food Systems Research Collaborative, University of Vermont

**Grants – list all active by faculty member, PI**

**ACTIVE**

UVM Center on Aging Armin Grams Research Award (Fukagawa and Kolodinsky)  
Community-Based Nutrition Intervention in Affordable Housing for Elders  
3/1/2013-2/28/2015 $50,000  
The goal is to determine whether nutrition education improves fruit/vegetable intake and stabilizes frailty scores.

Ajinomoto Amino Acids Research Program (Fukagawa)  
10/01/2009– 12/31/2013 $50,000

Synergistic Effects of the Branched Chain Amino Acids and Camosine Precursors on Exercise-induced Muscle Damage and Performance in Humans  
The goal is to determine the effects of amino acid supplementation on exercise performance.

R01DK082803-01 (Kien)  
NIH/NIDDK  
12/01/2009-11/30/2014 $427,731  
1.8 calendar months  
Palmitate Metabolism and Insulin Resistance  
The goal is to determine the mechanisms through which palmitate metabolism influences insulin resistance in human volunteers.

UVM Transportation Research Center (USDOT) (Fukagawa, PI)  
TDC $180,323  
03/01/2012-12/31/2013
Nutritional Supplementation with the Antioxidant, Glutathione, to Reduce the Health Effects of Petro- and Biodiesel Exhaust Particle Emissions

The goal is to determine whether glutathione plays a role in mitigating the effects of exposure to exhaust on metabolism and lung inflammation.

**Publications – peer reviewed, chapters, etc. (not abstracts)**

Division of Hematology/Oncology

Claire Verschraegen, MD, Director
http://www.uvm.edu/medicine/medicine/hemonc/

A. Executive Summary

The Division combines 2 specialties, Hematology and Oncology. There are 2 full time faculty focusing on benign hematology and thrombosis, 5 faculty treating benign and malignant hematology, 8 medical oncologists, 1 internist (lymphedema) and 1 cardiologist (thrombosis and cardiology for cancer patients) in the Division with 2 emeritus faculty, 6 fellows, 4 post-doctoral fellows, 6 midlevel providers, about 70 nurses and staff in the outpatient clinic. We have recruited three new faculty: Drs. George Atweh and Edmund Folefac who both will start in August 2014, and Dr. Molly Barry, who will start in December 2014. The division also supervises the Apheresis Program and the Hemophilia Center and has obtained accreditation for stem cell transplant late last year. Our group embraces the mission of the COM and FAHC with cost effective high quality care, cutting-edge research, and dedication to all aspects of teaching and research.

Clinical work
Clinical efforts for 2014 (pro-rated) include a heavy clinical load with 26,390 outpatient visits (about 1,900 new patients) and about 6,000 inpatient visits for a total of 48,484 RVU’s. This is an 11% growth from last year. These numbers do not include patients treated in our infusion suite. We are also attending for patients of local private practices when they are hospitalized at FAHC. Services offered include multidisciplinary clinics where at a single visit patients may be seen by a number of oncologic or specialty provides. Established MDC clinics exist for breast, upper GI, ENT, lung cancer, GU, melanoma, sarcoma, leukemia’s and lymphomas, brain and GYN. These multidisciplinary clinics are being integrated within Transdisciplinary Academic Teams (TDT), a group of expert physicians and scientists who focus on all aspect of academic medicine for the specific cancers they treat and research. In 2014, more than 600 new patients were seen through the TDT and MDC clinics. Our specialty services also include a federally granted hemophilia center (Dr. Holmes), a thrombosis and hemostasis program (Dr. Cushman), an accredited stem cell program (Dr. Sprague) an oncology rehabilitation center (Dr. Dittus) a cancer genetics clinic (W. McKinnon), psychiatry services (Dr. Robinowtiz), palliative care (Dr. McVeigh) and a high risk breast program (Dr. Wood). The Thrombosis and Hemostasis Program has undergone a period of recent growth through development of multidisciplinary programs. In 2008-2011 it averaged 429 annual referrals, which rose to 697 annually in 2012-2013. Over the last three years, we have treated over 60 acute deep vein thrombosis cases in the outpatient setting annually. The Cancer Clinic provides ancillary services to include nutrition, psychological, social work, and massage therapy to support to any patients in Vermont in need of these services. We have built a new integrated lung cancer screening program for high risk smokers, which is now opened for business.
We are in the process of extending some of our services to regional oncology practices who have expressed an interest to collaborate for patient care and research.

**Research**
Research within the Division is done in several collaborative ways (clinical trials, basic science research and epidemiology) covering a number of broad themes (new drug development, cancer treatment and prevention, thrombosis, cardiovascular and stroke epidemiology, supportive care of cancer patients, cancer and exercise, and cancer and coagulation). Working within Transdisciplinary Teams, the faculty of the Hematology/Oncology Division are principal investigators for the majority of the over 300 cancer relates studies at the University of Vermont, with 25% of these studies being investigator initiated. Approximately 1,000 cancer patients are put on clinical trials annually with about 3/4th being accrued to medial oncology studies. Approximately 15% of patients are enrolled on treatment clinical trials at FAHC which is higher than the 6% national average. Available trials include Phase I-III treatment trials, supportive care and translational studies, with the majority of the later (supportive care and translational studies) being investigator initiated. Investigators within the Division receive funding from clinical trials (cooperative group and pharmaceutical trials), NIH (NCI, NHLBI, NINDS) and ACS, and through the VCC some of the LCCRO funds support Division research activities.

Dr. Greenblatt is the president of the *Human Genome Variation Society*. Dr. Cushman serves on the National Board of Directors of the *American Heart Association* on May 1, 2013. Dr. Wood serves on the *American Society of Clinical Oncology (ASCO) CME committee* as the liaison to the *ASCO Prevention Committee*. Dr. Verschraegen has been appointed on the Board of the Alliance for Clinical Trials in Oncology and on the NCI Gynecologic Cancers Steering Committee.

**B. Faculty**

**Steve Ades, MD – Associate Professor**
Associate Director, Hematology/Oncology Fellowship Program  
Leader, Fletcher Allen health Care GI Multidisciplinary Clinic  
Co-Leader, Fletcher Allen Health Care GU Multidisciplinary Clinic  
In-Patient Hematology/Oncology Service Director  
Associate Director, Clinical Trials  
Research interests include: GI and GU cancers and thrombosis

**Mary Cushman, MD, MSc – Professor, Medicine and Pathology**
Director, Thrombosis and Hemostasis Program  
Research interests include: Etiology of vascular diseases and other chronic diseases; racial disparities; venous thrombosis and post thrombotic syndrome

**Kim Dittus, MD, PhD – Assistant Professor**
Director, Steps to Wellness Program  
Research interests include: Cancer survivorship, energy balance

**Steven Emmons, MD – Assistant Professor**
Leader, Fletcher Allen Health Care Melanoma Multidisciplinary Clinic
Research interests include: CNS cancer and Melanoma

**Marc Greenblatt, MD – Associate Professor**
Research interests include: Molecular genetics of mutation in cancer genes and gastrointestinal cancers

**Chris Holmes, MD, PhD – Associate Professor**
Director, Vermont Regional Hemophilia Treatment Center
Assistant Director, Thrombosis and Hemostasis Program
Research interests include: Venous thrombosis, post-thrombotic syndrome and platelet function

**Marc Greenblatt, MD – Associate Professor**
Research interests include: Molecular genetics of mutation in cancer genes and gastrointestinal cancers

**Marc Greenblatt, MD – Associate Professor**
Research interests include: Molecular genetics of mutation in cancer genes and gastrointestinal cancers

**Chris Holmes, MD, PhD – Associate Professor**
Director, Vermont Regional Hemophilia Treatment Center
Assistant Director, Thrombosis and Hemostasis Program
Research interests include: Venous thrombosis, post-thrombotic syndrome and platelet function

**Margaret Kennedy, MD, MSc**
Attending Physician
Research interests include: Venous thrombosis, post-thrombotic syndrome

**Farrah Khan, MD – Assistant Professor**
Research interests include: Care of patients with breast cancer and lung cancer

**Susan Lakoski, MD, MS – Assistant Professor**
Director, Cardiovascular Prevention Program for Cancer Patients
Research interests include: The role of fitness and exercise intervention in health. Venous thrombosis in cancer patients.

**Gurpreet Lamba, MD – Assistant Professor**
Research interests include: Lymphoma and Leukemia

**J. Chris Nunnink, MD, FASCO – Associate Professor**
Attending Physician

**Patricia O’Brien, MD – Assistant Professor Clinical Scholar**
Director, Lymphedema Program

**Julie Olin, MD – Associate Professor**
Attending Physician

**Julian Sprague, MD, PhD – Assistant Professor**
Director, Hematology/Oncology Fellowship Program
Research interests include: Leukemia and neurotoxicity

**Claire Verschraegen, MD – Professor**
Director, Hematology/Oncology Division
Co-Director, Vermont Cancer Center
Research interests include: Mesothelioma, GYN, Lung and other rare cancers

**Marie Wood, MD – Professor**
Director, Familial Cancer Program
Assistant Director, Hematology/Oncology Division
Medical Director of the Cancer Clinic
Research interests include: Molecular markers of breast cancer risk, attitudes of primary care physicians regarding cancer genetics, breast cancer screening and prevention

**Neil Zakai, MD, MSc – Associate Professor**
Research interests include: Epidemiology and novel risk factors for venous thrombosis and cardiovascular disease. Epidemiology, causes, and consequences of anemia in
diverse populations. Venous thrombosis causes and prevention, post thrombotic syndrome.

