Edinburgh Postnatal Depression Scale (EPDS)

Date: ____________________  Clinic Name/Number: ____________________

Your Age: ____________________  Weeks of Pregnancy/Age of Baby: ____________________

Since you are either pregnant or have recently had a baby, we want to know how you feel. Please place a CHECK MARK (✓) on the blank by the answer that comes closest to how you have felt IN THE PAST 7 DAYS—not just how you feel today. Complete all 10 items and find your score by adding each number that appears in parentheses (#) by your checked answer. This is a screening test; not a medical diagnosis. If something doesn’t seem right, call your health care provider regardless of your score.

Below is an example already completed.

1. I have been able to laugh and see the funny side of things:
   As much as I always could _______ (0)
   Not quite so much now _______ (1)
   Definitely not so much now _______ (2)
   Not at all _______ (3)

2. I have looked forward with enjoyment to things:
   As much as I ever did _______ (0)
   Rather less than I used to _______ (1)
   Definitely less than I used to _______ (2)
   Hardly at all _______ (3)

3. I have blamed myself unnecessarily when things went wrong:
   Yes, most of the time _______ (3)
   Yes, some of the time _______ (2)
   Not very often _______ (1)
   No, never _______ (0)

4. I have been anxious or worried for no good reason:
   No, not at all _______ (0)
   Hardly ever _______ (1)
   Yes, sometimes _______ (2)
   Yes, very often _______ (3)

5. I have felt scared or panicky for no good reason:
   Yes, quite a lot _______ (3)
   Yes, sometimes _______ (2)
   No, not much _______ (1)
   No, not at all _______ (0)

6. Things have been getting to me:
   Yes, most of the time I haven’t been able to cope at all _______ (3)
   Yes, sometimes I haven’t been coping as well as usual _______ (2)
   No, most of the time I have coped quite well _______ (1)
   No, I have been coping as well as ever _______ (0)

7. I have been so unhappy that I have had difficulty sleeping:
   Yes, most of the time _______ (3)
   Yes, sometimes _______ (2)
   No, not very often _______ (1)
   No, not at all _______ (0)

8. I have felt sad or miserable:
   Yes, most of the time _______ (3)
   Yes, quite often _______ (2)
   Not very often _______ (1)
   No, not at all _______ (0)

9. I have been so unhappy that I have been crying:
   Yes, most of the time _______ (3)
   Yes, quite often _______ (2)
   Only occasionally _______ (1)
   No, never _______ (0)

10. The thought of harming myself has occurred to me:*  
    Yes, quite often _______ (3)
    Sometimes _______ (2)
    Hardly ever _______ (1)
    Never _______ (0)

**TOTAL YOUR SCORE HERE**

* If you scored a 1, 2 or 3 on question 10, PLEASE CALL YOUR HEALTH CARE PROVIDER (OB/Gyn, family doctor or nurse-midwife) OR GO TO THE EMERGENCY ROOM NOW to ensure your own safety and that of your baby.

If your total score is 11 or more, you could be experiencing postpartum depression (PPD) or anxiety. PLEASE CALL YOUR HEALTH CARE PROVIDER (OB/Gyn, family doctor or nurse-midwife) now to keep you and your baby safe.

If your total score is 9-10, we suggest you repeat this test in one week or call your health care provider (OB/Gyn, family doctor or nurse-midwife). Being a mother can be a new and stressful experience. Take care of yourself by:
- Getting sleep—nap when the baby naps.
- Asking friends and family for help.
- Drinking plenty of fluids.
- Eating a good diet.
- Getting exercise, even if it’s just walking outside.

Regardless of your score, if you have concerns about depression or anxiety, please contact your health care provider.

Please note: The Edinburgh Postnatal Depression Scale (EPDS) is a screening tool that does not diagnose postpartum depression (PPD) or anxiety.
ABOUT THE EPDS

Studies show that postpartum depression (PPD) affects at least 10 percent of women and that many depressed mothers do not get proper treatment. These mothers might cope with their baby and with household tasks, but their enjoyment of life is seriously affected, and it is possible that there are long term effects on the family.

The Edinburgh Postnatal Depression Scale (EPDS) was developed to assist health professionals in detecting mothers suffering from PPD; a distressing disorder more prolonged than the “blues” (which can occur in the first week after delivery).

The scale consists of 10 short statements. A mother checks off one of four possible answers that is closest to how she has felt during the past week. Most mothers easily complete the scale in less than five minutes.

Responses are scored 0, 1, 2 and 3 based on the seriousness of the symptom. Items 3, 5 to 10 are reverse scored (i.e., 3, 2, 1, and 0). The total score is found by adding together the scores for each of the 10 items.

Mothers scoring above 12 or 13 are likely to be suffering from depression and should seek medical attention. A careful clinical evaluation by a health care professional is needed to confirm a diagnosis and establish a treatment plan. The scale indicates how the mother felt during the previous week, and it may be useful to repeat the scale after two weeks.

INSTRUCTIONS FOR USERS

1. The mother checks off the response that comes closest to how she has felt during the previous seven days.
2. All 10 items must be completed.
3. Care should be taken to avoid the possibility of the mother discussing her answers with others.
4. The mother should complete the scale herself, unless she has limited English or reading difficulties.
5. The scale can be used at six to eight weeks after birth or during pregnancy.

Please note: Users may reproduce this scale without further permission providing they respect the copyright (which remains with the British Journal of Psychiatry), quote the names of the authors and include the title and the source of the paper in all reproduced copies.
