Department of Radiation Oncology  
Professor and Chairman  
Nancy B. and Jake L. Hamon Distinguished Chair  
In Therapeutic Oncology Research

September 6<sup>th</sup>, 2017

To Whom It May Concern:

We should like to call your attention to an opportunity for medical students interested in a career in oncology to consider an outstanding training program at UT-Southwestern in Dallas, Texas. ***We would appreciate your making this information available to students interested in residency training in radiation oncology or in general oncology***, where exploring our field may be of interest.

The Radiation Oncology Program at UT-Southwestern is a unique, exciting environment for education and training. As part of the NCI-designated Harold C Simmons Comprehensive Cancer Center, we provide a setting where teaching and "hands on" experience are priorities in multidisciplinary management of a large number of patients with a broad array of cancers and related diseases requiring radiation therapy. Our faculty includes 20 clinical radiation oncologists dedicated to academic medicine, 23 radiation and molecular biologists, and 27 medical physicists. We are housed in a new, attractive, highly efficient facility on the park-like urban campus of the UT-Southwestern Medical School. The department is dedicated to providing the most sophisticated and effective treatment through outstanding clinical expertise and the newest in radiation therapy equipment and related imaging technologies. Our residents enjoy support in all aspects of radiation oncology and ready access to an infrastructure that facilitates clinical trial development as well as laboratory-based investigation.

We invite you to visit our website at <http://www.utsouthwestern.edu/rad-onc-residency> to learn more about our program, the Medical School, and the exciting city of Dallas.

Yours sincerely,

Hak Choy, MD