C. List of Hematology/Oncology Fellows
Julia Moukharskaya, MD – 3rd year fellow – completed fellowship as of July 1, 2014
John Winters, MD – 3rd year fellow – completed fellowship as of July 1, 2014
Joanne Monterroso, MD – 3rd year fellow
Yongli Ji, MD – 3rd year fellow
Samir Ambrale, MD – 2nd year fellow
Inder Lal, MD – 2nd year fellow
Hibba Rehman, MD – 1st year fellow
Jose Ruades, MD – 1st year fellow

D. List all NP’s and PA’s
Paul Larson, NP
Jamie Kelly, PA
Penny Gibson, PA
Janet Ely, NP
Emily Parenteau, NP
Kim Sorber, PA

E. List all graduate students, post-doctoral fellows, MD PHD students
Ogheneruona Apoe, MD, Post-Doctoral Associate
Kristine Alexander, PhD, Post-Doctoral Associate
Katharine Cheung, MD, Post-Doctoral Associate
Sarah Gillett, PhD, Medical Student – did 12-week research elective w/Mary Cushman, MD, MSc (Sept., Oct., and Nov. 2013)

F. Leadership in Professional Societies
Mary Cushman, MD, MSc
Co-Chair, American Society of Hematology Quality Symposium, 55th Annual American Society of Hematology Annual Meeting, New Orleans, LA
Member, Scientific Program Planning Committee, World Heart Federation and American Health Association’s 4th International Conference on Women, Heart Disease and Stroke, World Congress of Cardiology Scientific Sessions, Melbourne, Australia
President of the American Heart Association Vermont Board of Directors; Immediate Past President as of July 1.
Member of the American Society of Hematology Media Experts Subcommittee.
Member, Program Committee for Venous thrombosis Disorders, International Society on Thrombosis and Haemostasis 2015 Congress, Toronto.
G. **Major Faculty Awards**

Mary Cushman, MD, MSc was awarded the American Heart Association’s Council on Epidemiology and Prevention Distinguished Achievement Award at the Council’s annual meeting in San Francisco on March 28-31, 2014. The award was given in recognition of Dr. Cushman’s volunteer leadership service to the Council and to the American Heart Association.

H. **Grants**

**Kim Dittus**

NIH-NIGMS  Higgins (PI)  9/15/13-7/31/18

1P20GM103644-01A1

Vermont Center on Behavior and Health, COBRE

Junior Investigator Project: Predictors of Weight Loss Success in Overweight Breast Cancer Survivors

Role: PI, Junior Investigator Project

**Marc Greenblatt**

NIH-NHGRI  Berg, Jonathan (PI)  11/1/13-10/31/17

U01 HG007437-01

A Knowledge Base for Clinically Relevant Genes and Variants

Role: Co-Investigator

Vermont Cancer Center  Greenblatt (PI)  12/13/13-12/14/14

Program Award

Economics of Implementing New Technologies in Hereditary Colon Cancer Syndromes

**Chris Holmes**

Vermont Cancer Center  Holmes, Lamba, Kelm (Co-PIs)  10/1/13-9/30/14

Purine-Rich Binding Proteins in Patients with Acute Myelogenous Leukemia

Role: Co-PI

**Susan Lakoski**

NIH-NIGMS  Higgins (PI)  9/15/13-7/31/18

Vermont Center on Behavior and Health, COBRE

Junior Investigator Project: Behaviors, Chronic Disease, and Quality of Life after Ductal Carcinoma in situ

Role: PI, Junior Investigator Project

University of Vermont  Lakoski (PI)  6/1/13-6/30/14

REACH Institutional Grant Program

An Exercise Training and Behavior Weight Loss Program after an Acute Blood Clot: TRAIN

ABC

Role: PI
Gurpreet Lamba
Vermont Cancer Center/LCCO Lamba and Kelm (Co-PIs) 9/1/13-9/1/14
Role of Purine-Rich Element Binding Proteins in the Pathogenesis of High-Risk AML
Role: Co-PI

Vermont Cancer Center/LCCRO Lamba and Zaidi (Co-PIs) 9/1/13-9/1/14
Program Grant
MicroRNAs as a biomarker for Molecular Mechanisms in AML Patients Undergoing Induction Chemotherapy
Role: Co-PI

Marie Wood
Number: VCC/LCCRO Program Grant 3/1/2014-2/28/2015
P.I. Marie Wood, M.D.
Title: MicroRNAs as Predictors of Breast Cancer Development in High Risk Women

Number: VCC/LCCRO Pilot Award 5/1/2014-4/30/2015
P.I. Marie Wood, M.D.
The major goal of this project is to evaluate mutations in DNA repair genes between sisters with and without cancer from high risk families

Claire Verschraegen
Lake Champlain Cancer Research Verschraeagen (PI) 1/1/14-12/31/14
Organization (LCCRO)
Role: PI

Huang J, Huffman JE, Yamkauchi M, Trompet S, … Cushman M, …Strachan DP, O’Donnell CJ. Genome-wide association study for circulating tissue plasminogen activator levels and

The Immunobiology Program was established in the Department of Medicine in 1995 in recognition of the growing strength in this area of research from various departments. Although established in one department, it was intended from the start that this program should evolve to span several departments to include the various interests in genetic regulation of autoimmune and infectious diseases, basic mechanisms of T cell signaling of cytokine genes and cell death (Medicine), viral immunology (Pathology), transplantation immunology (Surgery), and maternal/fetal immunology (Ob-Gyn). Dr. Ralph Budd has directed this program since its inception. The core of the Immunobiology Program resides with the Department of Medicine and includes 7 faculty whose research interests are detailed below.

In 2006 the Immunobiology faculty partnered with faculty in Infectious Diseases and Microbiology and Molecular Genetics to successfully compete for a Center of Biomedical Research Excellence (COBRE) Award from NIH (NCRR). This allowed the formation of the Vermont Center for Immunology and Infectious Diseases (VCIID), which now numbers 29 faculty in 9 departments in 5 colleges and is in close alliance with the Vermont Vaccine Testing Center, headed by Dr. Beth Kirkpatrick, one of the VCIID faculty. The VCIID has a weekly joint Research-in-Progress meeting, seminar series, and a journal club. This provides a weekly forum for students and postdoctoral fellows to present their research progress as well as for faculty to review hypotheses and specific aims of planned grants. During the first 5 years of Phase I COBRE funding, VCIID faculty published 213 articles and received nearly $48 million in funding, excluding the COBRE funds.

In 2011 the COBRE grant was renewed for a second 5 years. This has provided funds to allow the College of Medicine to build a new BSL3 facility in partnership with the Vermont Department of Health (scheduled to open in Fall ’14), and to recruit new faculty to the theme of the host response to infection. In addition, we renewed our NIH T32 Training Grant for graduate students.

Faculty

Ralph Budd, MD
Professor of Medicine and Microbiology & Molecular Genetics
Director, Vermont Center of Immunology & Infectious Diseases

- Key Research Interests: Cell death, Regulation of caspases in the immune system, Gamma/delta T cells, Autoimmune mechanisms
Jason Botten, PhD  
Assistant Professor of Medicine, Adjunct in Microbiology and Molecular Genetics  
- Key Research Interests: Virology, Cellular Microbiology, Immunology, Proteomics

Andreas Koenig, PhD  
Research Associate, Medicine  
- Key Research Interests: Virology, immunology

Karen Fortner, PhD  
Assistant Professor of Medicine  
- Key Research Interests: Regulation of T lymphocyte homeostasis through cell death, metabolism, and inhibitory functions; T cell homeostasis and function in obesity; autoimmunity

Mercedes Rincón, PhD  
Professor of Medicine and Microbiology & Molecular Genetics  
Director, Transgenic/Knockout Mice Facility  
- Key Research Interests: T cell activation, allergy/asthma, influenza infection, T cell development, breast cancer, cancer and inflammation.

Cory Teuscher, PhD  
Professor of Medicine and Pathology  
- Key Research Interests: Immunogenetics / Immunology

Tina Thornton, PhD  
Research Associate, Medicine  
- Key Research Interests: The major focus is on understanding the interactions of signaling pathways that control early thymocyte development and survival, and is currently exploring the interaction of the p38 MAPK pathway and GSK3 in cells from the immune system and central nervous system under normal and pathological conditions.

