

UAB Orthopedics Research Program

UAB Orthopaedic Surgery is offering a one year research program for medical students interested in applying for orthopaedic residency. This is the 6th year of this program and we are increasing the number of positions to two.

The research fellows will spend approximately 70% of the time in research activities, and 30% of the time pursuing clinical interests, including assistance in the clinic and OR and attendance at resident conferences and journal clubs. The majority of the fellow's time will be spent with me, a fellowship-trained shoulder specialist, although participation in research studies with other faculty will be strongly encouraged. Previous fellows have pursued projects in shoulder, sports medicine, pediatrics, spine, hand, foot and ankle, and tumor.

I encourage you to contact me, Brent Ponce, at bponce@uabmc.edu or our current research fellow, Parke Hudson, at phuds002@ucr.edu for more information. [Application materials can be found online](#). The salary is \$25,000.
