

Focus on the process

mehealth for ADHD is an evidence-based, comprehensive and easy-to-use online tool for improving the quality of ADHD care. Effectiveness of software has been shown in randomized clinical trials.

The web-based software improves quality of care and patient outcomes with:

FASTER ASSESSMENT PROCESS

Online collection of parent and teacher rating scales

CLOSER MONITORING OF PATIENTS

Automated follow-up assessments with customized alerts for behavioral deterioration or problematic side effects

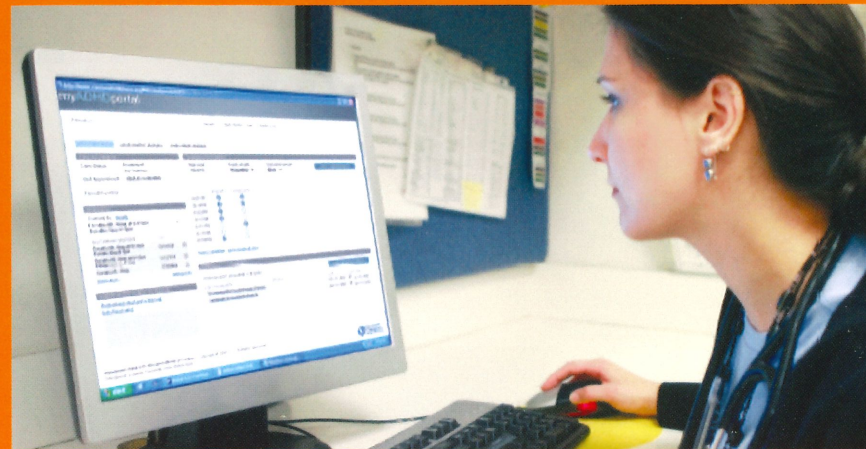

BEHAVIORAL TREATMENTS

Easy-to-use tools for parents and teachers to create and deliver behavioral interventions

QUALITY IMPROVEMENT TOOLS

- Physician report card
- Plan-Do-Study-Act generator for improving key ADHD practice behaviors

Focus on enrollment

Focus on the impact

“It’s essential. It’s more than helpful. It’s time saving. It’s efficient to my staff. It’s pleasing to parents.”

—KEITH STOWERS, MD
Pediatrician

Percentage of physicians who would recommend mehealth for ADHD to a colleague

Physicians say mehealth **reduces ADHD assessment time by 50%**