Graduate Students, Post-doctoral Fellows, MD PhD Students:

Laure Case, PhD
Devin Champagne (graduate student)
Benjamin King (graduate student)
Joseph Klaus (graduate student)
Dimitry Krementsov, PhD
Abbas Razza (graduate student)
Michael Secinaro (graduate student)
Emma Wall, PhD
Rui Yang (graduate student)
Christopher Ziegler (graduate student)
Editorships and Editorial Boards:
(Budd) Editor for “Textbook of Rheumatology”, Elsevier
(Rincón) J. Immunology; International Journal of Biological Sciences

Study Sections and Federal Advisory Boards:
(Botten) 2014 Ad hoc reviewer, Developmental Research Project Program for the NIH-HIGMS funded NE-INBRE Program Awards
(Budd) Member, NIH Immunity and Host Defense
(Budd) Chair, NIH Special emphasis review committee for U-19 Autoimmunity Grants (NIAID ZAI1-PA-I-J1/ZAI1-ALW-I-J1)
(Rincón) Charter member, Cellular and Molecular Immunology NIH study section
(Teuscher) Charter member, Hypersensitivity, Autoimmune, and Immune-mediated diseases NIH study section.
(Teuscher) Permanent member, grant review panel for the National Multiple Sclerosis Society.

Major Faculty / Research Awards:
(Budd) Senior Researcher of the Year Award - UVMMG DEC. 2013

(King) Benjamin King, CMB graduate student in Jason Botten's group, received a prestigious Chateaubriand Fellowship from the French Embassy (http://www.chateaubriand-fellowship.org/). This will allow Ben to extend his studies on virus migration in cells to include high-definition microscopy at the Institut Pasteur. Ben will be there for 7 months and help form a new international collaboration between the two labs.

Grants – list all active by faculty member, PI

Grant Awards 07/01/13 – 06/30/14
NIH funding:
4 - R01
3 – R21
1 - R56
2 – ARRA Supplements
1 – T32
1 – COBRE
1 – Sub award through University of Utah
1 – Sub award through Drexel University

Foundation funding:
1 – Postdoctoral Fellowship
1 – Foundation Pilot
1 – Novel Research Project
2 – VCC Awards

Budd:

Title: Gamma Delta Cells in Lyme Arthritis
Dates of Award: 09/30/2004 – 08/31/2014
Role: PI
Current Yr funding: $0 (no cost extension)
Source: NIH/NIAMS

Title: Gamma Delta Cells in Lyme Arthritis (ARRA Supplement)
Dates of Award: 09/23/09-09/22/13
Role: PI
Current Yr funding: $0 (no cost extension)
Source: NIH/NIAMS

Title: Vermont Immunology / Infectious Diseases Center
Dates of Award: 08/01/2006 – 06/30/2016
Role: PI
Current Yr funding: $2,126,776
Source: NIH/NCRR

Title: Vermont Immunology / Infectious Diseases Center (Pilot ARRA Supplement)
Dates of Award: 09/17/09-09/16/13
Role: PI
Current Yr funding: $0 (no cost extension)
Source: NIH/NCRR

Title: Vermont Immunology / Infectious Diseases Training Grant
Dates of Award: 09/01/05 – 08/31/16
Role: PI
Current Yr funding: $181,642
Source: NIH/NIAID

Title: Use of Cytolytic Gamma Delta T cells in Cancer Therapy
Dates of Award: 01/01/13 – 10/31/14
Role: Co-PI
Current Yr funding: $20,000
Source: VCC/LCCRO
Title: RIG-I Regulation of Interferon Signature in SLE  
Dates of Award: 01/01/14 – 12/31/16  
Role: PI  
Current Yr funding: $100,000  
Source: Lupus Research Institute

Fortner:
Title: T Lymphocyte Homeostasis in Obesity  
Dates of Award: 06/01/14 – 05/31/16  
Role: PI  
Current Yr funding: $288,750  
Source: NIH/NIAID

Rincón:
Title: p38 MAP Kinase during Early Thymocyte Development  
Dates of Award: 02/15/2009 – 01/31/2015  
Role: PI  
Current Yr funding: $346,638 (no cost extension, effective 02/01/14)  
Source: NIH/NIAID

Title: IL-6: an innate immune regulator of the plasticity of Tfh cells  
Dates of Award: 04/15/2012 – 03/31/2014  
Role: PI  
Current Yr funding: $0 (no cost extension)  
Source: NIH/NIAID

Title: Regulation of Mitochondrial Function in T Cells  
Dates of Award: 02/10/14 – 01/31/16  
Role: PI  
Current Yr funding: $228,750  
Source: NIH/NIAID

Title: Biopsy-Induced Inflammation in Breast Cancer  
Dates of Award: 03/01/14 – 12/31/14  
Role: Co-PI  
Current Yr funding: $20,000  
Source: VCC/LCCRO

Teuscher:
Title: Molecular Genetics of Arthritis in Murine Lyme Disease
Dates of Award: 08/15/2004 – 05/31/2014  
Role: Co-PI  
Current Yr funding: $67,000  
Source: University of Utah  

Title: Histamine Receptor Signaling in CNS Autoimmune Disease  
Dates of Award: 01/15/2008 – 12/31/2013  
Role: PI  
Current Yr funding: $0 (no cost extension)  
Source: NIH/NINDS  

Title: H1R Signaling and Immune Deviation in EAE  
Dates of Award: 01/19/10-12/31/14  
Role: PI (Diehl, Co-PI)  
Current Yr funding: $324,904  
Source: NIH/ NINDS  

Title: p38 MAPK as a Female-Specific Druggable Target in Autoimmune Disease of the CNS  
Dates of Award: 07/01/11 – 06/30/14  
Role: Mentoring PI  
Current Yr funding: $52,053  
Source: National Multiple Sclerosis Society (postdoctoral fellowship)  

Title: p38 MAPK as a female-specific druggable target in CNS autoimmune disease  
Dates of Award: 07/1/11 – 06/30/14  
Role: PI  
Current Yr funding: $0 (no cost extension)  
Source: NIH/ NINDS  

Title: The Role of p38 MapK in the Integration of Environmental Stress Stimuli in CNS Autoimmune Disease  
Dates of Award: 10/01/13 – 09/30/14  
Role: PI  
Current Yr funding: $43,911  
Source: NMSS  

Title: Refining the Genetic Basis of EAE to Establish a Model for MS-GWAS Testing  
Dates of Award: 07/01/12 – 06/30/15  
Role: PI  
Current Yr funding: $88,206  
Source: Drexel University (NMSS)
Publications – peer reviewed, chapters, etc. (not abstracts)

The Infectious Diseases (ID) Unit is a group of nine attending physicians dedicated to the diagnosis, management, prevention and investigation of infectious diseases. This past year we provided 1,645 new inpatient consultations. The outpatient clinics remain vibrant with about 6000 outpatient visits yearly. This effort includes the care of over 460 active patients with HIV in four federally funded Comprehensive Care Clinics in Vermont. The ID Unit outpatient care includes the international traveler’s clinic, refugee screening, home IV antibiotics and care for patients with general infectious disease issues. The ID unit works collaboratively with the Vermont Department of Health for diagnosis and treatment of tuberculosis and biological and pandemic influenza preparedness. The ID staff includes the FAHC Hospital Epidemiologist and infection control officer, the Department of Medicine’s Associate Director of Residency Training, UVM’s medical student Clerkship Director for the Department of Medicine and the Director of the Vaccine Testing Center at UVM.

In addition to daily teaching rounds with medical students, residents and fellows, the physicians are actively involved in the Attacks and Defenses, Neural Sciences, Generations, Connections, Convergence and Doctoring in Vermont, medicine clerkships and acting internships sections of the Vermont Integrated Curriculum. The ID Unit is the home of a two year fellowship training program. The graduating fellows have a 100% board certification pass rate over the past 12 years. This program includes a year of research that has resulted in abstract presentations at the national ID meetings, peer reviewed publications and book chapters. This year our 2nd Year research fellow presented a poster on the 1st Human Case of Equine Encephalitis in Vermont.

Within our unit we have two active research laboratories which support a number of projects by PhD students, research associates, attending physicians, and the 2nd year ID Fellow. Investigations center on the molecular biology and pathogenesis of Entamoeba histolytica, Salmonella enterica serovar Typhi, Campylobacter jejuni, and Cryptosporidium pharmaceutical agent development. Inpatient Phase III Cholera Vaccine Trial and an out Patient Phase III Cholera Vaccine trial were both completed this last year. The Dengue Virus Vaccine is currently being researched in the laboratory setting. Continuing clinical research efforts include epidemiologic investigations into Clostridium difficile infection and risks, HIV service delivery models and outcomes, HIV related biomarkers and exploration of the biologic rationale of oral polio and rotavirus vaccine failure in an international field trial setting.

