“Vaping, Juuling, and E-Cigarettes: Public Health Implications”

Is the growing popularity of vaping and use of e-cigarettes a public health epidemic or a boon for smoking cessation? What are the differences between a vape, an e-cigarette, and a JUUL and why is it important? Learn about the evolving forms of nicotine delivery systems and the public health concerns they raise.

Andrea Villanti, M.P.H., Ph.D., is an associate professor of psychiatry at the UVM Larner College of Medicine. She received her master’s degree in public health from Columbia University and Ph.D. in social and behavioral sciences from the Johns Hopkins Bloomberg School of Public Health. Prior to joining UVM in 2016, she completed a research fellowship and served as a research investigator and director for regulatory science and policy at the Schroeder Institute for Tobacco Research and Policy Studies at Truth Initiative (formerly American Legacy Foundation) in Washington, D.C., and was also an assistant scientist in the Department of Health, Behavior and Society at Johns Hopkins. A member of the Society for Research on Nicotine and Tobacco since 2010, she has served as the organization’s co-chair of the Policy Research Network and received the Jarvik-Russell Early Career Award in 2018. Villanti was also a co-editor of a special issue of Tobacco Control on “Flavoured Tobacco Products in the United States,” as well as a contributing editor on a Report of the Surgeon General, titled “E-Cigarette Use Among Youth and Young Adults.”
