Subject: Breaking Down Cardboard Boxes in COM Buildings

Good Afternoon,

Breaking down and flattening cardboard boxes is an issue that continues to be a nuisance campus-wide but today I am focusing on COM buildings. Lucky you. 😊

I'm asking anyone copied here to please spread the word to occupants of COM buildings that it is very important that everyone; students, faculty and staff, break down and flatten their cardboard boxes. It is not the job of the custodial staff to do this task. Boxes should be flattened and tucked neatly behind hallway trash/recycling containers for pickup. Additionally, there is limited space on loading docks and in dumpsters and boxes that are not broken down take up much needed space in these areas. We do not have pick-up service everyday and space is at a premium. Again, please pass along this message to those you work with. If a lab space or office has a larger delivery coming in they can request assistance via FAMIS service request.

Please do not hesitate to reach out if you have any questions about this or any other recycling concerns.

Thanks!
Corey