In addition to clinical revenues, financial support is provided by grants from the NIH, NIAID, Health Services Research Administration (HRSA), Bill and Melinda Gates Foundation, contracts with regional hospitals and FAHC directorships.
Faculty

Christopher Grace, MD FACP
Professor of Medicine
- Director, Infectious Diseases
- Director at FAHC Part C, HRSA grant for HIV care
- Director at FAHC Part B, HRSA grant for HIV care (Vermont Dept. of Health)
- Consultant: Pandemic Influenza and Bioterrorism, Vermont Department of Health

W. Kemper Alston, MD MPH
Professor of Medicine
- Chair, Infection Prevention Committee
- Hospital Epidemiologist
- Associate Director, Infectious Disease Unit
- Consultant: Tuberculosis, State of Vermont
- Consultant for Food and Drug Evaluation and Research
- Hospital Infections, Tuberculosis

Christopher D. Huston, MD
Associate Professor of Medicine
- Research Interests: Intestinal protozoan infections including E. Histolytica host-parasite infections, Cryptosporidium drug development
- Institutional Biosafety Committee

Beth D. Kirkpatrick, MD, DTMH
Professor of Medicine with Tenure
- Director, Vaccine Testing Center
- Research Interests: Vaccine Development, enteric infections, Dengue Fever
- Institution Review Board

Sarah Mooney, MBBCh
Assistant Professor of Medicine
- Clinical Faculty
- Rutland Regional Medical Center attending
- Director, AIDS Education Training

Cindy Noyes, MD
Assistant Professor of Medicine
- Clinical Faculty

Kristen K. Pierce, MD
Assistant Professor of Medicine
- Director, Infectious Disease Fellowship Training Program
- Research Interests: Dengue Fever vaccine development study
Louis B. Polish, MD
Associate Professor of Medicine
- Director, Department of Medicine Clerkship Program
- Chair, Infectious Disease Practice Committee

Mary B. Ramundo, MD
Associate Professor of Medicine
- Associate Program Director, College of Medicine Residency Program
- Department of Medicine, Medical Education Committee
- Chairman, Housestaff Evaluations Committee

Jose Teixeria, PhD
Research Associate
- Interests: Intestinal protozoan infections including *E. Histolytica* host-parasite infections, Cryptosporidium drug development

Sean Diehl, PhD
Assistant Professor of Research
- Associate Director of Research, UVM Vaccine Testing Center
- Interests: Vaccine Development, Dengue Virus, West Nile Virus

Fellows

Vinod Mohan, MBBS
Infectious Disease 1st Year Fellow
- Infectious Disease Fellowship Training Program July 1, 2013 – June 30, 2015

Olha Smolynets, DO
Infectious Disease 2nd Year Fellow
- Infectious Disease Fellowship Training Program July 1, 2012–June 30, 2014
- Research: Dermatologic Manifestations in Live Attenuated Dengue Vaccines – A skin biopsy study

Nurse Practitioners and Physician Assistants:

Deborah Kutzko, FNP
Nurse Manager, Comprehensive Care clinic
- Travel health
- Vermont Refugee Clinic
- AIDS Comprehensive Care Clinic
Hella Douglas, PsychNP
Comprehensive Care clinic, HIV patient
- HIV Patient Care, mental health

**Graduate Students, Post-doctoral Fellows, MD PhD Students:**
Rajiv Jumani – PhD Student, (Huston Laboratory)
Kovi Bessoff – MD, PhD Student (Huston Laboratory)- completed PhD Sept. 2013
Adam Sateriale – PhD Student (Huston Laboratory)- Post Doctoral Fellow

**Editorships and Editorial Boards:**
W. Kemper Alston, MD
- External reviewer
  - Annals of internal Medicine,
  - Clinical Infectious Diseases
  - Infection Control and Hospital Epidemiology

Christopher Huston, MD
- Editorial Board Member – Infection and Immunity
- External reviewer
  - Complexity in biology: molecular aspects of infectious Diseases
  - French-Israel Scientific and Technological Cooperation Agreement
  - Ministry of Science and Technology, Israel
- Ad-Hoc Reviewer
  - National Institutes of Allergy and Infectious diseases
  - ZRG1DM-B(02) Pathogens and Symbiotes
  - ZRG1DM-P(02) Parasites and vectors study section

**Grants – list all active by faculty member, PI**

Beth D. Kirkpatrick MD. Co-Principal Investigator
Exploration of the biologic cases for the underperformance of oral polio and rotavirus vaccination in Bangladesh and India
$1,450,000  Bill and Melinda Gates Foundation
Total award $17,000,000
Sean Diehl, PhD
Immunonutrition in Malnourished infants
COBRE P20RR021905
12/1/2013-5/30/2014

Christopher Grace, MD FACP
Ryan White Part C  Grant for HIV Care
Non- competing grant award
5/1/2014 – 4/30/2015
$ 551,481 Federal HRSA

Christopher Grace, MD FACP
Ryan White Care Act Part B
7/1/2014 – 6/30/2014
$240,484 Federal

Christopher Grace, MD FACP
TB Control and Surveillance, Public Health Preparedness & Response for Bioterrorism
Centers for Disease Control and Prevention Investigations and Technical Assistance
08/06/2013 - 06/30/2014
$25,000.00 Federal

Sarah Mooney, MD
New England AIDS Education Training
Subaward from UMASS
7/1/2013 – 6/30/2014
Direct Costs $58,000

Christopher Huston, MD
NIH COBRE
Vermont Immunobiology/ Infectious Diseases Center
Mechanism of Entamoeba histolytica phagocytosis
Annual direct costs $146,061

Christopher Huston, MD
NIH/ NIAID
Molecular Mechanism of Entamoeba histolytica phagocytosis
Annual direct costs $200,000

Christopher Huston, MD
The Campbell Foundation
Targeting human proteins for treatment of cryptosporidiosis
Annual Direct Costs $63,636

Publications – peer reviewed, chapters, etc. (not abstracts)

Sateriale A, Bessof K, Sarka I, Huston C. Drug repurposing: mining protozoan proteomes for targets of known bioactive compounds. February 2014 J Am Med Inform Assoc; 21:238-244

The Division of Nephrology has grown over the past year and now consists of 11 MD providers, including 9 Nephrologists and 2 Transplant Nephrologists, 1 NP and 1 Post-doctoral research fellow. We continue to be the only nephrology presence within the State of Vermont and serve multiple communities where we have outreach clinics and dialysis units. The Division has been awarded a ‘High Performing Practice’ for the past 3 years by US News and World Reports (only 1 of 4 services at FAHC so recognized this past year).

Service: Two new multidisciplinary clinics were created this past year. One in Transplant, made possible by the addition of a second transplant nephrologist (Dr. Osun Kwon), includes a transplant surgeon, nephrologists, social worker, dietitian and transplant coordinator interacting with patients and family in the same visit. A second multispecialty Stone Clinic was initiated with Virginia Hood, Kevin Sternberg, and a dietitian, together with fellows, residents, and students. Patients (10-12) with a history of chronic stone production are evaluated by both nephrology and urology. A multidisciplinary conference follows the clinic in which the metabolic basis of stone formation and therapeutic options are discussed.

Education: Residents in Medicine rotate for 2 weeks on the Nephrology Service. This previously was an inpatient rotation. Starting this March 2014, the rotation has been split into a one week in-patient and one week out-patient rotation under the supervision of Varun Agrawal. During the outpatient rotation, residents are exposed to the Home dialysis program, the Chronic dialysis program, Stone Clinic, Transplant Clinic, and chronic kidney disease clinics. They are assigned a topic for presentation on the last Friday of the rotation.

Research: Investigator initiated research includes a study of urine electrolytes in patients admitted to the hospital with acute decompensated heart failure (R. Solomon, PI). Two Chief Medical Residents and a second year resident are spearheaded this effort. A study of urine pO2 measurements in patients undergoing cardiopulmonary bypass is just starting. This effort comes out of a long term collaboration between nephrology (R. Solomon) and the cardiothoracic surgical service on efforts to reduce the incidence of acute kidney injury at FAHC. In addition, one of our fellows (supervised by S. Chang) is compiling a database of all patients transplanted at FAHC in the past 2 decades to tabulate outcomes. A second database of primary glomerulonephritis in the State of Vermont is also underway (supervised by C. Rich). Finally, our post-doctoral fellow (K. Cheung) is working with members of the Global Health Economics Unit in the Center for Clinical and Translational Science. Their project: Using System Dynamics to Project the End Stage Renal Disease (ESRD) Incidence Rates and Costs in the U.S. under Alternate Policy and Critical Care Pathway Scenarios has produced a workable model that will be presented to our ACO leadership in the near future. The goal is to contain health care costs for patients with chronic kidney disease (which accounts for nearly 1/4 of the total costs in the ACO) through more targeted use of home dialysis, transplantation, and conservative care.
Faculty

Richard J. Solomon, MD
Professor of Medicine
Director, Nephrology Division

Academic Interests

- Endothelial dysfunction in diabetes and renal disease
- Mechanisms of renal ischemia
- Acute kidney injury Prevention of contrast induced nephropathy (CIN)

Varun Agrawal, MD
Assistant Professor of Medicine
Medical Director of Barre Dialysis Unit

Academic Interests

- Obesity mediated kidney disease
- Nephrology educational research
- Resident education

Shirley Chang, MD
Assistant Professor

Academic Interests

- Kidney/Pancreas Transplantation
- Diabetic Nephropathy
- Pediatric Nephrology

F. John Gennari, MD
Emeritus Professor of Medicine

Academic Interests

- Renal physiology
- Acid-base and electrolyte homeostasis
- Fluid and solute transport in the kidney

Virginia Hood, MBBS, MPH, MACP
Professor of Medicine

**Academic Interests**

- Population approaches to management of hypertension and chronic kidney disease
- Models for delivery of high value cost conscious health care.
- Acid-base disorders

**Osun Kwon, MD**  
Associate Professor of Medicine  
Transplant Nephrology

**Academic Interests**

- Pathogenetic mechanism of ischemic injury to the kidney.

