

One-Year Medical Student Research Opportunity in Ophthalmology

The New England Eye Center at Tufts Medical Center, Tufts University School of Medicine, in collaboration with the Massachusetts Institute of Technology has an exciting and unique research opportunity for a highly motivated medical student. The research involves the clinical applications of high-speed ultrahigh resolution optical coherence tomography (OCT). The student will have the opportunity to design, initiate, and complete clinical studies on the utility of this device in retinal diseases, neuro-ophthalmology and glaucoma. A background in engineering or computer science is preferred. This is a one-year, full time commitment starting in July 2019. A stipend of \$30,000 per year is available.

Interested individuals should contact:

Nadia K. Waheed, MD

Associate Professor, Department of Ophthalmology, TUSM
