**Facility Citations:** Please remember to cite the UVMCC-COM Massively Parallel Sequencing Facility in your abstracts and publications. These citations are an important metric for NCI funding to the Cancer Center and also demonstrates to the NCI and other funding organizations (as well as the UVM administration) the importance of this facility to UVM researchers and thereby encourage their continued support. We try to keep a current list of all publications that cite the facility, so please let us know as when your papers are published! Below is an example of how to cite the facility:

- "The next-generation sequencing was performed in the Advanced Genome Technologies Core Massively Parallel Sequencing Facility and was supported by the Vermont Cancer Center, Lake Champlain Cancer Research Organization, UVM College of Agriculture and Life Sciences, and the UVM College of Medicine."