**Dana Negoi, MD**  
Associate Professor of Medicine  
Medical Director, St. Albans Dialysis Unit and Home Dialysis Program

**Academic Interests**

- Home-based dialysis therapies
- CKD Education
- Clinical Nephrology Teaching

**Jeffrey Rimmer, MD**  
Professor of Medicine  
Medical Director Chittenden Dialysis Unit

**Academic Interests**

- Renal replacement therapies in acute and chronic kidney disease
- Management of vascular access for hemodialysis
- Coordination of care for the in-center hemodialysis patient
- Management of bone and mineral disorders in the hemodialysis patient

**Alan Segal, MD**  
Associate Professor of Medicine  
Fellowship Program Director, Renal Fellowship
Academic Interests

- Sodium and potassium transport within the renal tubule
- Hyponatremia/hypotonicity disorders
- Dominant polycystic kidney disease

Wolfgang Weise, MD
Associate Professor of Medicine
Medical Director, Rutland Dialysis Unit

Academic Interests

- Primary Kidney disease

Fellows

Ziad Arabi – Second Year Fellow
Adam Horeish – Second Year Fellow
Sadik Sharef – First Year Fellow
Sree Sursala – First Year Fellow

Nurse Practitioners and Physician Assistants:
Margaret Butler, APRN

Post-doctoral Fellows, (Ph.D.):
Katharine Cheung, MD

Endowed Professorships:
Patrick Professorship (Richard J. Solomon, MD)

Leadership in Professional Societies:
Varun Agrawal, MD
Kidney Disease Outcome Quality Initiative Education committee, National Kidney Foundation

**Virginia Hood, MBBS, MPH, MACP**
Past President, American College of Physicians
Member, ACP Patient Partnership in Health Care Advisory Board
Member, Sydney University Graduate Union North America Board of Trustees
President Emerita, American College of Physicians

**Editorships and Editorial Boards:**

**F. John Gennari, MD**

**Alan Segal, MD**

Editorial Board: American Journal of Physiology, Renal

**Study Section and Federal Advisory Boards**

**Richard Solomon**
Biomarker Consortium member for NIH

**Alan Segal, MD**
US Advisory Board, Baxter Healthcare
Advisory board of Alexion Pharmaceuticals

**Invited Talks**

**Virginia Hood, MBBS, MPH, MACH**

Choosing Wisely in the USA. SGIM/SSMI Platin-symposium, Thun, Switzerland, September 20, 2013
US Health Care in Crisis: the Need for High Value Care. SUGUNA, Charlotte NC, Oct 12, 2013
Handy Hints for Blood Pressure Control. BVI Physicians, Tortola, BVI, March 1, 2014

Division of Primary Care Internal Medicine
Allen Repp, MD, MS, Director
http://www.uvm.edu/medicine/medicine/pcim/

Primary Care Internal Medicine (PCIM) specializes in diagnosing, treating, and preventing medical problems in adolescents, adults, and the elderly. We work as a team to provide a medical home for our patients in clinic and around-the-clock care for our patients admitted to the hospital.

Our faculty physicians teach general internal medicine and geriatrics to medical students, resident physicians, professional colleagues, and community members. We hold numerous leadership roles at the College of Medicine and are proud to serve an integral role in our vibrant academic medical center.

Service:
Our clinical service includes approximately 70 physicians, nurse practitioners, physician assistants, and mental health specialists. We have four outpatient sites in Chittenden County and an active hospitalist service. We also see patients at numerous skilled nursing facilities and Fanny Allen Acute Rehabilitation.

Over the past year we welcomed Dr. Jennifer Borofsky (Hospital Medicine) as new faculty. Dr. E. Rosy Hill (Ambulatory and Geriatric Medicine) will join us in July 2014.

In the office setting, patients are seen for a variety of acute and chronic medical problems, preventive care, health maintenance and preoperative exams. Our group has been a national leader in developing innovative models for care delivery. All four outpatient sites have been NCQA recognized as level 2 or 3 Patient Centered Medical Homes. We continue to continuously refine our care processes to enhance the patient experience and deliver optimal care to our population of patients.

Our physicians care for many geriatric patients in Chittenden County, attending to elderly patients living independently, in assisted living, in local nursing homes, and at hospice. We hold the medical directorships for 2 local skilled nursing facilities and for the VNA Hospice.

In the inpatient setting, our hospitalist service provides 24x7 attending and consultative care at Fletcher Allen. Additionally, we provide physician leadership to the rapid response team (CATS Team), which responds to inpatients with medical emergencies throughout the hospital. Our hospitalist team has been engaged in numerous institutional quality
improvement initiatives. We also offer medical consultation to patients in the inpatient acute rehabilitation program at Fanny Allen Rehabilitation Center.

This year PCIM faculty and providers will conduct approximately 100,000 patient encounters and generate 150,000 work RVUs.

Our faculty and providers are extensively engaged in service at the state and national levels. A few examples include: OneCare Vermont Clinical Advisory Board members, Governor for the Vermont Chapter for the American College of Physicians, UVM Medical Alumni President, Vermont Board of Medical Practice Chair, Federation of State Medical Boards Advisory Council member, USMLE and the National Board of Medical Examiners Standards Setting Committee member, Federation of State Medical Boards Board of Directors, Vermont Medicaid Drug Utilization Board members, Green Mountain Care Board Technical Advisory Group member. Faculty participation in committees and task forces at the College of Medicine and Fletcher Allen Health Care is also wide-ranging.

Education:
Division faculty members play a pivotal role in teaching and directing courses for a broad audience of clinical learners in the outpatient and inpatient settings. Our educational programs cover a wide spectrum, from primary care to tertiary care, communication skills to statistics, and from pre-medical students to post-graduate continuing medical education.

At the UVM College of Medicine, our faculty members act as preceptors, instructors, and facilitators for courses at all levels of the Vermont Integrated Curriculum. Additionally, we serve as Course Directors for Doctoring in Vermont (Dr. Beatty), Convergence (Dr. King), Outpatient Medicine Clerkship (Dr. O'Brien), Bridge (Dr. Beatty) and the Medicine Acting Internship (Dr. Levine). Administrative leadership positions at the College of Medicine include Associate Dean for Clinical Education (Dr. Bertsch), Associate Dean for Primary Care at the College of Medicine (Dr. Maclean), and Associate Chair for Education in the Department of Medicine and Associate Dean for Graduate Medical Education at the College of Medicine (Dr. Levine).

We also play key roles in the clinical education of the Internal Medicine residents. The Given Burlington practice houses the Internal Medicine Resident Clinic – where the Internal Medicine residents practice under the supervision of our preceptors and firm leaders in a busy clinic environment. In the inpatient setting, Hospitalists serve as Teaching Attending for the 4 general medicine teaching teams throughout the year – offering clinical supervision, clinical education, lectures, and evaluation to resident physicians and medical students. Additionally, our inpatient faculty physicians lead the Medicine Consult elective for residents and medical students and a Hospital Medicine Acting Internship.

After an historic tenure, Dr. Levine stepped down from the role of Director for the Internal Medicine Residency Program to assume the position of Designated Institution Official at FAHC and Associate Dean for Graduate Medical Education at the College of Medicine. Dr. Pasanen
was appointed the new Director for the Internal Medicine Residency Program, and in July 2014, Dr. Eldakar-Hein was named as a new Associate Program Director. Our faculty members have been recognized numerous times by the resident physicians for teaching excellence. In June 2014, Dr. Eldakar-Hein received the William Osler, M.D. Award for Outstanding Teacher of the Year in General Internal Medicine.

Our educational endeavors extend to graduate students in analysis of clinical research, nurse practitioners in palliative care fellowship programs, and nurse practitioner students in clinical compassion. We educate our colleagues locally, regionally and nationally in a variety of venues. Examples include the Vermont Academic Detailing Program which delivers educational outreach to Vermont’s primary care providers and the University of Vermont Continuing Medical Education Course in Hospital Medicine with faculty largely from PCIM and other divisions of the Dept of Medicine.

