Access to Primary and Preventive Health Services for All Vermonters

Vermont Health Workforce

- Interprofessional Practice
- Program Evaluations & Data
- Interprofessional Training
- Academic and Community Partnerships

Program Design

Priority FY18-22

Supply & Distribution
Increase workforce supply and improve geographic distribution.
Those who receive training in community-based and underserved settings are more likely to practice in similar settings.

Diversity
Prepare a diverse workforce.
A workforce reflective of and responsive to Vermont’s population (racial, ethnic, and disadvantaged backgrounds).

Practice Transformation
Provide evidence-based, continuing education, and quality improvement practice support services.
Quality care that encourages innovative team-based and interprofessional approaches.
