COVID-19 Vaccines and Youth

Vaccines lower your risk of getting COVID-19, including the variants, such as Delta & Omicron

When you are fully vaccinated, and boosted, if you become sick with COVID-19, it’s more likely to be a mild case

Vaccines can make it safer to hang out with your friends

If you have questions, talk to your doctor or your school nurse

Vaccines help everyone!

Being vaccinated protects others with weaker immune systems or those who cannot be vaccinated