**Research**
Many of our clinical faculty conduct research via the General Internal Medicine Research unit and provide mentorship, resources, and a scholarly community that supports faculty from many departments in their investigations. We have a diversity of scholarly interests among our faculty including clinical trials of immunizations, the impact of innovative models for primary care, narcotic-related adverse events in inpatients, narcotic prescribing practices in the outpatient setting, communication practices around inter-hospital transfer, and VTE prevention in acute medically ill patients.

Division of Pulmonary and Critical Care Medicine
Anne Dixon MD, Director
http://www.med.uvm.edu/medicine/pulmonary

The Pulmonary Critical Care Division has instituted innovative changes in its clinical services over the last 12 months, the faculty has made significant research advances which have garnered national and international recognition, and the Division is significantly enhancing the quality and nature of its educational programs.

The Division manages critically ill patients in the Medical Intensive Care Unit, provides inpatient pulmonary and critical care consults, and has a number of sub-specialty clinics including those in interstitial lung disease, cystic fibrosis, lung cancer, asthma and cancer survivorship. The Division provides a full range of pulmonary diagnostic services: these include bronchoscopy, pulmonary function testing, evaluation of sleep disorders, and a nationally certified pulmonary rehabilitation program. The Division started an interventional pulmonary program this year. This is a major new program, the only of its kind in the region, which significantly enhances the level of care we are able to provide patients with complex airway lesions, particularly those patients with lung cancer. The Division is at the forefront of developing a Lung Cancer Screening Program in collaboration with Radiology and Oncology, and to support this initiative will develop a new program for the evaluation and management of pulmonary nodules, which will enhance the quality of care for patients at risk of lung cancer in our region.

The Division has a national and international reputation in research, especially in the areas of asthma, stem cell research and obesity and lung disease. Members of the Division published over 100 peer reviewed articles during the last year, obtained significant funding from the NIH and foundations. The research program continues to expand, and enjoys considerable success and major recognition.

The Division is committed to education and training. Members of the Division have a leadership role in the medical school curriculum, including organizing the respiratory section of the award winning Cardiovascular Respiratory and Renal Foundations Course. Over the last year, Dr. Leclair has taken advantage of being awarded a Frymoyer Scholarship to develop a highly innovative, multi-disciplinary simulation-based educational program directed towards integrated education for the ICU team, including nursing, respiratory therapy, medical students and residents. This represents a major change in the way that we educate in the ICU, and takes full advantage of the rich training environment provided by the Simulation Center to model ICU cases and management, with the ultimate goal to improve quality of care and education for the entire critical care team. Faculty members have a major role in teaching medical students, residents, and the three year Pulmonary and Critical Care Fellowship program continues to produce excellent pulmonary and critical care physicians who have gone on to pursue a variety of career pathways in academic medicine and clinical practice venues. Education of medical students and other trainees is a major mission of the Pulmonary and Critical Care Division. The last year has been a busy and successful year for the Division as outlined in detail for all members of the Division below.
Faculty

Anne E. Dixon, MD  
Professor Medicine  
Director, Pulmonary Disease and Critical Care Medicine  
Director of Clinical Research, Vermont Lung Center

Gilman Allen III, MD  
Associate Professor of Medicine  
Director of Critical Care Services, Fletcher Allen Health Care

Jason H.T. Bates, PhD DSc  
Professor of Medicine  
Department of Molecular Physiology & Biophysics

David Kaminsky, MD
- Member, American Lung Association (ALA) Research Grant Review Committee, Section C. ALA, New York, NY, March 2014

Polly Parsons, MD
- NHLBI Scientific Advisory Council: member 2011-present
• NHLBI Next Generation Resuscitation Research Workshop 201
• NHLBI Cell Therapy Think Tank 2014
• NHLBAC Asthma Expert Panel Working Group 2014
• NHLBI Think Tank on Sickle Cell Disease 2014

Matthew Poynter, PhD
• Member, NIH Lung Cellular, Molecular and immunology Study section

Renee Stapleton, MD, PhD
• Member of the review panel for the NIH NHLBI PETAL (Prevention and Early Treatment of Acute Lung Injury) Network, December 2013.
• American Thoracic Scientific Advisory Committee (responsible for reviewing all ATS grants), 2013-present

Daniel Weiss, MD, PhD
• Study Section Chief: Connecticut Stem Cell Research Foundation
• Flight Attendant Medical Research Institute study section

Major Faculty Awards:

Ryan Clouser, DO
Family Medicine Residency Appreciation Award. June 2014

Charles Irvin, PhD
John Rankin Memorial Lectureship, University of Wisconsin, Madison (Oct 2014)

Polly Parsons, MD
University of Washington: John Butler Lecture Speaker November 2013

Matthew Poynter, PhD
University of Vermont Faculty Fellow in Sustainability, 2013-2014

Renee Stapleton, MD PhD
2014 American Thoracic Society Jo Rae Wright Award for Outstanding Science. This award recognizes demonstrated potential for significant scientific achievement and contributions and is aimed at the rising generation of individuals who will be tomorrow’s leaders in science.

Benjamin Suratt, MD
Research Mentoring Excellence Award, UVM Department of Medicine, 2014
Grants – list all active by faculty member, PI

Anne Dixon, MD
- Pfizer
  Dixon (PI) 6/18/2014 - 6/17/2016
  Biomarkers in asthma

U01 HL089464
- Dixon (PI) 9/30/2009 - 6/30/2014
- Role (PI)
- Irvin (Co-PI)
Study of Asthma and Nasal Steroids (STAN): This is a grant for a multicenter study for a randomized placebo controlled trial to determine the efficacy and mechanisms of action of nasal steroids in the treatment of asthma. The plan is to recruit 380 adults and children with poorly controlled asthma and chronic rhinosinusitis at 20 centers (affiliated with the American Lung Association Asthma Clinical Research Center network).

P30 RR031158-01
- Irvin (PI) 7/1/2010 – 6/30/2015
- NIH/NCRR
  Role: PI of Clinical Core
  Title: Translational Research in Lung Biology and Disease
  This is a grant funding a Center of Biomedical Research Excellence (COBRE) Phase III: This transitional center award supports four cores, including an Environmental, Intellectual, and Administrative Core, Transgenic/Knockout Core, Small Animal Phenotyping Core, Clinical Core and a pilot project program.
  The focus of the COBRE is to continue the development of research programs in the area of lung biology and disease, specifically, airway epithelial cell biology, cystic fibrosis, asthma inflammation, lung physiology, translational animal studies, and clinical investigation into the pathogenesis of lung disease. The role of the clinical core is to facilitate translational research in pulmonary disease by providing infrastructure personnel and intellectual support for clinical/translational studies.

R01 HL085646 (van der Vliet) 7/01/2013 – 6/30/2018
- NIH/NHLBI
  Dual Oxidases in Airway Epithelial Injury and Inflammation
  The major goal of this project is to investigate the contribution of DUOX1 to epithelial production of Th2 polarizing cytokines and development of allergic inflammation

Jason H. T. Bates, PhD, DSc
- R01 HL103405 07/01/10 – 06/30/14
  PI: Bates
  NIH/NHLBI  Role: Co-PI

- P30 GM 103532 08/15/10-06/30/15
  PI: Irvin
  NIH/NIGMS  Role: Physiological Phenotyping Core leader
Gerald Davis, MD  
“A Randomized Double-Blind Placebo-Controlled, Phase 3 Study of the Safety and Efficacy of Pirfenidone in Patients with Idiopathic Pulmonary Fibrosis (PIPF-006 / CAPACITY) & open label extension. InterMune Inc. 
Gerald S. Davis, M.D. (Principal Investigator for site) 
Yolando Mageto, MD (Co-Principal Investigator for site) 

“PIPF-016 entitled “A Randomized, Double-Blind, Placebo-Controlled, Phase 3 Study of the Efficacy and Safety of Pirfenidone in Patients with Idiopathic Pulmonary Fibrosis”

Gerald S. Davis, MD (Principal Investigator for site) 
Yolando Mageto, MD (Co-Investigator for site) 

“A Phase II, Randomized, Double-Blind, Placebo-Controlled, Study to Assess the Efficacy and Safety of Lebrikizumab in Patients with Idiopathic Pulmonary Fibrosis” 2013 - 2018 
F. Hoffmann-La Roche Ltd 
Gerald S. Davis, MD (Principal Investigator for site) 
Yolando Mageto, MD (Co-Investigator for site) 

“A Treatment Protocol to Allow Patients in the US with Idiopathic Pulmonary Fibrosis Access to Pirfenidone (Expanded Access Program Protocol PIPF-031)”  
InterMune, Inc. 
Gerald S. Davis, MD (Principal Investigator for site) 
Yolando Mageto, MD (Co-Investigator for site) 

Charles Irvin, PhD  
P30 GM103532 (Irvin) 08/15/10-06/30/15 
NIH/NIGMS 
Title: Translational Research in Lung Biology and Disease 
Role: Principal Investigator 
The goals are to train and enhance the competitiveness of promising, young faculty members through a PPG-like mechanism. Three cores are also funded including: administrative, transgenic animals, and bioengineering. 

