

CBSR-Research Technologies Seminar Series

Special Short Seminar and Open Forum

Updates from the UVM Genomics Facility:

*Nanopore and Singular Next Generation Sequencing,
Single Cell/Spatial, and other Genomic Services*

Wednesday, January 8, 2025 – HSRF 200 - Noon-1pm

Join us! In-person: Lunch will be served

or attend via Zoom: <https://uvmcom.zoom.us/j/98721277209?from=addon>

This short seminar (20 min.) will be followed by an open discussion and Q&A on various topics related to genomics.

- Learn how Nanopore updates enable adaptive sequencing, improved direct RNAseq, methylation calling and higher quality long-read sequencing (>Q22)!
- Hear about the remarkable performance of our upgraded Singular G4 short-read sequencer and advancements in Single Cell and Spatial
