

**Lisa Shappy**

**Practice Support**

I have worked for the UVM Medical Center for 33 years holding various positions, but working here at the VCCYF is by far the most rewarding job I have had. Not only do I support the clinicians and the work they do here, I get to meet and interact with the families that come to our center, some on a weekly basis. Getting to know them is one of the most rewarding aspects of my job.

I was born and raised in Vermont and love everything about our four seasons. In the summer, my husband and I camp at as many State Parks as we can always trying to include a kayak, hike or bike ride with our dog. In the winter we ice fish, snowmobile and snow shoe.