T32 HL076122 (Irvin) 04/01/04-04/30/19 
NIH/NHLBI
Title: Multidisciplinary Training in Lung Biology
Role: Principal Investigator
The major goal of this training grant is to produce outstanding, independent biomedical scientists who investigate the mechanisms, manifestations, preventions and cures for lung disorders.

American Lung Association
Irvin (PI)  
Dixon (Co-PI)
Asthma Clinical Research Center: The major goals of this project are to participate in a nationwide network of clinical research studies in diverse patient populations with asthma.

American Lung Association (Irvin)  
Title: Asthma Clinical Research Center
Role: Principal Investigator
The major goals of this project are to participate in a nationwide network of clinical research centers involved in various basic science and clinical investigations in asthma.

8U13 GM103387 (Irvin)  
07/01/09-06/30/15
NOT-RR-05-004
Title: National IDeA Symposium of Biomedical Research Excellence (NISBRE)
Role: Principal Investigator
The goals of this project are to: 1) Plan and organize a biennial scientific symposium to showcase research by IDeA (COBRE and INBRE) Investigators, 2) Develop and organize a series of technical collaborative workshops for IDeA scientists to expand their technological repertoire and improve their competitiveness and 3) Enhance communications, share common experiences and establish research collaborations between multidisciplinary investigators of the IDeA community.

R01 HL085464/01 (Janssen-Heininger)  
01/07/18-01/31/17
NIH
Title: Epithelial JNK-TGFb1 Signaling Axis in Airway Remodeling
Role: Co-investigator
This project represents a continuation renewal of Project 2 of PPG P01 HL67004. The major goals of this project are to delineate the functional role of c-jun-N-terminal kinase 1 in epithelial to mesenchymal transition and fibrosis in the mouse.

1P50DA036114-01 (Stephen Higgins)  
09/30/13-08/31/18
National Institutes of Health/DHHS-FDA Tobacco Regulatory Science Center
Role: Co-Investigator

David Kaminsky, MD
R34 HL113290-01, NIH/NHLBI
The Efficacy of Pranayama in COPD
PI: David Kaminsky, MD (10%)

American Lung Association - Asthma Clinical Research Center
PI: Charles G. Irvin, Ph.D.
Role on Project: Co-Investigator (5%)

United Therapeutics, Inc.
Changes in the Diffusing Capacity of the Lung for Carbon Monoxide (DLCO) in Response to Vasodilator Therapy in Patients with Pulmonary Arterial Hypertension
PI: David Kaminsky, MD (< 5%)

C. Matthew Kinsey, MD MPH
Vermont Cancer Center/Lake Champlain Cancer Research Organization Pilot Grant.
Kinsey PI.

Laurie Whittaker Leclair, MD
Therapeutics and Development network Award, Cystic Fibrosis Foundation
The goal of this award is to support infrastructure necessary to effectively participate in multi-center clinical research trials for new therapies to treat CF.
Role on Grant: co-PI

Frymoyer Scholars Award
The goal of the award is to develop innovative, simulation based, inter-disciplinary curriculum for the medical intensive care unit care teams.

Lennart Lundblad, PhD
NKT Therapeutics Inc. (Lundblad) 07/01/2013 - 6/30/2014
Title: Selective elimination of iNKT cells on the asthmatic phenotype in experimental asthma.
The goal of this pilot project is to study the effects of iNKT cell elimination in mouse model of mast cell –independent allergic airway inflammation. We will determine the role of iNKT cells on airways hyperresponsiveness and the airway inflammation in mice sensitized with ovalbumin.
Hoffman La-Roche, Inc. (Lundblad) 11/01/2010 – (no cost ext.)
Investigator initiated grant:
Title: Bronchoconstriction and the role of mast cells
To develop a model of bronchoconstriction in mice using house dust mite and to determine if mast cells contribute.

ASRC 312 (Lundblad), 11/01/2008 – (no cost ext.)
Sepracor, Inc.
Title: Cause and effect of formoterol on airway hyperresponsiveness *in vivo*
To test the hypothesis that the therapeutic effects of formoterol depends on its ability to reduce airway closure via modulation of plasma extravasation and mucin production.

VCIID CoBRE Pilot Project (Budd) 10/01/2013 – 09/31/2014
NIH
Supporting Drs. Poynter (UVM), Lundblad (UVM), and Tumanov (Trudeau Institute)
Lymphotxin β Receptor Signaling in Influenza Virus-Induced Asthma Exacerbation
Our approach for this Pilot Project is to establish mouse models of influenza-induced asthma exacerbation using acute and chronic inhalational exposure to house dust mite (HDM). We will further explore the potential for therapeutic manipulation of the LTβR pathway to prevent lung immunopathology and asthma exacerbation using an LTβR inhibitor.

COM- IGP. (Lundblad) 03/04/2014 – 03/03/2016
University of Vermont
Title: Allergic mast cell expansion and the resulting phenotype are caused by IL-33
The goal of this pilot project is to establish the role of IL-33 from innate lymphoid cells in the recruitment of mast cells in allergically inflamed lungs.

1R21 AI112804-01. (Lundblad) 07/01/2014 – 06/30/2016
NIH/NAIAID
Title: iNKT Cells Regulating Lung Mast Cells: New Treatment Opportunity for Asthma
The central hypothesis of this proposal is that eliminating iNKT cells will reduce allergen induced bronchoconstriction and airways hyperresponsiveness via a reduction of mast cell expansion. A new iNKT antibody (NKT-14) that eliminates all iNKT cells was developed for this project to determine if elimination of iNKT cells reduces the development of allergic AHR and allergen induced bronchoconstriction.

Prema Menon, MD
National Palliative Care Center 7/2013-6/2015
Career Development Award
Role: PI (Principal Investigator)
“Telemedicine as a Tool for Early Family Conferences in Critically Ill Patients”

Serum Amyloid A3 in Allergic Asthma: An Endogenous Mediator of Disease Severity
The goal of this project is to determine mechanisms by which pulmonary SAA3 functions to polarize tissue-destructive Th17 responses in severe allergic asthma. In Specific Aim (SA) 1 we will determine quantitative and qualitative patterns of SAA3 expression during the development of allergic asthma in mouse models of disease. In SA2 we will measure the effect of SAA3 on the antigen-specific CD4+ T cell adaptive immune response using
wildtype and inducible airway epithelial SAA3-expressing mice, as well as TLR2-, Nlrp3-, IL-1Ra-, and FPR2-deficient mice to determine whether SAA3 promotes Th17 polarization, which receptors are involved, whether the activity is directly upon T cells, and whether the effect of SAA3 is glucocorticoid-sensitive. In SA3 we will establish in vivo the sufficiency and necessity of SAA3 for augmentation of allergic asthma severity, addressing mechanisms implicated from the previous specific aims by which SAA3 worsens lung physiologic and structural allergic asthma phenotypes, including the roles of IL-1, IL-17, and glucocorticoid responsiveness.

Clinical Innovator Award (Poynter) 07/01/2012 – 06/30/2015
FAMRI
Airway Epithelial Control of Asthma Severity
The objective is to explore how airway epithelial NF-κB-regulated products, including SAA (SAA3 in mice), affect pulmonary DC activities that not only facilitate allergic sensitization but also break inhalational tolerance, manifesting in mixed Th2/Th17 responses and the development of severe disease. We will a) determine the cellular patterns of pulmonary SAA production in response to airway epithelial NF-κB activation, b) establish whether pulmonary SAA resulting from airway epithelial NF-κB activation is necessary and sufficient for the development of severe allergic asthma and breaking inhalational tolerance, and c) evaluate the anti-apoptotic effects upon DCs and identify the pulmonary DC phenotype elicited by airway epithelial NF-κB activation.

VCIID CoBRE Pilot Project (Poynter) 10/01/2013 – 09/31/2014 NIH
IL-1 Antagonism in Severe Asthma
Our objective for this Pilot Project is to determine whether IL-1R blockade (using an IL-1 trap from Regeneron) during antigen challenge will inhibit Th17-mediated pulmonary inflammation, AHR, and confer glucocorticoid sensitivity in NO2- and HDM-promoted allergic airway disease.

VLC Pilot Project (Poynter) 03/01/2014 – 12/30/2014
Vermont Lung Center
Mouse models to mechanistically address the impact of weight loss on asthma
The hypothesis to be addressed in this Pilot Project is that a mouse model of bariatric surgery-induced weight loss can be developed at UVM, with the input of established experts in their respective fields, which will yield mechanistic insight into the obese asthma phenotype and the manner in which weight loss alters lung physiology and immune function.

VCIID CoBRE Pilot Project (Budd) 10/01/2013 – 06/30/2014 NIH
Supporting Drs. Poynter (UVM), Lundblad (UVM), and Tumanov (Trudeau Institute)
Lymphotoxin β Receptor Signaling in Influenza Virus-Induced Asthma Exacerbation
Our approach for this Pilot Project is to establish mouse models of influenza-induced asthma exacerbation using acute and chronic inhalational exposure to house dust mite (HDM). We will further explore the potential for therapeutic manipulation of the LTβR pathway to prevent lung immunopathology and asthma exacerbation using an LTβR inhibitor.

