

**Suzanne Dunbar**

**CAP Fellowship Program Administrator**

Hello! My name is Suzanne Dunbar. I was born in Colorado Springs, Colorado and received a Bachelor of Arts degree in Biology from the University of Colorado, Colorado Springs. I moved to Vermont in 1992 and started working at the hospital in 1998, checking patients in and scheduling appointments in the Women's Health clinic in UHC. In 2001 I was offered a position running the Reproductive Endocrinology & Infertility (REI) fellowship, as well as being administrative support for the REI and Research divisions. In 2005, I gave up my Research Division responsibilities (and soon after gained Gynecologic Oncology) and continued to work for the REI division and fellowship in the newly constructed ACC building. In 2015, I added the Maternal Fetal Medicine (MFM) fellowship to my plate and have been managing those fellowships ever since. I am married and have two grown daughters, Amanda (21) and Lauren (18) and one cat named Luna. My goal when I moved to VT was to try it out for 5 years and then see about relocating somewhere else. I've been here for 28 years now and while somewhere warm to retire to has definite appeal, I have no plans to leave in the near future! I love where I work and where I live and am looking forward to this new chapter in my career.