Division of Rheumatology
Edward Leib, MD, Chief (Up to 6/30/14)
http://www.med.uvm.edu/medicine/rheumatology

The members of the Division of Rheumatology and Clinical Immunology provide high quality patient care to residents of Vermont, up-state New York and other contingent areas, contribute to the teaching of resident physicians of the University of Vermont Medical Center (formerly Fletcher Allen Health Care) and medical students at the UVM College of Medicine, and perform both bench and clinical research. Our faculty consists of nine physicians, all of whom are board certified in Internal Medicine and Rheumatology, and a Physician’s Assistant. The combined Rheumatology staff and the Osteoporosis Center, a part of our Unit, welcomed over 1200 patients monthly, generating 1650 work RVUs monthly. In addition to bone densitometry, we have an on-site infusion center, and provide point of care musculoskeletal ultrasound. We offer a metabolic bone clinic in addition to our rheumatology services, and an Interstitial Lung Disease Clinic in collaboration with our colleagues in the Pulmonary Division. We have well-established out-patient satellite clinics at Central Vermont Medical Center and Copley Hospital. We cover in-patient consults at the University of Vermont Medical Center on a 24-7 basis.

We have an accredited program for Rheumatology Fellowship, and accept one new Fellow annually in a competitive match. The Internal Medicine Residency Program has incorporated an out-patient Rheumatology rotation into the schedule of each Resident; they are given the opportunity to work with each of the faculty. Several medical students have also elected to do a rotation in our out-patient site. Annually, we participate in the Connections Course for 2nd year medical students, providing didactic teaching on a wide range of Rheumatic and Metabolic Bone Diseases and Musculoskeletal examination.

Several of our faculty are engaged in clinical research including the use of musculoskeletal ultrasound in lateral hip pain, the effect of belimumab on pneumococcal immunization response in lupus patients and the ability of Trabecular Bone Score (TBS) to predict fracture in various populations. We also collaborate with the division of Immunobiology on effect of IL-6 inhibition on cellular function.

Faculty

Edward Leib, MD
Professor of Medicine
Division Chief, Rheumatology and Clinical Immunology ending June 30, 2014
Director, The Osteoporosis Center, FAHC
- Osteoporosis and Metabolic Bone Diseases
- Rheumatoid Arthritis
Dr. Leib has been a leading authority internationally on developing guidelines and positions on the appropriate use of Bone Densitometry. He has also been involved in clinical studies utilizing a new technology for ascertaining fracture risk called Trabecular Bone Score (TBS). In the past year, he has co-authored presentations on TBS at the annual meetings of the American Society of Bone and Mineral Research, and at the European Congress of Osteoporosis and Osteoarthritis. He also mentored Dr. YX Teh, a Fellow in Endocrinology, who presented a study on interpretation of bone densitometry of the spine at the annual meeting of the Endocrine Society. He directs the Osteoporosis Center and the Metabolic Bone Clinic, and is certified to read Bone Densitometry by the International Society for Clinical Densitometry. Dr. Leib is on the Editorial Board of the Journal of Clinical Densitometry.

**Sheldon Cooper, MD, MACR**  
Professor of Medicine  
- Rheumatoid Arthritis  
- Osteoarthritis  
- Regional Rheumatic Syndromes

Dr. Cooper provides care for individuals with arthritis and musculoskeletal problems. He is Principal Investigator for trials that evaluate the effectiveness and mechanism of action of biologic drugs in the treatment of Rheumatoid Arthritis. The focus is on tocilizumab, a monoclonal antibody to the IL-6 receptor. Recent studies have demonstrated that IL-6 blockade reduces the levels of IgG4 antibodies to citrullinated peptides. Current studies are designed to understand how IL-6 blockade alters B-cell function and the role of IgG4 autoantibodies in the pathogenesis of RA.

**Ralph Budd, MD**  
Professor of Medicine, Microbiology & Molecular Genetics  
- Inflammatory Arthritis  
- Systemic Lupus Erythematosus

Dr. Budd and his team have been working on four projects related to the activity of caspases and c-FLIP in the immune system. The first demonstrated that the reason certain viruses took FLIP into their own genome as a short form was that it has the ability to turn off the anti-viral interferon response, whereas, the full-length long form of c-FLIP does the opposite. Second, they have now linked the level of caspase activity in T cells to their state of metabolism. This has significant implications for which T cells survive an immune response to confer immune memory. The third area is a gene expression study of what genes significantly change expression levels during homeostatic proliferation of T cells. This has implications for why it is important to eliminate these T cells, lest they precipitate autoimmune sequelae. The final study is on gamma/delta T cells in Lyme arthritis, showing how the levels of c-FLIP in dendritic cells profoundly alter their ability to activate the gamma/delta T cells.
Dr. Budd is also an editor of the *Textbook of Rheumatology* 9th Edition, is the Director of the Vermont Center for Immunology and Infectious Diseases, has been a member of several NIH study sections, is a member of the NIH NIAID T32 grant study section, a member of the NIH Special Emphasis Panel and is a member of the Association of American Physicians.

Active Grants:
NIH CORBE (Center of Biomedical Research Excellence)
NIH T32 Training Grant

**Bonita Libman, MD, Interim Chief beginning 7/1/2014**
Professor of Medicine
- Connective Tissue Disorders
- Systemic Lupus
- Rheumatoid Arthritis

Dr. Libman is the Program Director for the Rheumatology Fellowship Training Program. She received a $25,000 Fellowship Training Award for 2014-2015 from the American College of Rheumatology Research Foundation. This is the fifth year in succession that the Division has received this award through the efforts of Dr. Libman. She also received a $4000 American College of Rheumatology Research Foundation Medical Student Preceptorship Award in 2014. Dr. Libman is a member of the American College of Physicians MKSAP 17 Rheumatology Committee. She also chairs the Fletcher Allen Health Care Medical Records Committee.

**Chi Chi Lau, MD**
Associate Professor of Medicine
- Systemic Lupus
- Inflammatory arthritis
- Connective tissue disorders

Re-certified in Rheumatology, 2012.
Obtained re-certification of CME for Rheumatology Rounds.

Dr. Lau has a very busy clinical practice providing excellent care to patients with a variety of complex rheumatic diseases. She is responsible for the Rheumatology Unit's CME reporting and accounting. She is also involved in teaching second year UVM medical students utilizing the innovative Team Based Learning technique. Dr. Lau presented at a community lecture at the Explore Conference in Plattsburgh regarding arthritic disorders in October, 2013. She recently lectured on Systemic Lupus at the Family Medicine Review Course in June, 2014.

**Christine Jones, MD**
Assistant Professor of Medicine
- Scleroderma
- Interstitial Lung Disease and Rheumatic Disease
- Myositis

Dr. Jones is Co-Founder of the Interstitial Lung Disease Clinic at Fletcher Allen, along with Yolanda Mageto, MD, and continues to participate in the Clinic. Dr. Jones is a member of the Faculty Development Committee at FAHC and is a certified Clinical Densitometrist.

**Nicole Hynes, MD**  
Assistant Professor of Medicine  
- Inflammatory arthritis  
- Connective tissue disorders  
- Regional pain syndromes

Dr. Hynes participates in our clinical program on a half-time basis. For a number of years she has provided care in less well served areas at Copley Hospital and Central Vermont Medical Center. In February, 2013, she attended a Harvard Review Course, “General Internal Medicine for the Subspecialist”.

**James Trice, MD**  
Assistant Professor of Medicine  
- Osteoporosis  
- Inflammatory Arthritis  
- Connective Tissue Disease  
- Vasculitis  
- Clinical Trials

Dr. Trice joined the faculty in 2011. He recently re-certified as a Certified Clinical Densitometrist (CCD) and reads bone densities for the Osteoporosis Center. He is Co-Chair of the Osteoporosis Committee and serves on the Fellow Education Committee.

**Narandra Bethina, MD**  
Assistant Professor of Medicine  
- Rheumatoid Arthritis  
- Psoriatic Arthritis  
- Scleroderma  
- Sjogren’s Syndrome  
- Musculoskeletal Ultrasound

Upon his Fellowship graduation from our Rheumatology Division in 2013, Dr. Bethina joined the unit as a Rheumatology Attending. Dr. Bethina manages conditions such as rheumatoid arthritis, psoriatic arthritis, polymyalgia rheumatica (PMR), osteoarthritis, gout,
lupus, ankylosing spondylitis, scleroderma, sjogren’s syndrome, vasculitis, inflammatory myositis and other autoimmune disorders. In 2013, Dr. Bethina was certified in Musculoskeletal Ultrasound by the Ultrasound School of North American Rheumatologists (USSONAR). By invitation of USSONAR, he is now teaching their students, while also utilizing musculoskeletal ultrasound for his own patients.
